

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Delaware 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
DE	Yes	Yes	Yes	-	-
US	37	23	4	9	20

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

General Notes FY 2021

Delaware

URS Table Number	General Notes
Table 4	<p>a. 6,532 on Table 3 does not include "Age Not Found" category</p> <p>b. 6,547 on Table 4 includes "Age Not Found" Category</p> <p>c. The 15 clients difference between the two tables is comprised of the Clients found in the "Age Not Found" category.</p>
Table 5a	<p>a. Prior to February 2017 providers were not required to complete CRFs for Medicaid clients</p> <p>b. Due to this policy change in February 2017, DSAMH began collecting information on all clients regardless of payer source. This led to an increase in clients and episodes of treatment in all program types.</p> <ul style="list-style-type: none"> i. Since 2017 data collection for Medicaid clients has increased in accuracy ii. Total number of consumers with both Medicaid and Non-Medicaid funded clients decreased from 2020 to 2021 based on an overall decrease because of the pandemic in clients served within this consumer profile.
Table 6	<p>a. The total number of mental health clients served in beginning of 2021 increased from 2020 as a result of having less discharges during the prior year than admissions during the prior year.</p> <p>b. The State Hospital has experienced a multiyear reduction in admissions due in large part to an increase in alternative options that have led to more individuals being diverted to more appropriate services. This has led to both a decrease in the number of admissions each year as well as eliminating short LOSs for clients inappropriately placed in the facility. This has led to higher mean LOSs for clients admitted to the facility in 2021.</p> <p>c. Since 2017, DPC has been transitioning to an acute facility serving clients short term (30 days or less)</p> <ul style="list-style-type: none"> i. As of 2021 the average LOS for clients in DPC is normalizing to reflect the policy change to transition DPC as an acute facility serving clients short term. ii. Short Term treatment entails treatment for 30 days or less. <p>d. The total Admissions to Other Psychiatric Inpatient During the Year: The decrease is a result of the 2017 policy change as we are seeing the numbers normalize</p> <p>e. Total Admissions to Residential Treatment Centers During the Year: The decrease is a result of the 2017 policy change as we are seeing the numbers normalize</p>
Table 7	<p>Other 24-hour care – This is where Terry Center and Silver Lake center needs to be reported, however this is unreportable. DSCYF-DMSS Fiscal in general do not track the true cost of each facility and it is insignificant to the report because is not a requirement of the grant. Everything is lump into 0440 and there is no program code to distinguish their cost.</p> <p>Other 24-Hour Care/Ambulatory-Community Non 24 hour care: In the past the total of the GF/ASF were used in the spending plan, however since we are now in DMES, we are able to report of what is processed in DMES and what was the state cost. This is reflected in this year report</p>
Table 7a	It is believed that the the pandemic may have impacted admission of individuals for first episodes participation.
Table 8	The Agency increased funding for quality assurance and performance improvement activities over 2020 because of identified needs to support QA/PI
Table 9	The contracted provider instituted a hybrid approach to data collection that included digital, paper and in-person where possible which increased the response rate.
Table 11	The sample size was smaller than previous years based on required reporting
Table 12	This is likely as a result in a reduction of admissions related to the pandemic.
Table 14a	<p>a. Total number of American Indian/Alaska Native consumers with SMI/SED: there was an increase in clients seen within this consumer profile at the provider level</p> <p>b. Total number of Native Hawaiian/Other Pacific Islander consumers with SMI/SED: there was an increase in clients seen within this consumer profile at the provider level</p>
Table 15	The main driver for the change in the total number of consumers in Jail/Correctional Facility is an overall increase in clients seen at the provider level

URS Table Number	General Notes
Table 16	<p>The main driver of the increase in Supported Housing, Supported Employment, and ACT Services numbers was an overall increase in clients seen at the provider level.</p> <p>The primary driver for the recorded decrease can be attributed to data collection issues at providers that was related to the pandemic and provider issues with data submission.</p>
Table 17	<p>The main driver for the change pertaining to these consumer profiles is an overall increase in clients seen at the provider level</p>
Table 20a	<p>The total number of Discharges increased and are normalizing based on 2017 policy change. We also an increase in the number of readmissions on the provider level.</p>
Table 21	<p>The total number of Discharges increased and are normalizing based on 2017 policy change. We also an increase in the number of readmissions on the provider level.</p>

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
