Notes:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age	None
Gender	None
Overall	None

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2017

Maryland

Reporting Period: 7/1/2016 To: 6/30/2017

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	50.0%	72.0%	71.0%	54
Percent of Children served through the SMHA who meet the Federal definition for SED	58.0%	70.9%	68.0%	54

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	45.0%	25.4%	23.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	7.4%	6.2%	4.0%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	25.0%	23.3%	21.0%	53
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	6.0%	5.1%	3.0%	53

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

A consumer is considered to be a dual diagnosis consumer in a given fiscal year if he or she has a diagnosis beginning with 291, 292, 304 or 305 (excluding 305.10-nicotine addiction.) A list of consumers is compiled based on these diagnoses from authorizations and claims data and then matched up with claims data.

State Notes

See General Notes.

General Notes FY 2017**Maryland**

URS Table Number	General Notes
5A	The decrease in the number of Non-Medicaid Funding only individuals in FY17 from FY16 supports the state's efforts to decrease the number of Uninsured status served and the state's MA expansion efforts as well as efforts to link up Uninsured individuals with qualifying MA benefits.
6	The LOS of hospital residents are increasing in state hospitals as the individuals are either forensically involved, or their diagnosis is within the Serious Mental Illness (SMI) category.
8	The increase in total non-direct service can be explained: the 2017 table provides more categories for Activities, therefore reflects more expenditure data. For example, for 2017 we reported expenditures on partnerships, community outreach, and quality assurance (Consumer Quality Teams). These categories were not presented for 2016.
12	The number of co-occurring individuals has increased due to the fact that the state has revised the way in which we are grabbing the count for this population. In the past we have based a co-occurring status based on primary mental health diagnosis with a secondary substance use diagnosis. In FY17, the state broadened that population to also include those individuals with a primary mental health diagnosis and who also answered, "Yes" to the question, "Do you have substance use problem?" at the time of service authorization.
16	The state is looking into what can account for the change as supported employment efforts in Maryland have always been a key priority.
