Notes:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age	None
Gender	None
Overall	None

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2017

New Jersey

Reporting Period: 7/1/2016 To: 6/30/2017

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	38.4%	72.0%	71.0%	54
Percent of Children served through the SMHA who meet the Federal definition for SED	38.9%	70.9%	68.0%	54

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	22.5%	25.4%	23.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	2.8%	6.2%	4.0%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	20.8%	23.3%	21.0%	53
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	3.6%	5.1%	3.0%	53

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

There are two steps to identifying co-occurring clients in our USTF database: 1. Do they meet the SMI requirement of a GLOF of 0-5? 2. Do any of the following areas in the database indicate drug or alcohol abuse: a. Referral Source (e.g. from Alcohol & Drug Treatment Program); b. Past Services History; c. Current Services Involvement; d. Non-Mental Health Needs; e. Primary Problems. If both criteria are met, then the consumer is coded as a co-occurring client.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table3 and 6.

General Notes FY 2017**New Jersey**

URS Table Number	General Notes
3, 6	State hospital data in Tables 3 and 6 are from DMHAS's Hospital Census (Oracle) database whereas that in Table 2a is from the USTF client registry.
6	The decrease in Total Admissions to State Hospital During the Year from last year is due to Olmstead Initiatives in New Jersey, the admissions to state hospitals have steadily decreased.
6	The increase in total Admissions to Other Psychiatric Inpatient During the Year from last year is due to many agencies did not report their FY2016 numbers. After following up with the agencies, many more agencies reported FY 2017 data.
8	The decrease in the total MHBG Expenditures for Non-Direct Services activities is because the staffing cost decreased.
9, 11, 11a, 19	SAMHSA approved an extension request by New Jersey for completing URS tables 9, 11, 11a, and 19. These tables have the Adult Consumers Survey components. SMHA will update these tables as soon as the information becomes available.
10	Reported MHBG funds are for both children and adults but cannot be broken down by funds expended on adults with SMI and children with SED.
15a	State hospital data in Table 15A is from DMHAS's Hospital Census (Oracle) database.
16	The total number of consumers receiving Therapeutic Foster Care services during FY2017 was zero. This number was correct. The reason that there were 494 consumers receiving Therapeutic Foster Care services in FY2016 is an older definition was utilized. Until SFY 2016, Children's System of Care (CSOC) utilizes "treatment homes" which are similar to, but not the same as/equivalent of, therapeutic foster care. The treatment homes do not meet criteria for fidelity to the TFC model – therefore although youth residing in treatment homes receive wraparound supports and treatment services, CSOC no longer records youth as receiving TFC model.
19A	The small number of adult data reported in this table was collected by Children's System of Care in Children's Consumers Survey. SMHA will report the adult data separately when the Adult Consumers Survey is administered.
21	SMHA does not collect readmission data on other psychiatric units than those in state psychiatric hospitals.
