

## 2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

# Washington 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,195,517	35.63	24.59	59
Community Utilization per 1,000 population	7,974,393	35.37	23.93	59
State Hospital Utilization per 1,000 population	114,987	0.26	0.36	53
Other Psychiatric Inpatient Utilization per 1,000 population	454,356	2.07	1.52	45

**Note:**  
This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**Notes:**

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

Age None  
Gender None  
Overall Populated by Hendall using WA's 2021 MH-CLD BCI dataset.

**Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2021**

**Washington**

**Reporting Period: 7/1/2020 To: 6/30/2021**

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	81.0%	71.4%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	73.0%	71.8%	75.0%	57

<b>Co-occurring MH and Substance Abuse Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	16.0%	28.8%	26.0%	57
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	1.4%	6.1%	2.0%	57
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	16.0%	29.8%	27.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	1.7%	10.3%	3.0%	56

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

If individuals received a HCA funded substance abuse service of any type during the reporting year; we consider that evidence of a substance abuse problem. Since they also have a mental health problem (because they received a mental health service), they are counted as having a co-occurring substance use disorder and mental health disorder.

**State Notes**

None

## Washington

URS Table Number	General Notes
2A, 2B, 3, 4, 4A, 5A, 5B, 6, 12, 14A, 14B, 15A, 15, 16, 20A, 20B, 21	The HCA manages contracts with Behavioral Health Organizations (BHOs) for mental health (MH) and substance use disorder (SUD) treatment services in regions that have implemented Fully Integrated Managed Care (FIMC) since January 2019. As the state's Medicaid program (called Apple Health) continues to implement FIMC across the state, the responsibility for behavioral health benefits coverage transfers from BHOs to FIMC plans. As a result, we are currently at the stage of data validation of encounter data within the Behavioral Health Data System (BHDS), due to data submission issues involving some of the submitting entities transitioning from BHOs to FIMC, to Behavioral Health Services Only (BHSO), and to Behavioral Health Administrative Service Organizations (BHASOs). This is the primary reason that explains the percentage changes across tables of the 2021 URS Data.
7, 7A, 8, 10	As stated in the note for tables 2A/B, 3, 4/4A, 5A/B, 6, 12, 14A/B, 15, 15A, 16, and 21, the changes of expenditures from the administrative funds and/or program funds are illustrated in these tables of HCA in 2021. In 2020, BHOs worked to bill out all of their invoices prior to the BHO to IMC transition, which resulted in an increase in spending. State expenditures increased due to several pilot programs and the Governor's initiative to increase mental health services.
9, 11, 11a	<p>Adult Social Connectedness: It is possible that in 2021, following the start of the pandemic in 2020, respondents felt more positive with respect to their family and community in 2021, having weathered the first year of the pandemic.</p> <p>For table 9- On each of the four questions that comprise the social connectedness scale, adults were more likely to give a positive rating in 2021 compared to 2020, with the percentage point increase ranging from 4 points to 14 points. The two items with the greatest increase (10 percentage points or higher) are: "I feel I belong in my community" and "In a crisis, I would have the support I need from family and friends."</p> <p>For table 11- On each of the eight questions that comprise the outcomes scale, adults were more likely to give a positive rating in 2021 compared to 2020, with the percentage point increase ranging from 5 points to 12 points. The one item with the greatest increase (more than 10 percentage points) : "I am better able to deal with crisis."</p> <p>Children/Adolescents Functioning: Similar to increases in positive ratings in adult social connectedness, it is possible that in 2021, following the start of the pandemic in 2020, children/youth respondents felt more positive with respect to their family and community in 2021, having weathered the first year of the pandemic. On each of the six questions that comprise the functioning scale, children/adolescents were more likely to give a positive rating in 2021 compared to 2020, with the percentage point increase ranging from 5 points to 12 points.</p> <p>For table 9- The two items with the greatest increase (10 percentage points or higher) are: "I am doing better in school and/or work" and "I am better able to cope with things go wrong."</p> <p>For table 11- The three items with the greatest increase (10 percentage points or higher) are: "I am doing better in school and/or work," "I am better able to cope with things go wrong" and "I am satisfied with our family life right now."</p> <p>The other factor that may be contributing to these increases in positive ratings for adult social connectedness and child/adolescent functioning is the difference in survey mode by which the data were collected in 2021 compared to 2020. In normal years, the URS data in Washington State are collected through a mixed-mode survey with telephone as the primary mode and web as the alternative mode. In 2020, because of statewide closures and the observance of strict COVID protocols and need for social distancing, the in-person staffing in the telephone lab and capabilities for conducting telephone interviews was severely limited. As a result, Washington State relied more heavily on the web mode and the introduction of a mail-in paper survey mode in order to collect the survey data, and subsequently there was a much-reduced reliance on telephone in 2020 (25% of completes by phone for adults, 36% of completes by phone for children/adolescents). As a result of this greater reliance on the web and paper modes in 2020, a lower percentage of respondents gave positive ratings when there was no interviewer present (both web and mail-in modes are self-administered). In 2021, Washington State was able to return to pre-pandemic data collection strategies that relied primarily on telephone mode with web as an alternative (88% of completes by phone for adults, 85% of completes by phone for children/adolescents). Positive ratings in 2021, being higher overall and similar to pre-pandemic levels, could very well be due to the use of telephone interviews.</p>

## **Errata Sheet to 2021 URS Output Tables**

This page includes clarifications and corrections to 2021 URS Output Tables.

### **APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021**

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

### **APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021**

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
