Note:
Are Client Counts Unduplicated?

Unduplicated

Number of States with Unduplicated Counts 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

General Notes FY 2020**Utah**

URS Table Number	General Notes
4	While the increase in the total number of consumer employed seems significant, the percent of clients employed per year is less than 1% increase from 2019 to 2020. Utah's employment figures moved up year-to-year but we are closely aware of possible impacts due to COVID.
5A	Utah does see a small percent variation in the number of consumers receiving both Medicaid and non-Medicaid funded services (only 2% increase year-to-year). As Utah continues the process of Medicaid expansion we continue to monitor which is data variability and which is attributed to expansion.
6	The increase in LOS for adults in the state hospitals for less than one year, resident at the end of the year are a result of late admissions in 2019.
7	Total Medicaid Expenditures: it appears our local authorities were spending more on Ambulatory/Community Non-24-Hour Care. Total Medicaid Expenditures: we continue to expand Medicaid as the state recently adopted expansion. Other Funds Expenditures: we obtained other federal funding.
8	MHBG Expenditures for Non-Direct Service Activities: we continue to improve our accounting protocols to identify these costs.
15	In FY20 Utah saw a distinct client count decrease of 700 clients served (ever) in jail but a total client count increase. This means less clients served in jail overall and I can only assume this decrease in living arrangement is accounted for that large overall drop in clients served in jail.
