

## Nebraska 2020 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,013,396	15.66	24.58	58
Community Utilization per 1,000 population	7,801,366	14.15	23.93	58
State Hospital Utilization per 1,000 population	125,305	0.38	0.38	53
Other Psychiatric Inpatient Utilization per 1,000 population	408,959	1.55	1.47	40

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	776,983	59.9%	47.1%	57
Employed (percent with Employment Data)**	776,983	33.7%	23.6%	57

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	71.9%	79.6%	49

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	79.1%	74.6%	45

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	7,008	0.0%	9.2%	48
State Hospital Readmissions: 180 Days	15,085	0.0%	19.9%	49
State Hospital Readmissions: 30 Days: Adults	6,499	0.0%	9.4%	48
State Hospital Readmissions: 180 Days: Adults	13,916	0.0%	20.2%	49
State Hospital Readmissions: 30 Days: Children	509	0.0%	7.3%	16
State Hospital Readmissions: 180 Days: Children	1,169	0.0%	16.7%	19

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,199,185	74.0%	84.7%	57
Homeless/Shelter	216,731	7.7%	4.4%	52
Jail/Correctional Facility	72,275	6.5%	1.5%	51

Adult EBP Services	U.S.	State	U.S. Rate	States
Supported Housing	70,648	7.2%	2.3%	30
Supported Employment	66,662	6.0%	1.9%	41
Assertive Community Treatment	66,159	0.6%	1.8%	42
Family Psychoeducation	37,853	-	3.1%	16
Dual Diagnosis Treatment	199,597	3.7%	9.5%	24
Illness Self Management	308,378	-	19.1%	22
Medications Management	545,051	40.8%	31.3%	21

Child/Adolescent EBP Services	U.S.	State	U.S. Rate	States
Therapeutic Foster Care	13,178	-	1.7%	21
Multisystemic Therapy	31,303	0.4%	4.1%	20
Functional Family Therapy	31,817	-	5.8%	15

Change in Social Connectedness	State	U.S. Rate	States
Adult Improved Social Connectedness	69.2%	79.2%	46
Child/Family Improved Social Connectedness	88.3%	88.4%	42

\*Denominator is the sum of consumers employed and unemployed.

\*\*Denominator is the sum of consumers employed, unemployed, and not in labor force.

**Note:**

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

**Table 2a**

Age Age is calculated at midpoint of the reporting period.  
Gender The most recent gender was used for reporting.  
Race The most recent race was used for reporting.  
Overall The number of persons served overall increased by 14.9% (3,931) in FY2020. Please see General Notes for additional comments on the differences.

**Table 2b**

Age Age is calculated at midpoint of the reporting period.  
Gender The most recent gender was used for reporting.  
Race The most recent ethnicity was used for reporting.  
Overall See General Notes

# Access Domain: Persons Served in Community Mental Health Programs by Age and Gender, FY 2020

Nebraska

Reporting Period: 7/1/2019 To: 6/30/2020

Demographic	Served in Community				Penetration Rates (rate per 1,000 population)		States Reporting
	State		US		State	US

Total	27,366	100.0%	7,801,366	100.0%	14.1	23.9	58

## Note:

US totals are based on states reporting.

This table uses data from URS Table 3.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

## State Notes:

Age Age is calculated at midpoint of reporting period.

Gender The most recent gender was used for reporting.

Overall Based upon our understanding of the definition of Institutions under the Justice System, we do not manage or directly pay for any services within this system type. For additional notes see General Notes.

**Note:**

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

Age Age is calculated at midpoint of reporting period.

Gender The most recent gender was used for reporting.

Overall Based upon our understanding of the definition of Institutions under the Justice System, we do not manage or directly pay for any services within this system type. See General Notes for additional notes.

**Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2020**

**Nebraska**

**Reporting Period: 7/1/2019 To: 6/30/2020**

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	50.0%	71.6%	77.0%	55
Percent of Children served through the SMHA who meet the Federal definition for SED	49.3%	71.1%	75.0%	55

<b>Co-occurring MH and Substance Abuse Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	14.5%	28.0%	25.0%	56
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	0.6%	8.1%	3.0%	55
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	22.8%	27.4%	24.5%	54
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	0.6%	9.6%	3.0%	54

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

1) Individuals had both mental health service and reported substance use diagnosis. 2) Individuals received treatment in a dual diagnosis service.

