Notes:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age	None
Gender	None
Overall	None

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2020

West Virginia

Reporting Period: 7/1/2019 To: 6/30/2020

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	26.7%	71.6%	77.0%	55
Percent of Children served through the SMHA who meet the Federal definition for SED	21.6%	71.1%	75.0%	55

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	33.7%	28.0%	25.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	2.3%	8.1%	3.0%	55
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	12.4%	27.4%	24.5%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	0.9%	9.6%	3.0%	54

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

All individuals with a secondary diagnosis of substance abuse are included in the calculations.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Age

Age is calculated as of January 1, 2020

Overall

During the course of an inpatient stay, an individual may be transferred to another facility. The facility where the initial admission occurred is used to determine the service setting.

Gender

None

Table 6 State Notes:

Hospital

Age is calculated as of January 1, 2020

Other Inpatient

None

Residential

None

Community

None

Overall

Individuals under the age of 18 are not admitted to our institutions. Age is determined as of January 1, 2019. If a person's 18th birthdate is after this date their age will be calculated as if they were under 18 at the time of admission.

What populations are reported? All Clients Number of States Reporting All Clients: 44 Number of States Reporting Some Clients: 13

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
WV	Yes	Yes	-	-	Critical Service Junctures
US	36	25	3	7	25

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Age Age is caculated as of January 1, 2020

Gender None

Overall None

Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2020

West Virginia

Reporting Period: 7/1/2019 To: 6/30/2020

Diagnosis	State				Employed as a % of Labor Force		Employed as % of Known Employment Status		% of Consumers with Dx		States Reporting
	Employed	Unemployed	In Labor Force*	With Known Employment Status**	State	US	State	US	State	US	
Schizophrenia and Related Disorders	-	-	-	-	-	30.2%	-	9.9%	-	13.9%	52

West Virginia

URS Table Number	General Notes
General	WV continues to experience an expansion of where behavioral health services are provided. Historically comprehensive behavioral health centers have provided many of the direct services in the state as well as being the backbone of the state's behavioral health infrastructure. However, options are expanding in the state, this includes both out-patient for both mental health and behavioral health, and in-patient for SUD services. New providers are providing services to the SED population, funding for this transformation is occurring outside of BBH funds and are not subject to the reporting requirements of the Department.
General	Sharpe Accreditation - the loss of CMS accreditation was discussed in multiple general notes on the 2019 URS submission. Sharpe received their accreditation back from CMS effective 8/14/19.
General	COVID-19 response has impacted staff availability and resources to analyze data trends contained in the URS Tables. Many staff are tasked to emergency COVID-19 response.
General	Reviewing client data from the past 2 years, approximately 7% of clients had never had a completed a care connection ever in their history, while approximately 31% of clients had not received a care connection in the past 2 years. This has been a concern that has been repeatedly addressed with grantees, in group meetings and individually. WV BBH is actively strategizing plans to provide direct technical assistance and intervention for these deficits in data collection, including updated Memorandums of Understanding and customized training. It is believed much of this may be an issue of staff turnover in facilities and may need to be addressed through a more comprehensive approach than has been done in the past. The Covid-19 pandemic has slowed these efforts and limited or altered the way some services have been delivered which will also account for the decrease in individuals reported.
4	Employment status not required to be reported for non-Medicaid, non-Charity Care individuals. The reporting of this variable is not validated for Medicaid or Charity care clients.
6	Sharpe Accreditation - The loss of CMS accreditation was discussed in multiple general comments on the 2019 URS submission. Sharpe received their accreditation back from CMS effective 8/14/19. The transition back to accreditation may have impacted these numbers.
7	Fluctuations in expenditures may be accounted for both through reporting deficits which are being addressed, as well as a greater shifted focus towards work in prevention and evidence based practices. These trends will continue to be monitored and reviewed moving forward.
7A	In FY 2019 FEP sites were expanded from one agency to six allowing for services to be expanded statewide after training was completed, this resulted in increased expenditures in FY 2020.
9,11,11A,19A, 19B	While in prior years, administrative service organization staff members administered surveys face-to-face at service sites, this year, due to Covid19 response protocols, face-to-face sampling was not an option. In an effort to increase participation, surveys were provided by multiple means including hard copies distributed by mail and hand delivered as well as a link to the survey distributed by email, text and social media. As anticipated, on line response rates were significantly lower than prior year's face-to-face sampling.
14A	The overall reduction in number of people served may impact these measures.
16	The decrease in the total number of children with SED is believed to be related to the pandemic limiting in person services. Although telehealth services were offered during this time to provide continuity of care, the ability to provide in person services was often limited for safety reasons. Although intervention services may be provided via telehealth, further evaluation and diagnosis may be difficult through this method of delivery. This may result in management of symptoms, but limitations in confirmation and documentation of diagnoses. Programs will continue working towards expanding ability to further document SED as COVID-19 safety measures improve and infection prevalence decreases.
20A, 20B, 21	The hospitals only collect and report on a single race category and do not collect ethnicity. However, WV uses a unique identifier which goes across community and hospital data. Race, as well as ethnicity, is pulled from the unique identifier which uses race and ethnicity reported to community providers in addition to race reported to the hospital. The number of people reported as More Than One Race is due to multiple races being selected across the providers or the selection of multiple race categories within a single provider by the person. The Hispanic/Latino origins for people admitted only to a hospital is not known only the Hispanic status is reported. Regarding the large increases in 30- and 180-day readmission rates: This is most likely an artifact of our data. When a person is transferred between facilities, including going from a state hospital to a diversion hospital they are counted as a discharge from the first hospital and an admission to the second hospital. Essentially even if it is the same admission it will appear as a readmission in the data.
