

## 2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

**Note:**

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**
**Table 14a**

Age Age calculated at midpoint of reporting period

Gender None

Race Race 'not available' includes clients that identified as 'other race' (N = 284)

Overall Populated by Hendall using 2021 Idaho's MH-CLD BCI dataset

**Table 14b**

Age Age calculated at midpoint of reporting period

Gender None

Race None

Age	Age calculated at midpoint of reporting period
Gender	None
Overall	Populated by Hendall using 2021 Idaho's MH-CLD BCI dataset

**Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2021**

**Idaho**

**Reporting Period:** 7/1/2020 To: 6/30/2021

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	100.0%	71.4%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	100.0%	71.8%	75.0%	57

<b>Co-occurring MH and Substance Abuse Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	39.0%	28.8%	26.0%	57
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	9.0%	6.1%	2.0%	57
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	39.0%	29.8%	27.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	9.0%	10.3%	3.0%	56

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

Percent of clients served by the SMHA with co-occurring MH/SA diagnosis = (number of clients that have a SUD Dx code listed in the "Substance Abuse (SA) Diagnosis" field in the MH-CLD file (field number C-20))/(Number of clients that have a Mental Health Dx code listed in the "Mental Health Diagnosis - One" field in the MH-CLD file (field number C-17)). This process was performed for both clients age 0-17 (Children) and 18+ (Adults).

**State Notes**

None

What populations are reported? All Clients Number of States Reporting All Clients: 35 Number of States Reporting Some Clients: 15

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
ID	Yes	Yes	-	-	-
US	37	23	4	9	20

### Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

### State Notes:

Age Age calculated at midpoint of reporting period.

Gender None

Overall Populated by Hendall using 2021 Idaho's MH-CLD BCI dataset

Planning for ESMI	\$0	-	\$0	-	\$0	-	\$0	-	\$642,486	99.9%	\$451	0.0%	\$0	0.0%	\$642,937	100%

Note: This table use data from URS Table 7a.

\* Other Funds include Medicaid, Other Federal funds, local funds, and other funds from table 7a.

### State Notes:

DBH implemented a new ESMI program in region 4 during SFY21 which accounts for the increased expenditures.

## Idaho

URS Table Number	General Notes
3	The decrease was due to the pandemic. Any time there is an outbreak, it disrupts admissions, requires us to section off an area of one of the units for the affected, and therefore decreases census.
4	The total number of consumers employed during state fiscal year 2021 decreased because of the COVID 19 pandemic. During this period fewer consumers considered themselves unemployed
6	<p>Our numbers served have dropped both because clients have moved off our caseloads due to Medicaid expansion. Overall, fewer people have been served, despite the increased need, during the COVID-19 pandemic.</p> <p>The COVID-19 pandemic impacted the number of persons served in inpatient settings.</p> <p>During SFY21, the COVID-19 pandemic led to many more people utilizing crisis response including mobile crisis.</p> <p>Numbers served were affected by Medicaid expansion and the transition of clients off DBH caseloads to community providers. Also, the COVID-19 pandemic impacted the number of persons served. Both conditions would impact the total number of consumers served.</p> <p>State hospital north does not serve children and the adolescent unit at state hospital south closed. Updated numbers reflecting numbers served will be available by March and will reflect the number of children/adolescents served by state hospital west, which serves children/adolescents exclusively.</p>
7	<p>DDHW rosters continued to change as a result of Medicaid expansion thereby reducing the number of clients served during the SFY. Further, the COVID 19 pandemic impacted the numbers of clients served remaining following client transition to Medicaid.</p> <p>DBH implemented a new ESMI program in region 4.</p>
7A	DBH implemented a new ESMI program in region 4 during SFY21 which accounts for the increased expenditures.
8	The DBH increased spending toward system development projects. The Idaho Federation of Families contract went into effect in the fall of 2020 (October) accounting for the increase in the "family run organization" spending (we didn't have a contract for a few years prior). TA funds were counted in the Resource and Development section which would also account for the increase in spending in that category. Additionally, our WITS data system was updated which accounts for some of the increase (in 2020 there was \$0 spent on information systems).
9	<p>As noted nationally Children and adolescents experienced losses of social connectedness due to impacts of COVID at schools and in opportunities for face -to-face interaction.</p> <p>The result may have been due to impacts of COVID but is also related to number of responses received- Those who did respond were probably statistically more likely to be those who had more negative experiences</p>
11	<p>The survey is sent by mail and not directly administered.</p> <p>The result may have been due to impacts of COVID but is also related to number of responses received- Those who did respond were probably statistically more likely to be those who had more negative experiences.</p>
12	The percentage increased slightly this SFY likely due to increased numbers of persons served through crisis mobile response (likely due to the COVID-19 pandemic).
14A	Numbers served were affected by Medicaid expansion and the transition of clients off DBH caseloads to community providers. Also, the COVID-19 pandemic impacted the number of persons served.
15	Numbers served were affected by Medicaid expansion and the transition of clients off DBH caseloads to community providers. Also, the COVID-19 pandemic impacted the number of persons served. Both conditions would impact the total number of consumers served.
16	Numbers served were affected by Medicaid expansion and the transition of clients off DBH caseloads to community providers. Also, the COVID-19 pandemic impacted the number of persons served. Both conditions would impact the total number of consumers served.
17	<p>Numbers served were affected by the COVID-19 pandemic.</p> <p>Numbers served were affected by Medicaid expansion and the transition of clients off DBH caseloads to community providers. Also, the COVID-19 pandemic impacted the number of persons served. Both conditions would impact the total number of consumers served.</p>
20A	In 2021 there were 17 readmits (11.8% decrease, but a difference of just 2 admissions; the sample size is not large enough to indicate a significant difference. Factors that led to the decrease in readmits is likely due to system changes specific to mobile crisis. Between 2020 and 2021 many regions were significantly ramping up their crisis response teams which we would expect to lead to fewer readmits.

<b>URS Table Number</b>	<b>General Notes</b>
20B	Again, the sample size is not large enough to indicate a significant difference between 2020 and 2021. Any changes between the two years would likely be due to the increase of community based mobile crisis.

## **Errata Sheet to 2021 URS Output Tables**

This page includes clarifications and corrections to 2021 URS Output Tables.

### **APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021**

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

### **APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021**

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
