

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

URS Table Number	General Notes
2A, 2B, 3, 4, 5, 5A, 5B, 6, 12, 14A, 14B, 15, 15A, 16	The reporting methodology was changed for this reporting period. This included a change in the data source. The previous data source was self reported and was not validated against actual utilization experience. The redesign now pulls most of the data from our claims/encounter data system, which results in more robust data and reflects true utilization experience of our clients. This also results in significant differences not only in number of clients, but on certain availability of data (i.e., ethnicity, living situation), which we will be working on how to capture this data in the future.
4	We are experiencing a decrease of data submissions for this specific data source used for this table, but we are working towards making updates to improve the data submissions rates in the future.
5A	<p>Per the Families First Coronavirus Response Act, AHCCCS has not disenroll members during the Public Health Emergency (with the exception of death, those who move out of state, those who voluntarily withdraw, those who aged out of the KidsCare program, or those who are no longer Medicaid eligible but are eligible for a Medicare Savings Program). Members who were not federally funded under Title XIX (for example, members with a Serious Mental Illness determination who do not qualify for Medicaid) were not exempt from disenrollment during the Public Health Emergency.</p> <p>Also, we pulled a sample of the 2020 data and found a shift in eligibility in this population (Both Medicaid and Non-Medicare) to the Medicaid Only group, which may have contributed to the decrease in 2021 data.</p>
6	This decrease may also be attributed to the pandemic, as we saw increases in telehealth versus in person services.
7	<p>Administration line includes MHBG TA expenditures of \$163,934.70. AHCCCS is requesting an extension through 12/31/2021 to report the total funding spent by fund source for columns C-G. AHCCCS cannot populate the expenditures by the requested "Activity". Also the state hospital data is collected directly from the Arizona State Hospital.</p> <p>AHCCCS has received increased MHBG funding in the past few years, thus that is why the State had higher expenditures in SFY2021 as compared to SFY2020, see below:</p> <p>MHBG 2018 - \$16,941,418 MHBG 2019 - \$18,507,674 MHBG 2020 - \$18,674,881 MHBG 2021 - \$19,762,211</p> <p>For the other 24 hours and ambulatory lines - The difference was due to the increased expenditures in our contractors' reported financials. We utilize a formula that captures our contractors reported expenditures for specific categories and derive at a percentage between 24 hour and non-24 services. The percentages are then applied to the total service (SED and SMI) expenditures (as reported on Table 10). Note: AHCCCS does not capture the expenditures in our accounting system for these two categories.</p>
7a	Arizona is unable to report expenditures in the Table 7A. Activity categories from the Statewide Accounting System; however, the total expenditures for First Episode Psychosis (FEP) in SFY 2021 is \$1,636,778.46.
9, 11, 11A, 19A, 19B	Effective July 1, 2016 the Arizona Department of Health Services/Division of Behavioral Health Services (ADHS/DBHS) merged with the state Medicaid agency (Arizona Health Care Cost Containment System- AHCCCS) as a result of the state's administrative simplification. As part of this process, AHCCCS reviewed all ADHS/DBHS deliverables, including the Member Satisfaction Survey, to understand data methodologies and streamline data sources. AHCCCS continues to evaluate the best method to collect this data from our members.
15	We are currently not collecting this data. We will review our process to initiate a change to capture this data in the future. Please see Comment No. 1
16	We reviewed the data related to our members with SMI and those who receive support housing services and found that there was a uniform guidance issued during the reporting period that increased the number of procedure codes that are allowed to identify these services in our claims system. At the time that this report was completed, these additional procedure codes were not included in the data report, which may have contributed to the decrease. We are currently in the process of evaluating the reporting methodology for this table to ensure that it is updated according to this guidance for our next report.

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
