What populations are reported? All Clients Number of States Reporting All Clients: 49 Number of States Reporting Some Clients: 9

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
MS	Yes	Yes	-	-	ADT or record update every 365 days
US	42	29	4	5	27

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Age Age as of 12/31/2017

Gender None

Overall This table has been populated from MHTEDS data. The data source, methodology, and basic assumptions used in populating may account for significant differences from earlier.

Mississippi

URS Table Number	General Notes
6	Regarding the changes from 2017 to 2018 in the total number of consumers served in community programs at the beginning of the year, the total number of admissions to residential treatment centers and the LOS for adults in a SPH for less than one year at the end of the year: the data was reported as received. There were no code changes with the 2017 and 2018 data submitted.
7	Estimate for Medicaid funding included in the Ambulatory/Community Non-24-Hour Care category. Other Federal Funds includes an estimate for Medicare (not readily available) of \$4M. For the FY18 reporting, the Non-24 hour care expenditures include Prevention expenditures. This accounts for the 2018 decrease in Primary Prevention (from 2017) and the 2018 increase in Non-24 hour care expenditures. In FY17, the DMH Programs had separate budgets. Specialized Treatment Facility and Central Mississippi Residential Center has budgets and those expenditures were posted in the 24-hour care line item in Table 7 for FY17. In FY18, the DMH state budget was cut \$19,000,000. In order to absorb that type of budget cut, DMH did a reorganization of the Mental Health programs and consolidated budgets. In FY18 data submission, Specialized Treatment Facility and Central Mississippi Residential Center's expenditures were included in the FY18's State Hospital expenditures so there are no 24-hour care line items. Total Administration Expenditures were lower in 2018 due to a 19 million budget cut.
7A	DMH added additional PACT teams and additional Navigate teams which increased the amounts from 2017 to 2018.
8	There was a decrease in the amount spent in FY18 of \$22,344 related to personal outcome measures for one provider. There was an increase of \$62,357 in Training and Education related to an additional subgrant to Hinds Behavioral Health, and more being spent by NAMI on training during FY 18. The result is a net increase of \$40,013.
6	Another initiative this past year was to divert individuals from State Facilities to Community Mental Health Centers. The State struggles with getting discharge data from our community mental health centers. This can account for the change in length of stay calculation.
16	There is a lower number in Therapeutic Foster Care due to the Mississippi Child Protection Services agency focusing to place children in permanent homes versus foster care.
5A	The changes in number of clients on Medicaid are due to more accurate data for medicaid and non medicaid clients served. The total of medicaid and non medicaid for 2017 and 2018 only differ by 4,000+ which is an overall lower percentage change for the 2 years.
14A	The changes in the number of multi-racial consumers with SMI/SED is because more accurate data was reported and submitted.
15	The changes in the number in jails/correctional facilities is because more accurate data was reported and submitted.
16	Regarding the change in the total number of adults with SMI, the data was reported as received. There were no system code changes with the 2017 and 2018 data submitted. Regarding the change in the total number of children with SED, more accurate data was reported and submitted.
