

# Nebraska 2017 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	7,524,119	11.50	23.00	58
Community Utilization per 1,000 population	7,318,598	10.37	22.37	58
State Hospital Utilization per 1,000 population	131,633	0.25	0.40	54
Other Psychiatric Inpatient Utilization per 1,000 population	446,562	1.71	1.61	39

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	699,316	56.6%	43.8%	57
Employed (percent with Employment Data)**	699,316	31.2%	20.9%	57

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	66.6%	78.7%	49

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	57.0%	73.1%	46

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	6,829	0.0%	8.3%	50
State Hospital Readmissions: 180 Days	15,719	13.5%	19.2%	52
State Hospital Readmissions: 30 Days: Adults	6,323	0.0%	8.6%	49
State Hospital Readmissions: 180 Days: Adults	14,441	13.5%	19.6%	51
State Hospital Readmissions: 30 Days: Children	450	0.0%	6.3%	16
State Hospital Readmissions: 180 Days: Children	1,158	0.0%	16.1%	20

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,115,700	82.0%	82.7%	58
Homeless/Shelter	210,479	10.2%	4.2%	54
Jail/Correctional Facility	86,943	4.4%	1.7%	53

Adult EBP Services	U.S.	State	U.S. Rate	States
Supported Housing	89,414	7.4%	3.0%	35
Supported Employment	62,596	6.1%	2.0%	41
Assertive Community Treatment	74,032	0.7%	2.1%	41
Family Psychoeducation	35,658	-	2.8%	15
Dual Diagnosis Treatment	237,513	4.1%	11.7%	28
Illness Self Management	318,831	-	20.0%	22
Medications Management	554,087	46.0%	34.6%	22

Child/Adolescent EBP Services	U.S.	State	U.S. Rate	States
Therapeutic Foster Care	9,728	-	1.2%	21
Multisystemic Therapy	26,180	0.2%	3.8%	17
Functional Family Therapy	24,574	-	4.6%	15

Change in Social Connectedness	State	U.S. Rate	States
Adult Improved Social Connectedness	64.8%	78.8%	48
Child/Family Improved Social Connectedness	79.3%	87.2%	46

\*Denominator is the sum of consumers employed and unemployed.

\*\*Denominator is the sum of consumers employed, unemployed, and not in labor force.

**Note:**

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2016

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

**Table 2a**

Age Age is calculated at midpoint of the reporting period  
 Gender The most recent gender was used for reporting  
 Race The most recent race was used for reporting. Race not available includes clients identified as 'other race' (n=550)  
 Overall See General Notes

**Table 2b**

Age Age is calculated at midpoint of the reporting period  
 Gender The most recent gender was used for reporting  
 Race The most recent ethnicity was used for reporting  
 Overall See General Notes

## Note:

This table uses data from URS tables 5a and 5b.

## Type of Medicaid Data Reported

Data based on Medicaid Eligibility, not Medicaid Paid Services.

People Served by Both includes people with any Medicaid

## State Notes

5a Age The most recent race data was used for reporting.

5a Gender The most recent gender was used for reporting.

5a Overall Based on Insurance Status and Medicaid Status fields. Medicaid status was reported for the most recent admission date within the fiscal year.

5b Overall Based on Insurance Status and Medicaid Status fields. Medicaid status was reported for the most recent admission date within the fiscal year. This is the same population as presented in Table 5a distributed by ethnicity.

**Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table3 and 6.

**Table 3 State Notes:**

Age Age is calculated at midpoint of reporting period  
 Overall Clients who received services in more than one setting are duplicated between rows. Consumer ID, which is a unique value assigned to each person served, was used for unduplication  
 Gender The most recent gender was used for reporting

**Table 6 State Notes:**

Hospital Includes all individuals admitted to a State Regional Mental Health Center (forensic and non-forensic).  
 Other Inpatient Includes clients admitted to one of the psychiatric inpatient hospitals within Nebraska, other than a State Regional Mental Health Centers.  
 Residential None  
 Community Includes clients receiving outpatient services at a State Regional Mental Health Center or clients receiving services at a community provider.  
 Overall For clients without a discharge date, length of stay was calculated using June 30, 2017 as a 'discharge date'. Also see General Notes.

