\* = low precision; -- = not available; da = does not apply; nc = not comparable due to methodological changes; nr = not reported due to measurement issues.

NOTE: Mental health services for persons aged 12 to 17 includes treatment/counseling for emotional or behavioral problems not caused by drug or alcohol use. Respondents with unknown mental health service information were excluded.

NOTE: Respondents could indicate multiple service settings; thus, the response categories are not mutually exclusive.

<sup>a</sup> The difference between this estimate and the 2019 estimate is statistically significant at the .05 level. Rounding may make the estimates appear identical.

<sup>1</sup> Includes treatment/counseling received as outpatient care (e.g., care from a private therapist, psychologist, psychiatrist, social worker, or counselor; mental health clinic or center; partial day hospital or day treatment program; or in-home therapist, counselor, or family preservation worker) and inpatient or residential care (e.g., an overnight care in a hospital or residential treatment center).

<sup>2</sup> Includes treatment/counseling from a school or juvenile justice mental health service provider, a medical doctor, or services received in foster care.

<sup>3</sup> Respondents who did not report their school enrollment status, who reported not being enrolled in school in the past 12 months, or who reported being home-schooled were not asked about receipt of mental health services from this setting; however, respondents who reported not being enrolled in school in the past 12 months were classified as not having received treatment/counseling from this setting.

Definitions: Measures and terms are defined in Appendix A.