**State Notes**

None

## Note:

This table uses data from URS tables 5a and 5b.

## Type of Medicaid Data Reported

Data based on Medicaid Eligibility, not Medicaid Paid Services.

People Served by Both includes people with any Medicaid

## State Notes

- 5a Race The most recent race data was used for reporting.
- 5a Gender The most recent gender was used for reporting.
- 5a Overall Based on Insurance Status and Medicaid Status fields. Medicaid status was reported for the most recent admission date within the fiscal year.
- 5b Overall Based on Insurance Status and Medicaid Status fields. Medicaid status was reported for the most recent admission date within the fiscal year. This is the same population as presented in Table 5a distributed by ethnicity.

**Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

**Table 3 State Notes:**

Age	Age is calculated at midpoint of reporting period.
Overall	Based upon our understanding of the definition of Institutions under the Justice System, we do not manage or directly pay for any services within this system type. For additional notes see General Notes.
Gender	The most recent gender was used for reporting.

**Table 6 State Notes:**

Hospital	Includes all individuals admitted to a State Regional Mental Health Center (forensic and non-forensic).
Other Inpatient	Includes clients admitted to one of the psychiatric inpatient hospitals within Nebraska, other than a State Regional Mental Health Centers.
Residential	None
Community	Includes clients receiving outpatient services at a State Regional Mental Health Center or clients receiving services at a community provider.
Overall	For clients without a discharge date, length of stay was calculated using June 30, 2020 as a 'discharge date'. Also see General Notes.

**APPROPRIATENESS DOMAIN: Length of Stays in State Psychiatric Hospitals, Other Psychiatric Inpatient and Residential Treatment Centers for Children Settings, FY 2020**

Family Functional Therapy	-	-	31,817	1,312,014	-	5.8%	-	6	15

### Note:

US totals are based on states reporting.

This table uses data from URS Tables 16 and 17.

US averages are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

### State Notes:

Table 16: See General Notes.

Table 17: Data are consistent with trends in the previous (FY2019) report

**Appropriateness Domain: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2020**

**Nebraska**

**Reporting Period: 7/1/2019 To: 6/30/2020**

Number of coordinated specialty care programs: 2

**Admissions to Coordinated Specialty Care (CSC)-FEP Service During the Year**

Gender TOTAL	6,288	4,204	10,492	18,640	60%	47%	33.7%	23.6%	57

What populations are reported?

Number of States Reporting All Clients:

44

Number of States Reporting Some Clients:

13

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
NE	-	Yes	-	Yes	Annual Re-Registration
US	36	25	3	7	25

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

## State Notes:

Age Age is calculated at midpoint of reporting period.

Gender The most recent gender was used for reporting.

Overall Efforts to address missing demographics or partial data at the provider level potentially accounts for decreases in the percentage differences between 2019 and 2020 for "not available".

# Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2020

Nebraska

Reporting Period: 7/1/2019 To: 6/30/2020

Diagnosis	State				Employed as a % of Labor Force		Employed as % of Known Employment Status		% of Consumers with Dx		States Reporting
	Employed	Unemployed	In Labor Force*	With Known Employment Status**	State	US	State	US	State	US	
Schizophrenia and Related Disorders	2,251	1,262	3,513	4,980	64.1%	30.2%	45.2%	9.9%	26.7%	13.9%	52
Bipolar and Mood Disorders	3,153	2,153	5,306	8,196	59.4%	47.4%	38.5%	24.3%	44.0%	40.1%	52
Other Psychoses	608	471	1,079	3,901	56.3%	31.2%	15.6%	13.3%	20.9%	2.2%	51
All other Diagnoses	21	26	47	83	44.7%	52.5%	25.3%	28.6%	0.4%	36.9%	52
No Diagnosis and Deferred Diagnosis	255	292	547	1,480	46.6%	49.3%	17.2%	27.0%	7.9%	6.8%	42

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS Table 4a.

