

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Wisconsin 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,195,517	11.98	24.59	59
Community Utilization per 1,000 population	7,974,393	11.75	23.93	59
State Hospital Utilization per 1,000 population	114,987	0.97	0.36	53

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Age	None
Gender	None
Overall	Populated by Hendall using WI's 2021 MH-CLD BCI dataset.

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2021

Wisconsin

Reporting Period: 1/1/2020 To: 12/31/2020

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	52.4%	71.4%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	60.2%	71.8%	75.0%	57

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	7.7%	28.8%	26.0%	57
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	1.0%	6.1%	2.0%	57
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	9.0%	29.8%	27.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.0%	10.3%	3.0%	56

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Up to five Axis I MH or SA diagnoses can be recorded in the MH data system. If any of the 5 diagnoses are SA (F10-F19.99), the client is counted as having co-occurring MH/SA.

State Notes

None

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Note:

US totals are based on states reporting.

This table uses data from URS Tables 16 and 17.

US averages are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

State Notes:

Table 16: Individual client data on EBP usage is not available for CY2020 due to survey burden concerns, but may be considered again in future years. This data is not collected through client-level data systems.

Table 17: Individual client data on EBP usage is not available for CY2020 due to survey burden concerns, but may be considered again in future years. This data is not collected through client-level data systems.

Appropriateness Domain: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

Wisconsin

Reporting Period: 10/1/2020 To: 9/30/2021

Number of coordinated specialty care programs: 3

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
WI	-	-	-	-	-
US	37	23	4	9	20

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Wisconsin

URS Table Number	General Notes
14A/B	<p>State definition of SMI/SED is similar to federal definition, but worded differently: "Persons in need of ongoing, high intensity, comprehensive services - have a primary diagnosis of a major mental illness or severe emotional disturbance, and they have substantial needs for psychiatric and medical treatment, including substance abuse, daily living skills, budgeting, job training, family support and support at school. Some may have a history of trauma, such as physical or sexual abuse or neglect, which contributes to the mental health problem. Persons in this category may need help to access community resources, such as safe, affordable housing, benefits and entitlements, and legal assistance. They need support and assistance in combating stigma and discrimination. Without ongoing, comprehensive services, these persons will be at the highest risk for increased psychiatric hospitalizations or extensive reliance on placement in nursing homes, child-caring institutions, and other supervised settings; confinement in jail; homelessness; and increased harm to self. These persons will sometimes experience acute psychiatric crises as a result of increases in symptoms of mental illness or environmental stresses. Because some may be reluctant to access mental health or other services, extensive outreach may be needed to engage them into services. The person and family need ongoing, comprehensive treatment and intensive community support and wraparound services to help them achieve and maintain a more stable level of functioning and a lifestyle relying more on natural supports and less on formal mental health services." State definition also includes this group: "Persons in Need of Ongoing Low Intensity Services - have a diagnosed mental disorder. They function in a fairly stable manner but may occasionally experience acute psychiatric crises. Some may have a history of trauma, such as physical or sexual abuse or neglect, which contributes to the mental health problem. These persons need services such as ongoing medication management (prescription, evaluation, and monitoring), case management, and/or periodic support contacts. With the benefit of such services, they are usually able to live relatively independently and have good potential for recovery and increasing success in community living. Without ongoing supports and services, however, they can be at a serious risk for relapse and for much more costly treatment, including intensive crisis intervention and psychiatric hospitalization."</p>
4	<p>There was a 19% decline from 2019 to 2020 in consumers served who were employed. Overall, there was an 8% decline in all consumers served due to the pandemic's impact on provider capacity and consumer's ability to access services. The remainder of the decline is likely due to an increase in consumers leaving the workforce during the pandemic due to health risks and employer down-sizing.</p>
7	<p>Total MHBG Expenditures (Increase)- Overall Wisconsin's MHBG has continued to increase over recent years, allowing Wisconsin to increase funding to our community partners. In addition, during this grant period, Wisconsin made efforts to distribute additional flexible community-based funding to Wisconsin's county-based behavioral health system to help localities address the increased needs that had been experienced due to the pandemic. In addition, Wisconsin was able to increase funding to certain community-based programs to better address the needs of communities during the pandemic.</p> <p>Total Medicaid Expenditures (Increase) – Wisconsin has been working with our Medicaid partners over the last several years to more accurately calculate Medicaid expenses for this report. The methodology used for the calculation this year is considered more accurate and should be more consistent moving forward.</p> <p>Total Other Funds Expenditures (Increase) – Wisconsin was in receipt of additional federal discretionary grants during this period, leading to the increase during this report period.</p> <p>Total EBP for ESMI Expenditures (decrease) – This decrease is due to underspending from three grantees utilizing this funding, likely due to challenges posed by the pandemic. In addition, a smaller ESMI effort concluded the year prior and no longer received funding during this period.</p> <p>Total State Hospital Expenditures (decrease) – The calculation of this amount using state and local funding remained consistent, this decline is largely due to more accurate calculation of Medicaid expenditures.</p> <p>Total Other 24-Hour Care Expenditures (increase) – Wisconsin was more accurately able to calculate Other 24-hour Care Medicaid expenditures, this amount had not been reported in the year prior but will be more consistent moving forward</p> <p>Total Ambulatory/Community Non-24-Hour Care Expenditures (increase) – Overall increases in expenditures were observed in MHBG expenditures to provide more resources to the communities of Wisconsin in response to the pandemic. Likewise additional discretionary grants received by Wisconsin were included in this area the prior year. The largest factor impacting this increase was the improved calculation of Medicaid expenses.</p> <p>Total Administration Expenditures (increase) – This increase is due to the increased cost of operations for Wisconsin during this period.</p>
8	<p>Total MHBG Expenditures for Non-Direct Service Activities (increase) – Wisconsin worked to provide additional MHBG funding to communities throughout the State to help with pandemic related needs. This including increasing training and education, infrastructure support, and quality assurance. In addition, the DCTS Bureau of Prevention Treatment and Recovery provided additional staff time to support behavioral health programming across the state.</p>

URS Table Number	General Notes
15	There was a 20% decline from 2019 to 2020 in consumers served who were homeless or in a shelter. Overall, there was an 8% decline in all consumers served due to the pandemic's impact on provider capacity and consumer's ability to access services. The remainder of the decline is likely due to reduced provider outreach due to mobility limitations caused by the pandemic.
6	There was an 18% decline from 2019 to 2020 in consumer admissions to community programs due primarily to the pandemic's impact on community provider capacity and consumer's ability to access services. However, admissions to state hospitals were consistent across the years and lengths of stay actually increased for some populations. State mental health institutes cannot refuse admissions by law and are thus the last stop for consumers. When the pandemic caused declines in community system capacity, community providers were likely less able to handle discharges from the State MH institutes resulting in longer stays for consumers at the end of the year in the Institutes.

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
