

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Note:

This table uses data from URS tables 5a and 5b.

Type of Medicaid Data Reported

Data based on Medicaid Eligibility, not Medicaid Paid Services.

People Served by Both includes people with any Medicaid

State Notes

5a Age None

5a Gender A coding issue inadvertently assigned 2 individuals as Not Available. Both people are Male, bringing that total to 3,396 and the Total Served to 13,745. DMH can not alter Table2a so an error is still reflected.

5a Overall Hendall completes Table 2A. If any discrepancies exist once the totals from 2A are calculated, DMH will work with Hendall to review this issue. DMH does not have access to Medicaid data prior to 2021.

5b Overall None

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Age	None
Overall	Populated by Hendall using MA's 2021 MH-CLD BCI dataset.
Gender	None

Table 6 State Notes:

Hospital	Admissions during the year decreased compared to FY20 due to COVID, including less admissions from the court system and a decrease in available bed capacity in accordance with isolation and quarantine protocols.
Other Inpatient	None
Residential	The decrease in unduplicated consumers compared to FY20 is due to IRTPs and CIRT having less capacity due to COVID outbreaks. Total admissions were higher compared to FY20 because ALOS decreased by >2 months and discharges increased.
Community	In FY20, DMH community programs continued to fully operate at near or full utilization. Decreases occurred in community programs due to COVID impacts on admissions and data cleaning for one program linked to the MassHealth.
Overall	None

General Notes FY 2021

Massachusetts

URS Table Number	General Notes
3	Table populated by Hendall. The number of consumers served by DMH in its inpatient facilities dropped in FY21 from FY20 due to effects of COVID. This includes courts being closed and not sending patients to facilities for part of the year as well as staff shortages.
4	Persons enrolled in DMH's major program, Adult Community Clinical Services (ACCS), receive employment support from the Massachusetts Rehabilitation Commission (Massachusetts' vocational rehabilitation agency). DMH and MRC executed a Data Use Agreement in FY21, which will permit MRC to provide DMH with person-level data on employment status. DMH and MRC are working on implementation of this agreement.
4A	Persons enrolled in DMH's major program, Adult Community Clinical Services (ACCS), receive employment support from the Massachusetts Rehabilitation Commission (Massachusetts' vocational rehabilitation agency). DMH and MRC executed a Data Use Agreement in FY21, which will permit MRC to provide DMH with person-level data on employment status. DMH and MRC are working on implementation of this agreement.
5A	DMH did not have access to Medicaid data prior to 2021 and could not report Medicaid data in the FY20 report. As a result, no comparison can be made between FY20 and FY21.
6	Under State Hospitals: Admissions during the year decreased compared to FY20 due to COVID, including less admissions from the court system and a decrease in available bed capacity in accordance with isolation and quarantine protocols. Under Community Programs: In FY20, DMH community programs continued to fully operate at near or full utilization. Decreases did occur on community programs, due to affects of COVID on admissions and data cleaning for one program linked to the MassHealth, the state's Medicaid program. Under Residential Treatment Centers: The total number of unduplicated consumers served in RTCs at the beginning of FY21 (55) was lower than the 60 reported at the beginning of FY20. The decrease was the result of IRTPs and CIRT experiencing a reduction in capacity due to COVID outbreaks resulting in fewer beds. The total admissions to RTCs during FY21 (80) was higher than in FY20 (66). ALOS decreased by more than two months and the number of discharges increased; thus, more admissions occurred in FY21. Only a small number of individuals (less than 10 in each of the past two years) in the 18 and older category exists for Residential Treatment Centers (RTCs). RTCs serve a defined portion of the DMH population, limited to youth and young adults under the age of 25. Given this, the response applies to the few using RTC who fall in the 18 and older category.
7	DMH received additional federal funds related to COVID which are reflected in the table and are a large part of the increase from FY20 to FY21. These funds include appropriations for the Regular Service Program related to COVID, the Project for Assistance in Transition from Homelessness, Healthy Transitions as well as a few other programs.
8	DMH increased information systems funding related to reporting for the Adult Community Clinical Services (ACCS) program, its largest community program and reporting for community Children, Youth and Family programs. Information systems, quality assurance and training and education for First Episode Psychosis (FEP) program is reported in the table as well.
9	Two adult consumer populations were surveyed in FY21. A stratified random sample was used for the Adult Clinical Community Services (ACCS) client population and a census was used for the Program of Assertive Community Treatment (PACT) client population. Reported results include all adult consumers surveyed.
11	Two adult consumer populations were surveyed in FY21. A stratified random sample was used for the Adult Clinical Community Services (ACCS) client population and a census was used for the Program of Assertive Community Treatment (PACT) client population. Reported results include all adult consumers surveyed.
11A	Two adult consumer populations were surveyed in FY21. A stratified random sample was used for the Adult Clinical Community Services (ACCS) client population and a census was used for the Program of Assertive Community Treatment (PACT) client population. Reported results include all adult consumers surveyed.

URS Table Number	General Notes
12	The calculation for the percentage of persons with a co-occurring diagnosis of substance abuse is obtained by counting the number of persons with a diagnosis of substance abuse on file in the Mental Health Information System (MHIS) as of the close of the reporting period divided by the total served as reported in Table 2 (Total Served) and Table 14 (Total SMI/SED), for whom there was a diagnosis on file in MHIS as of the close of the reporting period. Calculations for FY 19 were updated to include "F" codes for mental health and substance use disorders now used in DSM V and ICD-10, which may account for the increase in percentage of co-occurring diagnoses reported in previous years.
14A	Table to be populated by Hendall. Under Race/Ethnicity: The decrease in the percentage of Native Hawaiian/Pacific Islanders served by DMH is a result of small number of individuals that are part of this specific race category. With a reduction of only two individuals not being served by DMH in FY21, the proportion appears large at an 18% change. Since, according to the US Census, only 0.1% of the Massachusetts population is Native Hawaiian/Pacific Islander, large proportional shifts may occur when only one or two individuals are served in any given FY.
16	In FY20, PACT programs continued to fully operate at near or full utilization. The number of children served with SED reduced in FY21 due to the effects of COVID on DMH programs coupled with the likely ability of some families being able to access services through their health insurance instead of DMH. Furthermore, shifts in coding those served under case management from child to adult may contribute to the decrease.
17	Although these EBPs may be provided in some DMH programs, they are not reported as discrete services in the Mental Health Information System (MHIS) and are unavailable for reporting.
20B	DMH continued to experience impact of COVID on admissions and discharges with increasing volume committed from the court system and increases in transferring patients between facilities or discharges to and then admissions from community Respite programs for bed management purposes.
21	DMH understands the completion of Table 21 is optional and does not complete Table 21 given the difference in how DMH defines SMI and SED from the federal definition.

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
