URS Table Number	General Notes
4, 5A, 14A, 15, 17, 20A	DMH is in the process of implementing a new data collection warehouse which will be utilized beginning in FY21. The agency is aware of data reporting issues with the current system referred to as the Central Data Repository (CDR).
6	We report the data that was submitted to the State from Providers. It could be a situation that the Providers had to quarantine based on COVID or the change in the number of beds per room due to COVID. Providers had to change the 2 beds per room to 1 bed per room to comply with CDC. We also have a situation that Providers are not discharging clients and we are addressing this with the Providers.
7	Total MHBG Expenditures are higher because at the beginning of our state fiscal year 2020 there were more subrecipient grants paid to wrap up the federal grant than there were compared to state fiscal year 2019 reporting, so essentially a timing difference in expenditures between the two periods. Total Other Federal Funds Expenditures were more in SFY 20 than SFY 19 because of more federal funds being available more recently. This also could be the result of timing differences in when federal funds were reimbursed to providers. Total Primary Prevention Expenditures were higher because more was allocated to this service in SFY20 vs. SFY19. Total EBP for ESMI Expenditures were more in SFY 20 because about \$214k more was allocated for this purpose.
7A	Total EBP for ESMI Expenditures were more in SFY 20 because about \$214k more was allocated for this purpose.
8	The Total Expenditures Non-Direct Service Activities decrease from SFY 19 to SFY 20 is related to providers not spending as much of their allocated amounts.
16	The supported employment numbers given to us for grant reporting is 280 based on the provider submitting manual data report. Data is reported as it was received from providers.
