## Minnesota

URS Table Number	General Notes
6	In 2018 only Minnesota's psychiatric Inpatient hospitals were included in the data. State Hospital average LOS were calculated by the Direct Care and Treatment (State Hospital) analyst this report year; they will report future years as well. DCT has direct control of the data.
7	All the TOTAL expenditures for (MHBG, Local Funds, Other Federal, EBPfor ESMI, and State hospitals) increased due to: (1) Increased programs and staff in ACT, Forensic ACT, and Youth ACT. (2) Increased early childhood programming capacity building. Across the two years, the total Local and Other Federal categories decreased. Total EBP for ESMI and State Hospital Expenditures increased.
7A	Table 7A Total CSC-EBP for FEP expenditures increased dramatically as we have ramped up from one to four sites.
12, 16	Tables 12 and 16 use the CLD data this year; change in methodology.
14A	Two possible changes account of the increases from 2017: (1) we updated our SMI/SED definitions; (2) some of the MH-CLD BCI dataset presented with changes in race. We are investigating why race changes are occurring in our MHIS system.
15	The increase in the number of clients that were in jail/correctional facility is a result of incorporating more program treatment services in our MHIS database in the last year. Similarly, we are now collect homeless/shelter status from more programs which has a resulted in an increase in the number of clients that were homeless/in shetlers.
21	Includes all MN psychiatric inpatient hospitals (prior year did not.)
