

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Hawaii 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,195,517	6.75	24.59	59

Note:

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Age	None
Overall	Populated by Hendall using HI's 2021 MH-CLD BCI dataset
Gender	None

Table 6 State Notes:

Hospital	None
Other Inpatient	For adults, neither admission/discharge dates nor specific days of service delivery are collected for these providers. Until more complete data become available these figures will not be provided.
Residential	For adults, neither admission/discharge dates nor specific days of service delivery are collected for these providers. Until more complete data become available these figures will not be provided.
Community	For adults, discharge and admission data are no longer collected at contracted providers.
Overall	For adults for all service settings except the state hospital, there are discharge and service data missing. This is due to a change in the MIS system used to track services at contracted providers.

Family Functional Therapy	165	1,553	28,506	1,313,733	10.6%	5.1%	Yes	7	14

Note:

US totals are based on states reporting.

This table uses data from URS Tables 16 and 17.

US averages are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Table 16: AMHD: Eight people served in the adult system are not included in this table because they were under the age of 18 by the method recommended in the CLD. In fact, seven of the eight were over 18 at the time they received services.

Table 17: AMHD does not provide these services

Appropriateness Domain: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

Hawaii

Reporting Period: 7/1/2020 To: 6/30/2021

Number of coordinated specialty care programs: 2

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
HI	-	-	-	-	-
US	37	23	4	9	20

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Age None

Gender None

Overall Populated by Hendall using HI's 2021 MH-CLD BCI dataset. CAMHD collects employment status at last evaluation/end of reporting period and AMHD every 6-months for selected consumers.

General Notes FY 2021**Hawaii**

URS Table Number	General Notes
6	Due to COVID state hospital was not taking new admissions. The state contracted another other psychiatric inpatient provider. Treatment teams are doing a better job utilizing community resources in order to divert consumers from state hospital. LOS increase due to COVID state mandates and protocols.
7	Due to personnel change, there is a difference in how costs were calculated. There were higher available general fund dollars that would have lapsed, so CAMHD elected to draw from them. We were in the first year of a new grant (Data to Wisdom) which tends to have the lowest expenditure. We anticipate an increase next year.
7A	Due to personnel change, there is a difference in how costs were calculated.
14A	Caused by decrease in overall CAMHD youth count.
15	There are fewer people this year with unknown residential status. In the past, a number of them were homeless because with that group of people we often have missing demographic information.
16	Caused by decrease in overall CAMHD youth count. Total youth with SED decreased due to full year of pandemic and quarantine. Referrals, particularly from DOE were significantly lower.
20A	There were no non-forensic people in the state hospitals who were discharged this year. Hence 0%.
20B	The number of people discharged and readmitted does wax and wane from year to year.

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
