

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Connecticut 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States

What populations are reported? All Clients Number of States Reporting All Clients: 35 Number of States Reporting Some Clients: 15

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
CT	-	-	-	-	-
US	37	23	4	9	20

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

URS Table Number	General Notes
5	<p>Decrease in clients receiving only services funded by Medicaid and the increase in clients receiving services funded by both Medicaid and non-Medicaid sources are likely due to two factors:</p> <ul style="list-style-type: none"> Improved counting methodology for URS reporting. Data quality measures that have included major Medicaid status updates for human services contracted providers (private non-profits) who bill Medicaid themselves. <p>- Because DMHAS does not bill for all Medicaid recipients (just those who are in state operated facilities and certain programs, such as Transitional Case Management and some waivers), we do not automatically have up to date Medicaid enrollment status for clients served by private providers.</p> <p>- However, we have been working to increase the frequency of Medicaid status updates as well as finding additional ways to update our records through other sources of information, such as through Beacon Health Options, CT's behavioral health Medicaid ASO.</p>
6	<p>Total Number of Consumers Served in Other Psychiatric Inpatient Settings at the beginning of the year: The increase between 2020 and 2021 was likely the result of decompression in inpatient settings during the early phases of the pandemic in 2020. This decreased the number of available beds in 2020. In 2021 most beds came back online. An increase from 2020 to 2021 would seem normal in these circumstances.</p> <p>Total Admissions to Other Psychiatric Inpatient During the Year: The increase between 2020 and 2021 was likely the result of decompression in inpatient settings during the early phases of the pandemic in 2020. This decreased the number of available beds in 2020. In 2021 most beds came back online. An increase from 2020 to 2021 would seem normal in these circumstances.</p> <p>Increase in LOS of adults discharged from the state hospital – this is likely due to COVID-19's impact on our service network. It has taken longer to make placements in the community.</p> <p>The increase in Average LOS between 2020 and 2021 can be accounted for by the variation in LOS of discharged clients. Outlier clients with long LOS will cause average LOS to increase in certain years.</p> <p>Average LOS of adults (in facility < 1 year) who were state hospital residents at the end of the year- This figure represents a much smaller increase from 2020 and is the result of normal variation in LOS that we see year-to-year.</p> <p>The decrease in admissions to community programs is likely due to COVID-19's impact on operations: need to maintain social distancing; impact on staffing; patient safety concerns. We have seen a ~20% decrease in client numbers.</p>
7/7A	<p>Increase in primary prevention expenditures: New additional federal funding for Suicide Prevention and increase in State funds due to Yale Staffing contract in FY20.</p> <p>Increase in MHBG expenditures: FY20 caught up on back payments to DCF (30% share) for \$1.5M in Ambulatory/Community Non-24-Hour Care. FY20 moved Community Health Resources on to block grant \$0.5M in Other 24-Hour Care, previously funded through state funds.</p> <p>Total Other Funds Expenditures: These expenditures increased as the result of the state receiving federal COVID-19 relief funds.</p> <p>The decrease between 2020 and 2021 was the result of budgetary shifts within the department of children and families.</p>
15	<p>Total number of consumers Homeless/Shelter: This decrease was likely the result of shelter decompression during the pandemic. Shelter beds were reduced and replaced with hotel rooms to allow for safe distancing, which reduced the overall number of shelter beds during the pandemic. Individuals who were homeless but placed in temporary hotels may have been identified as housed by treatment providers, reducing the number of individuals identified as homeless or in shelter. State staff are working with providers to ensure that the correct living situation option is identified at admission.</p>

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