## Nebraska

URS Table Number	General Notes
All	Individuals included in this reporting are those who were served in a mental health or dual service during fiscal year (FY) 2017 through the Nebraska DHHS Division of Behavioral Health (DBH). This report does not include individuals served through Medicaid funding. In FY16, DBH and the Nebraska Behavioral Health System (NBHS) changed data systems for collection of service and treatment data, converting from a vendor-operated system to a new Centralized Data System (CDS) hosted by DHHS-DBH. Data clean up during data migration, new data entry specifications for collection of key fields (including, but not limited to SSN, DOB) and quarterly alerts to prompt providers to review and update other client fields (for example, employment, living status, criminal justice involvement, pregnancy status) have resulted in improved reporting and the accuracy of deduplication. In addition, consistency has improved due to quarterly trainings for providers' super users on system updates and due to the creation of a library of recorded video trainings for users.
All	DBH uses unique Consumer ID's to identify clients and deduplicate client encounters/records. As a result of comparison between original URS data counts described (N=22,196) and counts from MH CLD files submitted quarterly (N=22,188), it was uncovered that consumer ID updates had not been submitted with quarterly files in a consistent manner as they were saved within the actual data system creating a difference in counts and inability to match some client records across the two data sources. It was ultimately decided in partnership with Eagle to use the records in which a client level match could be confirmed between the two sources. The final URS data count was used by DBH and Eagle to re-reun analysis for FY17 (N=21,927). This final data set is described across the URS tables in this submission. Because this represents at most only 1.2% undercounting of consumers served, counts and percentages presented in this report are not significantly impacted.
All	DBH uses unique Consumer ID's to identify clients and deduplicate client encounters/records.
5A	The population for Table 5a is the same population represented in Table 2a. The DBH, which is the state mental health authority (SMHA), does not operate Medicaid in Nebraska, therefore the individuals represented in Table 5a do not include all Medicaid Mental Health funded individuals. It should also be noted that DBH no longer provides a portion of the funding for Medicaid mental health services. This change from two funding sources to one funding source has resulted in a decrease in the number of individuals served who are directly reported to the DBH.
6	This table represents the turnover of the clients shown in Table 2a. Total Served at Beginning of Year (unduplicated): This population includes clients with admission dates before July 1, 2016 and who were discharged after July 1, 2016, or were not discharged. Clients are unduplicated. Admissions During the Year (duplicated), the population was limited to records with admission date which occurred between July 1, 2016 and June 30, 2017. All unique admission dates were counted for each service type. Discharges During the year (duplicated), the population was limited to records with discharge date which occurred between July 1, 2016 and June 30, 2017. All unique discharge dates were counted for each service type. Length of Stay (in Days): Discharged Patients, the population was limited to those persons included in the previous column. Mean and Median number of days was calculated by subtracting the Admission date from the Discharge date of each record. For Clients in Facility for Less than 1 Year: Average Length of Stay (in Days): Residents at end of year: the population was limited to persons who were admitted between July 1, 2016 and June 30, 2017, and did not have a discharge date. Length of stay was calculated as follows: (June 30, 2017-Admission Date). For Clients in Facility More than 1 Year: Average Length of Stay (in Days): Residents at end of year: the population was limited to persons who were admitted prior to July 1, 2016, and did not have a discharge date. Length of stay was calculated as follows: (June 30, 2017-Admission Date).
6	The increase from FY2016 to FY2017 in Number of Consumers Served in Community Programs is believed to primarily be due to improved data collection. Beginning July 2016, the SMHA began requiring providers to enter services into the Centralized Data System that were not previously required to be entered. This was done to more accurately reflect the number of persons served.
6	The increase in consumers served in and admitted to residential treatment centers is due to revision of who is included in the count. Previously only adolescents admitted to one of the adolescent psychiatric units at a state psychiatric hospital had been included; however, upon further review of the definition for residential treatment it was determined that all residential centers for treatment, youth and adult, should be included. This change resulted in an increased count of both individuals served and admitted to residential treatment centers.
6	The increase in ALOS for adults in the state hospitals category is likely the result of discharges in FY2017 for patients with complex cases who had very long lengths of stay. Through the development of individualized plans to address their complex needs, patients were discharged to appropriate community-based services and supports.
7	Medicaid funding contains \$6,483,557 of state funds used in MOE calculations.

