

**Table 8.22A Received Substance Use Treatment at a Specialty Facility and/or Mental Health Services in Past Year among Persons Aged 18 or Older, by Past Year Co-Occurring Substance Use Disorder and Level of Mental Illness and Age Group: Numbers in Thousands, 2017 and 2018**

<b>Co-Occurring Substance Use Disorder (SUD) and Level of Mental Illness/Age Group</b>	<b>Received Substance Use Treatment (SU Tx) at a Specialty Facility OR Mental Health (MH) Services (2017)</b>	<b>Received Substance Use Treatment (SU Tx) at a Specialty Facility OR Mental Health (MH) Services (2018)</b>	<b>Received SU Tx at a Specialty Facility BUT NOT MH Services (2017)</b>	<b>Received SU Tx at a Specialty Facility BUT NOT MH Services (2018)</b>	<b>Received MH Services BUT NOT SU Tx at a Specialty Facility (2017)</b>	<b>Received MH Services BUT NOT SU Tx at a Specialty Facility (2018)</b>	<b>Received SU Tx at a Specialty Facility AND MH Services (2017)</b>	<b>Received SU Tx at a Specialty Facility AND MH Services (2018)</b>
<b>SUD and Any Mental Illness</b>	4,343	4,709	372	303	3,255 <sup>a</sup>	3,758	704	645
18-25	1,108	1,067	83	49	874	924	150 <sup>a</sup>	90
26 or Older	3,235	3,642	289	254	2,381	2,834	555	555
26-49	2,298	2,481	213	127	1,664	1,942	410	412
50 or Older	938	1,162	76	*	716	892	145	143
<b>SUD and Serious Mental Illness</b>	1,979	2,197	80	84	1,534	1,767	365	345
18-25	561	529	13	14	461	464	86	51
26 or Older	1,418	1,668	67	71	1,073	1,303	279	295
26-49	1,036	1,157	54	33	751	888	232	237
50 or Older	*	*	*	*	*	*	*	*

\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Specialty facilities for substance use treatment include hospitals (inpatient only), rehabilitation facilities (inpatient or outpatient), or mental health centers.

NOTE: Mental Health Services for adults includes inpatient treatment/counseling, outpatient treatment/counseling, or use of prescription medication for problems with emotions, nerves, or mental health. Respondents with unknown mental health service information were excluded.

NOTE: Mental Illness aligns with DSM-IV criteria and is defined as having a diagnosable mental, behavioral, or emotional disorder, other than a developmental or substance use disorder. Estimates of serious mental illness (SMI) are a subset of estimates of any mental illness (AMI) because SMI is limited to persons with AMI that resulted in serious functional impairment. These mental illness estimates are based on a predictive model and are not direct measures of diagnostic status.

<sup>a</sup> The difference between this estimate and the 2018 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

Definitions: Measures and terms are defined in Appendix A.