## State Notes:

Data is consistent with trends observed in FY2019 and the increase in the number of persons served in FY2020.

# CONSUMER SURVEY RESULTS, FY 2020

Nebraska

Reporting Period: 7/1/2019 To: 6/30/2020

Indicators	Children: State	Children: U.S. Average	States Reporting	Adults: State	Adults: U.S. Average	States Reporting
Reporting Positively About Access	88.8%	89.2%	46	84.8%	88.9%	49

## Nebraska

URS Table Number	General Notes
All	Individuals included in this reporting are those who were served in a mental health or dual service during fiscal year (FY) 2020 through the Nebraska DHHS Division of Behavioral Health (DBH). This report does not include individuals served through Medicaid funding (N=2,885) or those who received services through one of four federally-recognized tribes (N=550) in Nebraska. In addition to the individuals in the DBH mental health and dual service unduplicated counts reported within the URS tables. In FY16, DBH and the Nebraska Behavioral Health System (NBHS) changed data systems for collection of service and treatment data, converting from a vendor-operated system to a new Centralized Data System (CDS) hosted by DHHS-DBH. Data clean-up during data migration, new data entry specifications for collection of key fields (including, but not limited to SSN, DOB) and quarterly alerts to prompt providers to review and update other client fields (for example, employment, living status, criminal justice involvement, pregnancy status) have resulted in improved reporting and the accuracy of deduplication over the past several years. In addition, consistency has improved due to quarterly trainings for providers on system updates and due to the creation of a library of recorded video trainings for users.
All	DBH uses unique Consumer ID's to identify clients and determine unduplicated client encounters/records.
2A	The difference in number of persons served in FY2019 and FY2020 was primarily to the adult population. In each adult category from 25 years and older, the difference showed increases from 18.0% to 60.4% of persons served in FY2020. The differences are consistent with anticipated trends.
2B	The overall percentage of "Not Available" status in the data decreased from FY2019 to FY2020 as expected. Efforts were made at the provider level to improve data quality collected and reported across all demographics.
3	Overall, there was a marked increase in number of persons served in both community Mental Health Programs and in the State Psychiatric Hospital. The largest increase for both genders at the State Psychiatric Hospitals were within the 21 - 64 age group. Persons who received services in more than one setting are duplicated between rows. A Consumer ID, which is a unique value assigned to each person served when data are unduplicated. There is a need for ongoing efforts with community providers to emphasize the vital importance of complete and accurate data entry of demographics for each person served. Actions to highlight this need will continue.
4	The difference in the number of consumers "not" in the Labor Force was most likely influenced by increased number of consumers served along with economics of the state and factors related to the COVID-19 pandemic.
6	This table represents the turnover of the clients shown in Table 2a. Total Served at Beginning of Year (unduplicated): This population includes clients with admission dates before July 1, 2019 and who were discharged after July 1, 2019, or were not discharged. Clients are unduplicated. Admissions During the Year (duplicated), the population was limited to records with admission date which occurred between July 1, 2019 and June 30, 2020. All unique admission dates were counted for each service type. Discharges during the year (duplicated), the population was limited to records with discharge date which occurred between July 1, 2019 and June 30, 2020. All unique discharge dates were counted for each service type. Length of Stay (in Days): Discharged Patients, the population was limited to those persons included in the previous column. Mean and Median number of days was calculated by subtracting the Admission date from the Discharge date of each record. For Clients in Facility for Less than 1 Year: Average Length of Stay (in Days): Residents at end of year: the population was limited to persons who were admitted between July 1, 2019 and June 30, 2020, and did not have a discharge date. Length of stay was calculated as follows: (June 30, 2020-Admission Date). For Clients in Facility More than 1 Year: Average Length of Stay (in Days): Residents at end of year: the population was limited to persons who were admitted prior to July 1, 2019, and did not have a discharge date. Length of stay was calculated as follows: (June 30, 2020-Admission Date). Small N (n discharges = 18) impacted the difference in the LOS for adults (in facility <1 year). Additionally, it is expected that delays in discharging to lower levels of care as a result of limited capacity due to the pandemic would also have led to increased LOS for this group.
7	In FY19, "Other 24-Care" included both non-state hospital inpatient psychiatric care as well as residential care. In FY20, "Other Psychiatric Inpatient Care" was made a separate line on the table. This creates an artificial difference in the year to year comparison of "Other 24 Hour Care."
9	The significant difference in participation in the survey is possibly explained by to two major disasters. First, the flooding in FY2019 reduced participation. Second, the COVID pandemic and extenuating circumstances (more people at home) in FY2020 likely increased opportunity or interest to complete the survey. The difference in percent of children/adolescents reporting positively about functioning (22%) is likely attributable to increased participation in the consumer survey and efforts made by providers toward delivery of trauma informed care and services that give families/youth voice and input in decisions pertaining to treatment.
11	The difference in percent of children/adolescents reporting positively about outcomes (25%) is likely attributable to increased participation in the consumer survey and efforts made by providers toward delivery of trauma informed care and services that give families/youth voice and input in decisions pertaining to treatment.

