

# Massachusetts 2020 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,013,396	3.59	24.58	58
Community Utilization per 1,000 population	7,801,366	3.56	23.93	58
State Hospital Utilization per 1,000 population	125,305	0.19	0.38	53
Other Psychiatric Inpatient Utilization per 1,000 population	408,959	0.12	1.47	40

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	776,983	-	47.1%	57
Employed (percent with Employment Data)**	776,983	-	23.6%	57

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	61.8%	79.6%	49

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	61.8%	74.6%	45

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	7,008	16.3%	9.2%	48
State Hospital Readmissions: 180 Days	15,085	21.2%	19.9%	49
State Hospital Readmissions: 30 Days: Adults	6,499	17.4%	9.4%	48
State Hospital Readmissions: 180 Days: Adults	13,916	22.6%	20.2%	49
State Hospital Readmissions: 30 Days: Children	509	4.8%	7.3%	16
State Hospital Readmissions: 180 Days: Children	1,169	7.1%	16.7%	19

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,199,185	83.5%	84.7%	57
Homeless/Shelter	216,731	7.6%	4.4%	52
Jail/Correctional Facility	72,275	2.4%	1.5%	51

Adult EBP Services	U.S.	State	U.S. Rate	States
Supported Housing	70,648	-	2.3%	30
Supported Employment	66,662	-	1.9%	41
Assertive Community Treatment	66,159	7.8%	1.8%	42
Family Psychoeducation	37,853	-	3.1%	16
Dual Diagnosis Treatment	199,597	-	9.5%	24
Illness Self Management	308,378	-	19.1%	22
Medications Management	545,051	-	31.3%	21

Child/Adolescent EBP Services	U.S.	State	U.S. Rate	States
Therapeutic Foster Care	13,178	0.1%	1.7%	21
Multisystemic Therapy	31,303	-	4.1%	20
Functional Family Therapy	31,817	-	5.8%	15

Change in Social Connectedness	State	U.S. Rate	States
Adult Improved Social Connectedness	71.9%	79.2%	46
Child/Family Improved Social Connectedness	81.8%	88.4%	42

\*Denominator is the sum of consumers employed and unemployed.

\*\*Denominator is the sum of consumers employed, unemployed, and not in labor force.

Male	-	-	-	-	-	44%	-	22.3%	57
Gender Not Available	-	-	-	-	-	49%	-	28.8%	30
Gender TOTAL	-	-	-	-	-	47%	-	23.6%	57

What populations are reported?

Number of States Reporting All Clients:

44

Number of States Reporting Some Clients:

13

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
MA	-	-	-	-	-
US	36	25	3	7	25

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

## State Notes:

Age None  
Gender None  
Overall See General Notes.

**Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2020**

**Massachusetts**

**Reporting Period: 7/1/2019 To: 6/30/2020**

Diagnosis	State				Employed as a % of Labor Force		Employed as % of Known Employment Status		% of Consumers with Dx		States Reporting
	Employed	Unemployed	In Labor Force*	With Known Employment Status**	State	US	State	US	State	US	
Schizophrenia and Related Disorders	-	-	-	-	-	30.2%	-	9.9%	-	13.9%	52

