**Note:**

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**Note:**  
This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2019

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

Table 14a

Age None  
Gender None  
Race NH DHHS is working closely with CMHCs to improve Race/Ethnicity data reported as "Not Available". The Quality Improvement project began in July 2020 and will continue through Fall/Winter of 2020 with the implementation of Phoenix System enhancements.

Overall NH DHHS is implementing a number of system enhancements for Race, Ethnicity, Gender, and Language. This will be implemented in January 2021.

Table 14b

Age None  
Gender None  
Race None  
Overall In SFY19 Data, Not Hispanic or Latino & Hispanic or Latino Category data are reversed. For example, last year there should be 1,139 Total for Hispanic/Latino and 18,279 for Not Hispanic or Latino. This explains the variation in counts for SFY19 and 20.

| Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis   | 11.0%        | 27.4%             | 24.5%            | 54                      |
| Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis | 0.2%         | 9.6%              | 3.0%             | 54                      |

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

If a client had a secondary diagnosis which included a SA diagnosis code, it was used to calculate the percentages.

**State Notes**

None

# ACCESS DOMAIN: Persons Served by SMHA System through Medicaid and Other Funding Sources by Race, Gender, and Ethnicity, FY 2020

STATE: New Hampshire

Reporting Period: 7/1/2019 To: 6/30/2020

**Note:**

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

**Note:**

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

**Table 6 State Notes:**

|                 |      |
|-----------------|------|
| Hospital        | None |
| Other Inpatient | None |
| Residential     | None |
| Community       | None |
| Overall         | None |

#### Note:

US totals are based on states reporting.

This table uses data from URS Tables 16 and 17.

US averages are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

| When is Employment Status Measured? | At Admission | At Discharge | Monthly | Quarterly | Other |
|-------------------------------------|--------------|--------------|---------|-----------|-------|
| NH                                  | -            | -            | -       | Yes       | -     |
| US                                  | 36           | 25           | 3       | 7         | 25    |

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

## State Notes:

Age None  
Gender None  
Overall None

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data for URS Table 4a.

## State Notes:

Efforts continue to be made to improve diagnosis reporting through quality improvement projects with the Community Mental Health Centers.

# CONSUMER SURVEY RESULTS, FY 2020

New Hampshire

Reporting Period: 7/1/2019 To: 6/30/2020

| Indicators                                                    | Children: State | Children: U.S. Average | States Reporting | Adults: State | Adults: U.S. Average | States Reporting |
|---------------------------------------------------------------|-----------------|------------------------|------------------|---------------|----------------------|------------------|
| Reporting Positively About Access                             | 79.6%           | 89.2%                  | 46               | 79.6%         | 88.9%                | 49               |

| General          | <p>NH has been working on building capacity for SAMHSA MH-CLD reporting. The Phoenix System is the centralized database used by the state for reporting of eligible mental health clients and selected service utilization. From September 2020 through January 2021, the system is being enhanced to include additional data elements, as well as improve currently collected data elements. These changes will improve reporting as well as align the data with best practices outlined by CDC and CMS. These elements include: Sexual Orientation, Gender Identity, Biological Sex, Language, Race, Ethnicity, Housing, Tobacco Use, Spoken Language, Written Language, and personal identifiers. Once these changes are implemented in the system, NH will work to onboard Community Mental Health Centers (CMHCs) and validate their monthly data submissions through July 2021. During the validation period, NH plans on updating all previous data queries utilized in SFY20 data reporting to include new options and will validate findings with this submission file (since the state will be required to submit results in both the MH-CLD and URS Table formats for SFY21). The state will then begin reviewing documentation surrounding MH-CLD reporting supplied for SFY20 to prepare for SFY21 submissions.</p> |
| 7                | <p>Effective State Fiscal Year 2020, New Hampshire Hospital (the State psychiatric Hospital) began to recognize Disproportional Share Hospital (DSGH) funds as "intra-governmental", as it was discovered that both the NH-DHHS Office of Medicaid Business Policy (OMBP) and NHH were reflecting these DSH funds as being Federal funds. As a result, OMPB now recognizes the receipt of the Federal Financial Participation (FFP) from DSH as federal income and NHH recognizes that payment as inter-governmental. This account for the variance between SFY 2019 and SFY 2020 data as it has been relegated to state or federal funds. For SFY 2019, we engaged in infrastructure and planning efforts that involved contracting with experts in First Episode Psychosis and collecting information from peers and providers. This resulted in block grant funds in excess of the 10% set aside being expended.</p>                                                                                                                                                                                                                                                                                                                                                                                                          |
| 12               | <p>Less than 1 percent (.2297%) of children/adolescents served by the SMHA also have a diagnosis of substance abuse problem. Less than 1 percent (.2286%) of children/adolescents meeting the Federal definition of SED also have a diagnosis of substance abuse problem.</p>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    |
