**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

If individuals received a DBHR funded substance abuse service of any type during the reporting year; we consider that evidence of a substance abuse problem. Since they also have a mental health problem (because they received a mental health service), they are counted as having a co-occurring substance use disorder and mental health disorder.

**State Notes:**

We paid about \$2.6 million more against the MHBG in SFY17 than we did in SFY16, which is reflected in both our direct and non-direct expenditures. Reasons for the higher amount is related to contracts being de-obligated and re-obligated across state fiscal years, as well as the timing of bill payments. Payments are impacted by slow billing from providers/vendors at fiscal year-end (multiple months of billings not submitted before June 30th), as well as a backlog of billings not paid before the fiscal year ends.

## Washington

URS Table Number	General Notes
4	The increase in unemployed is possibly due to continued impact of Medicaid expansion—a greater number of employed Medicaid enrollees were in services due to the broader income allowances for new eligible.
8 &10	The change in total MHBG expenditures for non-direct services is related to contracts being de-obligated and re-obligated across state fiscal years, as well as the timing of bill payments.
12	Contributing factor for the decrease in the percent of children with co-occurring disorders would be due to the implementation of DSM 5. DSM 5 does not use multi-axial diagnoses. The data set from BHOs would only contain the primary MH diagnosis. Co-occurring would be captured if youth were open in both a SUD program and an MH program. With movement of SUD into the BHOs, review of co-occurring diagnoses would be more rigorous, since the MH diagnosis would also have to be of sufficient severity/acuity to meet the Access to Care Standards. Additionally, there could have been a fall-off in reporting as SUD and MH providers became accustomed to new reporting requirements for native transactions. This would have been a much bigger change for SUD providers.
14A	With BHO implementation and focus on new roll out of BHDS and its data rules, the state has been much more vigilant in reminding BHOs to keep their data current and accurate. (remember that the RSN/BHO group stopped meeting for several years before BHO implementation). For the last 16 months we have met with BHOs on a monthly basis to focus on native transaction submission, completeness and timeliness.
15	Change is due to more accurate reporting and greater sensitivity with provider network on identifying and responding to homelessness. DBHR has multiple ongoing pilot project and grants focusing on supportive living and supported independent living. As a result of participating in these projects, BHOs have become more aware of, and better able to identify homelessness—they also now see greater value in reporting it to the data set—recognition of the severity of the problem has yielded resources to help resolve homelessness.
16	Increase in individuals receiving PACT is due to legislator adding funds for PACT teams each year. We have also changed the PACT Program ID code in BHDS. Initially, we only used that Program Identifier for the 11 original teams. Full implementation of those teams was tied to ward closures at the state hospitals. Last year we decided to fold in the other PACT teams to that Program ID, since some BHOs were confused about how to report on their new teams.