## Massachusetts

URS Table Number	General Notes
2A/B	The decrease in the number of youth under 18 served by DMH is attributed to a change in the way DMH counts youth receiving Flex Services. This change within the data submitted by Flex providers began in January 2019. Another reason for this decrease is due to youth aging up (i.e., turning 18 years old) from FY19 to FY20. And finally, there was a marked decrease in the number of youth applying for DMH services in the second half of FY20 due to the pandemic which translated into fewer youth receiving DMH services in the same time period.
3	The decrease in the number of clients receiving treatment in state hospitals from FY19 to FY20 is attributed to several factors. Admissions ceased at two hospitals which experienced high numbers of COVID+ staff and clients. Two other hospitals ceased admissions for around three months. Additionally, the MA courts closed and/or reduced their hours and operations resulting in slower admissions for all other facilities, and there has been an overall decrease in all court ordered evaluations and commitments since March. Finally, the need for clients' isolation and quarantining reduced the number of available beds.
4/4A	Persons enrolled in DMH's major program, Adult Community Clinical Services (ACCS), receive employment support from the Massachusetts Rehabilitation Commission (Massachusetts' vocational rehabilitation agency) which has not yet been able to provide person-level data per individuals' employment status. We are seeking to work with MRC to collect this data.
5A/B	MA DMH is not the state Medicaid agency and does not presently have access to Medicaid data to complete this table.
6	Community Programs: the decrease in the community program adult admissions from FY19 to FY20 stems from the start up of the Adult Community Clinical Services (ACCS) program, as explained in the FY19 report. In FY19, DMH redesigned its primary adult community service program, ACCS. This coincided with limiting enrollment leading to the commencement of ACCS on July 1, 2018. This plus the transition to a new, redesigned program presented a high admission total. After the initial start up experience in FY19, adult community admissions for FY20 are lower.
6	Increase in average LOS children: The increase in the LOS of children can primarily be attributed to lack of access to the next level of care and interagency challenges. Specifically, DMH has an increased number of youth being referred for Board of Special Education hearings which is a lengthy process; specialized community placements have decreased in number and DMH has experienced significant access problems to MA Department of Children and Families community residential services; and Massachusetts is experiencing significant waiting lists for community-based psychiatry and youth cannot be discharged without psychiatric follow-up.
6	Increase in average LOS adults: The increase in the LOS in adults is attributed to a decrease in inpatient admissions beginning in March 2020 due to COVID-19 pandemic, which included a reduction in both forensic admissions (due to court closures or reduced hours) and admissions from Acute Psychiatric Hospitals. Forensic admissions have shorter lengths of stay. With less forensics admissions, the average LOS increases. During the same period, the absolute number of discharges increased overall; but during the first surge, discharge slowed and some patients' discharges were delayed until it lessened. This resulted in an increase in LOS for those patients.
7	Total Other Expenditures increase is primarily due to salary raises within Comprehensive Psych Services in order to make positions more competitive and consistent with peers who are state employees.
8	DMH increased information systems funding related to reporting for the Adult Community Clinical Services (ACCS) program, its largest community program and reporting for community Children, Youth and Family programs. Partnership and outreach support related to the block grant and First Episode Psychosis (FEP) program is reported in the table as well.
9, 11, 11A	Two adult consumer populations were surveyed in FY20. A stratified random sample was used for the Adult Clinical Community Services (ACCS) client population and a census was used for the Program of Assertive Community Treatment (PACT) client population. Reported results include all adult consumers surveyed.
11	Children and youth receiving case management, intensive residential treatment, and clinically intensive residential treatment services between 7/1/2019 and 12/31/2019
11	Two adult consumer populations were surveyed in 2020. A stratified random sample was used for the Assertive Clinical Community Services (ACCS) client population and a census was used for the Program of Assertive Community Treatment (PACT) client population. Reported results include all adult consumers surveyed.

URS Table Number	General Notes
12	The calculation for the percentage of persons with a co-occurring diagnosis of substance abuse is obtained by counting the number of persons with a diagnosis of substance abuse on file in the Mental Health Information System (MHIS) as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file in MHIS as of the close of the reporting period. Calculations for FY 19 were updated to include "F" codes for mental health and substance use disorders now used in DSM V and ICD-10, which may account for the increase in percentage of co-occurring diagnoses reported in previous years.
15	Living situation is measured at admission for all clients and at the annual review for case managed clients only. In addition, it is assessed annually for all inpatients in state operated facilities with length of stay (LOS) greater than 6 months.
15	The decrease in the number of clients receiving treatment in state hospitals from FY19 to FY20 is attributed to several factors. Admissions ceased at two hospitals which experienced high numbers of COVID+ staff and clients. Two other hospitals ceased admissions for around three months. Additionally, the MA courts closed and/or reduced their hours and operations resulting in slower admissions for all other facilities, and there has been an overall decrease in all court ordered evaluations and commitments since March. Finally, the need for clients' isolation and quarantining reduced the number of available beds.
16	The decrease in the number of youth under 18 served by DMH is attributed to a change in the way DMH counts youth receiving Flex Services. This change within the data submitted by Flex providers began in January 2019. Another reason for this decrease is due to youth aging up (i.e., turning 18 years old) from FY19 to FY20. And finally, there was a marked decrease in the number of youth applying for DMH services in the second half of FY20 due to the pandemic which translated into fewer youth receiving DMH services in the same time period.
17	Although these EBPs may be provided in some DMH programs, they are not reported as discrete services in the Mental Health Information System (MHIS) and are unavailable for reporting.