URS Table Number	General Notes
8	TA activities related to training for bringing up Coord Spec Care related to First Episode Psychosis (FEP) resulted in additional expenditures in 2016.
9	DBH drew a stratified random sample of individuals who received services from community mental health and/or dual providers for the second half of Calendar Year (July to December 2016). The sample drawn was used to conduct the annual consumer survey for youth and for adults.
11	This is the same SAMPLE as presented in Table 9SC distributed by the rest of 5 domains.
12	The Percent of adults meeting Federal definition of SMI represents the total number of adults (18 and above) found in Table 14A (SMI population) divided by the total number of adults (18 and above) found in Table 2A (Total MH population served). See Table 14A note for SMI definitions. Percentage of children/adolescents meeting Federal definition of SED represents the total number of children/adolescent (3-17years old) found in Table 14A (SED population) divided by the total number of children/adolescent (3-17 years old). See Table 14A comments for SED definitions. It should be noted that the state's FY16 definitions for SMI and SED include additional parameters for inclusion in that a diagnosis is now expected to accompany the other indicators, unless the provider specifically identifies the individual meets SMI or SED criteria.
12	The Percentage of adults served by the SMHA who also have a diagnosis of substance abuse includes individuals in the reporting population who also 1) have an indicated Substance Use Disorder diagnosis and/or 2) have also received treatment for a Substance Use Disorder in FY16 and/or 3) received treatment in a dual diagnosis program. This count is then divided by the total number of Adults in the population. It includes the children/adolescent population served by SMHA who also 1) have an indicated Substance Use Disorder diagnosis and/or 2) have also received treatment for a Substance Use Disorder in FY16 and/or 3) received treatment in a dual diagnosis program. This count is then divided by the total number of children/adolescents in the population.
12	Percentage of adults meeting Federal definition of SMI who also have a diagnosis of substance abuse includes those in the population who meet the Federal definition for SMI and meet the substance use disorder and / or dual criteria (as described in comment 11). This count is then divided by the total number of adults with SMI in the population (Table 14A). Percentage of children/adolescents meeting the Federal definition of SED who also have a diagnosis of substance abuse problem includes those in the population who meet the Federal definition for SED and meet the substance use disorder and / or dual criteria (as described in comment 11). This count is then divided by the total number of children/adolescents with SED in the population (Table 14A).
12	The decreases from FY2016 to FY2017 in the percent of children and adults served by the SMHA with co-occurring MH/SUD diagnoses is believed due to a change in process for data collection. First, the description of clinical presentation is now reliant on data entry from the provider without assistance from an Administrative Service Organization (ASO) for higher level authorized services. Previously, Magellan (acting as a contracted ASO) helped ensure inclusion of all diagnoses regardless of whether they related directly to the service expectations. The current data system and electronic authorization process allows entry of both MH and SUD diagnoses; however, only requires providers to include diagnoses directly related to the service expectations and authorizations in order to gain an automatic authorization approval through the data system. Work is underway to address the need for providers to capture all behavioral health diagnoses a person is presenting with at the time of service, regardless of service type. In addition to this and as previously mentioned in comment 6, more service providers are now required to enter consumer data into the data system. Many of these services focus less on clinical disposition and diagnosis and thus would be less likely to include diagnoses beyond those required for the service type (e.g. Supported Employment, Supported Housing, Peer Support, and Recovery Support).

URS Table Number	General Notes
14A	<p>This table represents the distribution of the adult SMI and children/adolescent SED population. This population is a subset of the population presented in Table 2A. See note 4 for more information. NE State SMI Definition: Client is age 18 or older AND has at least one of the following ICD-10 diagnoses: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89 AND meets at least one of the following criteria: GAF score less than 60; indicated functional deficit; is SSI/SSDI eligible or potentially eligible; was admitted to Community Support, Assertive Community Treatment, Psychiatric Residential Rehabilitation, Day Treatment, Day Rehabilitation, Day Support, Vocational Support, or related psychiatric rehabilitation services OR Client is age 18 or older AND Provider selected YES for Meets SMI Criteria. NE State SED Definition: Client is age 3-17 years AND has at least one of the following ICD-10 diagnoses: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89, 300.01, 300.21, 300.3, 301.13, 307.1, 307.23, 307.51, 309.81, 312.34, 314, 314.01, 314.1, 314.2, 314.8, 314.9, F40.01, F41.0, F42, F43.10, F43.11, F43.12, F44.89, F50.00, F50.01, F50.02, F50.2, F63.81, F90.0, F90.1, F90.2, F90.8, F90.9, F95.2 AND meets at least one of the following criteria: is SSI/SSDI eligible or potentially eligible; was admitted to Professional Partner Services, Special Education Services, Day Treatment, Intensive Outpatient, Therapeutic Consultation/School Wrap, or Respite Care OR Client is age 3-17 years AND Provider selected YES for Consumer Meets NE SED Criteria</p>
15	<p>In addition to the overall increase in consumer data collected in FY2017, it is believed that the increase from FY2016 to FY2017 in the number of consumers whose living arrangements were Jail/Correctional Facility and Homeless/Homeless Shelter is due to the SMHA and State Behavioral Health Regions holding several trainings for providers about using the Centralized Data System during which the importance of selecting and updating consumer fields was underscored, particularly for key fields related to National Outcomes Measures.</p>
16	<p>The decrease from FY2016 to FY2017 in the number of children with SED is due to the exclusion of young adults ages 18-20 from the FY2017 count. In the FY2016 report, young adults ages 18-20 were included in both the count of Children with SED and Adults with SMI. For FY2017, Children with SED is the same child/adolescent population found in Table 14a; adults with SMI served is the same adult population found in Table 14A.</p>
17	<p>Receiving Integrated Treatment for Co-occurring Disorders (MH/SA) represents individuals listed as receiving treatment in a dual-diagnosis program service use records. It is believed that the continued increase in the number of consumers receiving Integrated Dual Dx Services is due to a multi-year statewide initiative to improve the identification of individuals with dual diagnoses through provider training and referral processes.</p>
