URS Table Number	General Notes
4	In SFY 2020 compared to SFY 2019, we had 9,243 more employment records not updated and unavailable. We think that most of these records would be marked as Not in Labor Force. If they were marked Not in Labor Force, the numbers between the two years would be similar.
6	The average length of stay of children discharged from the state hospitals was longer in SFY 2019 because there were 7 children with LOS greater than 500 days and in 2020, there were no children with LOS greater than 500. The average length of stay of children in the state hospitals less than a year was longer in SFY 2020 because there were almost double the amount of children than in SFY 2019 and there was a greater pool of consumers staying longer.
7	A lack of MHBG primary prevention expenditures, which was \$822k in 2019, is the main reason for the rest of the decrease. Total Primary Prevention Expenditures - The amount reported in 2019 was for a suicide prevention contract funded from MHBG. The 2020 suicide prevention contract was funded by a grant from Lifeline (Vibrant), not from MHBG. Total State Hospital Expenditures - State hospital expenditures decreased from 2019 to 2020 due to reduced intake of Medicaid-eligible patients and underspend of state-appropriated funds. Also a new hospital replaced an old hospital in 2019 and this caused a lag in overall patient population, which was still ramping up in 2020. Total Other 24-Hour Care Expenditures - This increase was caused by Medicaid expenditures for inpatient psychiatric care increased by \$10M+ from 2019 to 2020; Psychiatric residential treatment facility expenditures increased by \$2M+ in the same period. It is unknown why both categories experienced higher costs in 2020.
8	Total MHBG Expenditures for Non-Direct Service Activities - In 2020 more MHBG resources were devoted to non-direct service categories Infrastructure Support and Partnership/outreach/needs assessment.
16	We are not sure why less children received Therapeutic Foster Care in SFY 2020 than in SFY 2019.
17	We are not sure why less adults received Integrated Dual Diagnosis treatment in SFY 2020 than in SFY2019. We are not sure why more adults received Family Psychoeducation services in SFY 2020 than in SFY2019.
