Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Note:

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

Table 6 State Notes:

Hospital	None
Other Inpatient	None
Residential	None
Community	None
Overall	None

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2019

Alabama   **Reporting Period:** 10/1/2018 To: 9/30/2019

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	91.2%	71.4%	73.0%	56
Percent of Children served through the SMHA who meet the Federal definition for SED	97.6%	70.8%	75.0%	55

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	16.2%	27.6%	25.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	1.1%	7.2%	3.0%	54
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	15.7%	27.9%	25.0%	55
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.1%	8.6%	4.0%	53

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Primary ICD 10 Diagnosis and Primary ICD 10 Substance Abuse Diagnosis are captured in the DMH Central Data Repository for each client served. If the client has a diagnosis in both of these fields, the client is counted as having a co-occurring disorder.

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
AL	Yes	-	-	-	Annually
US	43	30	3	7	26

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Alabama

URS Table Number	General Notes
2A/B, 3, 4, 4A, 5A/B, 14A/B, 15, 15A, 20A/B	This is Alabama's seventh year of reporting Client Level Data.
3	Since 2010, Alabama has had a downward trend in patients served in state psychiatric hospitals, with 2019 being the lowest year in URS reporting. As outlined in the SAMHSA MH Block Grants over these years, ADMH closed 3 longstanding state hospitals, 2 (Searcy and Greil) at the end of 2012 and 1 (NARH) in April 2015. To close these hospitals, efforts were in place to downsize each of the hospitals that allowed the closures to occur. In December 2016, we implemented a statewide care coordination staffing process between the state hospitals and the community providers to assist with transitional care from state hospitals to community discharge.
6	The decrease in total admission to other psychiatric inpatient during the year is due to several natural patterns of psychiatric care that includes the following: longer lengths of stays by individuals in the beds; change in inpatient hospital partners which meant periods of time when beds were not accessible; and workforce issues such as when vacancies occur, certain rules and regulations require bed diversion.
7	The 21% increase in total MHBG expenditures is due to carryover of block grant funds. The 186% increase in total other funds expenditures is due to recognizing Medicare revenues in the state hospitals. This accounted for all but less than 10% which would be due to smaller federal grants. The 22% increase in other 24-hour care expenditures is due to a forensic lawsuit which added $7 million to residential care.
7A	The $70,000 increase is due to the mandatory FEP program. We are trying to reach the goal of approximately $1 million.
12	Even though the percentages seem high, the numbers served are closer than the percentage implies. Also, FY17 data is more similar to FY19. The treatment of Co-Occurring individuals had no changes with programs and services. This decrease must be linked to natural patterns of service access.
14A	SMI Definition: Person who meets the diagnosis and disability criteria or who meet the criteria for high risk. Disability Criteria (must meet at least 2 criteria plus diagnosis criteria). (1) Is unemployed, is employed in a sheltered setting or has markedly limited skills and a poor work history. (2) Shows severe inability to establish or maintain personal social support systems. (3) Shows deficits in basic living skills. (4) Exhibits inappropriate social behavior. High Risk (must meet one of the criteria). (1) History of DMH/MR supported inpatient or public residential treatment as a result of an Axis I Mental Illness diagnosis. (2) Person would become at imminent risk of needing inpatient hospitalization without outpatient intervention.
14A	SED Definition: Person must meet the diagnosis criteria and Separation from Family or meet diagnosis criteria and Functional Impairments/Symptoms/Risk of Separation Criteria.