URS Table Number	General Notes
14A	<p>This table represents the distribution of the adult SMI and children/adolescent SED population, a subset of the population presented in Table 2A (see table 2 notes for more information). NE State SMI Definition: Client is age 18 or older AND has at least one of the following ICD-10 diagnoses: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89 AND meets at least one of the following criteria: GAF score less than 60; indicated functional deficit; is SSI/SSDI eligible or potentially eligible; was admitted to Community Support, Assertive Community Treatment, Psychiatric Residential Rehabilitation, Day Treatment, Day Rehabilitation, Day Support, Vocational Support, or related psychiatric rehabilitation services OR Client is age 18 or older AND Provider selected YES for Meets SMI Criteria. NE State SED Definition: Client is age 3-17 years AND has at least one of the following ICD-10 diagnoses: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89, 300.01, 300.21, 300.3, 301.13, 307.1, 307.23, 307.51, 309.81, 312.34, 314, 314.01, 314.1, 314.2, 314.8, 314.9, F40.01, F41.0, F42, F43.10, F43.11, F43.12, F44.89, F50.00, F50.01, F50.02, F50.2, F63.81, F90.0, F90.1, F90.2, F90.8, F90.9, F95.2 AND meets at least one of the following criteria: is SSI/SSDI eligible or potentially eligible; was admitted to Professional Partner Services, Special Education Services, Day Treatment, Intensive Outpatient, Therapeutic Consultation/School Wrap, or Respite Care OR Client is age 3-17 years AND Provider selected YES for Consumer Meets NE SED Criteria.</p>
15	<p>The reduction in "NA" for gender is likely explained by attention drawn toward demographic data-entry that are complete and accurate (data integrity). The differences in other demographic areas indicate that there is need for continuing efforts to draw providers' attention to data accuracy and completeness.</p>
16	<p>Trends are indicative of the increase in number of persons served and previous fiscal year. Notably, the larger individual category percent differences between fiscal years are due to small sample sizes, reduction in "NA" for gender. There were increased differences in Race/Ethnicity and Hispanic/Latino Origin categories, an area which continues to present a challenge with data collection. The decrease in number of youth served is likely a factor of Medicaid expanded services in the state.</p>
20A	<p>With limited capacity and waitlists for high-level care, "Non-Forensic Patients Readmission to Any State Psychiatric Inpatient Hospital" are not likely. Consumers are more likely to receive care in community-based services whenever this option is appropriate/available. Additionally, increased efforts to improve discharge planning and overall system flow through from the state hospitals to community based services have resulted in increased discharges without readmissions for non-forensic patients. High percentages of change in readmissions from year to year are also the result of extremely small readmission sample sizes.</p>
20B	<p>With limited capacity and waitlists for high-level care, "Forensic Patients Readmission to Any State Psychiatric Inpatient Hospital" are not likely. Consumers are more likely to receive care in community-based services whenever this option is appropriate/available. Additionally, increased efforts to improve discharge planning and overall system flow through from the state hospitals to community based services have resulted in increased discharges without readmissions for forensic patients. High percentages of change in readmissions from year to year are also the result of extremely small readmission sample sizes.</p>
