URS Table Number	General Notes
3	Several factors may have played a role in the decrease in the number of people served in state psychiatric hospitals. NDSH closed a unit for isolation due to COVID, their overall bed count reduced and they were able to complete some court ordered assessments via telehealth as opposed to a hospital admission.
5A	The information on the number of people receiving services from non-Medicaid funded sources only and the number of people receiving services from both non-Medicaid and Medicaid funded sources comes from peoplesoft.
6	Based on best practice redesign there is an increase in community outreach which has led to an increase in the number of clients served in the community.
7	The decrease in expenditures from MHBG, Medicaid, local funding, and other sources as well as state psychiatric hospital expenditures and the increase in administration expenditures is due to the timing of expenditures across the department. In addition, NDSH paid off a loan early as a one time expense.
7/7A	The decrease in expenditures for CSC for FEP is due to one FEP provider no longer providing services.
8	ND was growing its peer support workforce across the state. This increase in non-direct service activity expenditures was to train those peer support providers.
14A	We are unsure as to what would have accounted for the increase in American Indian/Alaska Native clients with SMI/SED.
15	Telehealth expanded across all services including in jail/correctional facilities. Due to telehealth being a location, that would be the identified location when the service is provided in these settings which is likely impacting the number of clients living in jail/correctional facilities and those who were homeless. We are looking at the set up of location to make sure we are accurately accounting for both telehealth and services in jail/correctional facility.
16	ACT and multisystemic therapy were added to the progress notes in the new EHR for staff to be able to account for the services that they are providing. Also, contracted services for supported employment was expanded and therefore would not then fall under an in-HSC intervention.
17	IDDT had been included in progress notes in the new EHR for staff to be able to account for the services but was removed. Illness management and Recovery was added to the best practice list of the progress notes. The family psychoeducation and medication management are collected by provided services.
