Notes:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age None
Gender None
Overall None

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2017

Montana

Reporting Period: 7/1/2016 To: 6/30/2017

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	100.0%	72.0%	71.0%	54
Percent of Children served through the SMHA who meet the Federal definition for SED	100.0%	70.9%	68.0%	54

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	27.0%	25.4%	23.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	4.0%	6.2%	4.0%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	27.0%	23.3%	21.0%	53
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	4.0%	5.1%	3.0%	53

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Co-occurring disorders were based on MH clients with a SA diagnosis in paid claims. When adding clients with a reported SA problem from Recovery Markers, 72-hr, and MHSP, the % with a SA problem increases to 30% for adults and remains at 4% for children. Increase in FY17 SA may be due to obtaining data from more sources and improved data collection.

State Notes

See General Notes.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table3 and 6.

Table 3 State Notes:

Age	None
Overall	PRTF generally serves clients under age 18; some clients turned 18 after the 12/31 fiscal year midpoint date on which their reported age is based. Community programs includes clients served in institutions under the justice system (N=456)
Gender	None

Table 6 State Notes:

Hospital	Montana State Hospital only serves patients under 18 for forensic commitments, resulting in a very small n for children.
Other Inpatient	Increase in Other Psych Inpt may be due to an increase in educating providers to utilize community services first, before utilizing state hospital.
Residential	PRTF generally serves clients under age 18; some clients turned 18 after the 12/31 fiscal year midpoint date on which their reported age is based.
Community	None
Overall	None

* Reported under Hispanic Ethnicity.

Forensics included in "non forensic" data? No

Note:

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

State Notes:

The percent increase in forensic readmissions is likely due to a low n.

Montana

URS Table Number	General Notes
9	Increase in Functioning for youth may be due partly to a larger sample size (934 in FY17 vs. 348 in FY16). MT will ask follow-up questions on next MHSIP survey to allow youth/families to explain to what they attribute changes in functioning.
11	Increase in Outcomes for youth may partly be due to larger sample size. MT will ask follow-up questions on next MHSIP survey to allow youth/families to explain to what they attribute changes in outcomes. Increase in Outcomes for Adults may be due partly to larger sample size in FY17. MT will ask follow-up questions on next MHSIP survey to allow adults to explain to what they attribute changes in outcomes.
12	Co-occurring disorders were based on MH clients with a SA diagnosis in paid claims. When adding clients with a reported SA problem from Recovery Markers, 72-hr, and MHSIP, the % with a SA problem increases to 30% for adults and remains at 4% for children. Increase in FY17 SA may be due to obtaining data from more sources and improved data collection.
14A/B	Administrative Rules of Montana (ARM) - definition of SDMI: 37.86.3503 Case Management Services for Adults with Severe Disabling Mental Illness: (1) "Severe disabling mental illness" means with respect to a person who is 18 or more years of age that the person meets the requirements of (1)(a), (b), or (c). The person must also meet the requirements of (1)(d). The person: (a) has been involuntarily hospitalized for at least 30 consecutive days because of a mental disorder at Montana State Hospital within the past 12 months; or (b) has recurrent suicidal ideation within the past 12 months, a history of suicide attempts, or a specific plan for completing suicide; or (c) has a primary diagnosis of one of the following (excluding "mild, not otherwise specified (NOS)," unspecified, or due to "physiological disturbances and physical factors"): (i) schizophrenia, delusional disorder, schizophreniform disorder, schizoaffective disorder; (ii) bipolar I disorder and bipolar II disorder; (iii) major depressive disorder; (iv) panic disorder with agoraphobia or panic disorder without agoraphobia; (v) obsessive-compulsive disorder; (vi) posttraumatic stress disorder; (vii) borderline personality disorder; or (viii) autism spectrum disorder; and (d) has ongoing functioning difficulties because of the mental illness for a period of at least six months or for a predictable period over six months, as indicated by the presence of at least three of the following indicators: (i) a medical professional with prescriptive authority has determined that medication is necessary to control the symptoms of mental illness; (ii) an inability to care for personal needs, e.g., meals, bathing, dressing, and daily chores, due to mental illness; (iii) an inability to maintain competitive employment or education process due to mental illness; (iv) an inability to sustain interpersonal relationships due to mental illness; (v) the person has been determined to be disabled due to mental illness by the social security administration; (vi) the person maintains housing only with ongoing supervision, is homeless, or is at imminent risk of homelessness due to mental illness; or (vii) the person has had or will predictably have repeated episodes of decompensation.
14A/B	SED youth are determined by the diagnoses listed in "MT Children's Mental Health Bureau" (August 6, 2016) and ARM 37.87.903. Although there are also "functional impairment" and annual reassessment requirements to qualify for SED, only primary diagnosis and age were used to determine SED for the FY17 URS Tables due to data access limitations. In FY17, SED was based on youth ages 6-17 who met one of the following primary ICD-10 diagnoses: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.9, F25.0, F25.1, F25.8, F31.12, F31.13, F31.2, F31.32, F31.4, F31.5, F31.62, F31.63, F31.64, F31.73, F31.75, F31.77, F31.81, F31.89, F32.1, F32.2, F32.3, F32.4, F33.1, F33.2, F33.3, F33.41, F34.0, F34.1, F34.8, F41.0, F41.1, F93.0, F42, F43.10, F43.11, F43.12, F94.1, F94.2, F44.81, F50.01, F50.02, F50.08, F63.81, F64.1, F64.2, F64.8, F84.0, F90.0, F90.1, F90.2, F91.3
15	The private residential population of our clients is under-represented due to limitations that currently exist in our data systems.
15	Montana's percentages in jail and institutional settings appear over-represented due to current limitations in our private residential data reporting system. The private residential population of our clients is under-represented due to limitations that currently exist in our data systems.
