2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.

- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.

- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.

- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Colorado 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,195,517	24.57	24.59	59
Community Utilization per 1,000 population	7,974,393	23.56	23.93	59
State Hospital Utilization per 1,000 population	114,987	0.20	0.36	53
Other Psychiatric Inpatient Utilization per 1,000 population	454,356	-	1.52	45

Note:
This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Age	None
Gender	None
Overall	Populated by Hendall using CO's 2021 MH-CLD BCI dataset.

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2021

Colorado   **Reporting Period:** 7/1/2020 To: 6/30/2021

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	72.6%	71.4%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	60.5%	71.8%	75.0%	57

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	7.0%	28.8%	26.0%	57
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	1.0%	6.1%	2.0%	57
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	7.0%	29.8%	27.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.0%	10.3%	3.0%	56

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Co-occurring is collected by referencing other diagnoses submitted on the Colorado Client Assessment Record. If there is an SUD diagnosis, then the client is assumed co-occurring.

State Notes

None

Colorado

URS Table Number	General Notes
5A	The State has been continually working on getting more clients who are eligible to be covered by Medicaid and on enrolling clients who qualify in medicaid covered services into those services and to utilize block grant dollars as a safety net for clients/situations when medicaid is not available.
6	Totals for community programs and residential treatment centers submitted in error. New values have been submitted for approval for these categories. State hospital admissions declined in 2021 due to continued impact from COVID-19 pandemic. State hospitals were impacted through client restrictions after both clients and staff experienced COVID-19 outbreaks.
7	Total Other Funds Expenditures - The State received a one-time allocation from the Coronavirus Aid, Relief and Econmoic Security Act (CARES ACT) Pub.L. 116-136 and reported $8,473,717 of this funding in 2021. Total Local Funds Expenditures - Decrease in local grant funding. Total Administration Expenditures - Increase due to the indirect costs charged to the additional $72,985,147 funding increase from 2020 to 2021.
7A	The State budgeted 10% of the Mental Health Block Grant for year 2020 and budgeted 20% of the MHBG to expand the program in 2021
8	State expended a one time expenditure 2020 of $508,638 to contractors for needs assessment of the Colorado behavioral health system in anticipation of the establishment of a Behavioral Health Administration in July 2022 to better serve the population. The project was not funded in 2021.
9	In 2021,OBH gathered client experience information from a different source than prior years. Previously, OBH partnered with another state agency (our state Medicaid office, "HCPF") who led and issued a survey to consumers. Given capacity shortages, HCPF was not able to issue the survey so OBH utilized a different approach and drew this information from the Colorado Client Assessment Record (CCAR). The CCAR is a standardized instrument developed by OBH to gather client demographic, service, and outcome information at multiple time periods for clients receiving services at Community Mental Health Centers. Outcome data was not as reliable as the prior method and not available for all clients. In October, OBH signed a contract with a new vendor and will return to the original survey approach (with a few exceptions). We anticipate that this aberration in the data will reverse for the next block grant submission (2022).
11	This is data was drawn from two sources. The Outcomes Domain was pulled from the Colorado Client Assessment Survey (CCAR). The CCAR is a standardized instrument developed by OBH to gather client demographic, service, and outcome information at multiple time periods (admission, annual updates, discharge, and whenever significant information changes) for clients receiving services at Community Mental Health Centers. (see Table 9). All other Domains were drawn from the Colorado Health Assessment Survey (CHAS), a bi-annual statewide survey sponsored by the Colorado Health Institute. The change in survey methodology for FY21 may have led to a decrease in how clients reported their outcome sentiment compared to the prior year, but ultimately we are unable to conclusively assess why we saw this decrease at this time.; These numbers are not errors. In 2021, OBH gathered client experience information from a different source than prior years. Previously, OBH partnered with another state agency (our state Medicaid office, "HCPF") who led and issued a survey to consumers. Given capacity shortages, HCPF was not able to issue the survey so OBH utilized a different approach and drew this information from the Colorado Health Assessment Survey (CHAS) and the Colorado Client Assessment Record (CCAR). The CHAS was used for the Access; Quality; Participation; and General Satisfaction questions, and where you are seeing the big numbers. The CHAS utilizes weighted data so the number of responses can appear quite large.
14A	The change can be attributed to a small n. Though a 20% change, the number of increase in clients is not substantial.
15	Due to a relatively small n, total number of consumers in jail/correctional facilities returned to a level last seen in 2019.

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the "Not Available" category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in "CSC-FEP Fidelity and Training State" and "Clients Served by Programs With and Without CSC-FEP Fidelity" due to a processing error in counting several fidelity programs.
