

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Missouri 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,195,517	13.40	24.59	59

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
MO	Yes	-	-	-	Annually
US	37	23	4	9	20

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

URS Table Number	General Notes
5A	A big portion of consumers in the funding group are Medicaid eligible on spenddown. Normally, DMH covers the spenddown amount using general revenue (non-Medicaid) funds, and the rest of the month is covered by Medicaid. Spenddown payments were waived during the Covid-19 pandemic after a consumer met it once after March 2020. That means that nearly all services to consumers on spenddown were covered by Medicaid.
6	<p>In FY21 fewer youth were enrolled in residential treatment care due to circumstances described below, which impacted the overall counts (in FY21 only 6 youth were served in the Residential Treatment Center while in FY20 there were 14). The reasons include isolation/quarantining after being exposed to Covid-19 and staff shortage. Length of stay for youth in the Inpatient Program in FY21 was significantly impacted by the facility's response to manage COVID-19 during FY20 and FY21. During the early months of the pandemic and into 2021, visits with family were restricted and youth were not able to participate in off-campus family passes or other community re-integration activities. Family therapy and visits occurred via telehealth and although this helped keep therapies and discharge efforts moving forward, in some cases, the family reunification process slowed considerably. Families were reluctant to take youth home without having had any opportunities for visits and passes. This was a factor in the increase in length of stay for Inpatient youth in FY21.</p> <p>Mitigation efforts to contain COVID-19 spread also contributed to the increased length of stay in the Inpatient Program. Due to COVID-19 exposures to infected staff, Inpatient consumers often found themselves in "quarantine" or even "isolation" during FY21. If a youth was scheduled for discharge and then need to be quarantined or isolated, their discharge was delayed. In FY20, youth in the Inpatient Program collectively spent 99 days in quarantine or isolation. In FY21, with an increase in cases in the St. Louis area during the winter 2021 surge and summer 2021 Delta surge, youth in the Inpatient Program spent 1063 bed days in quarantine and/or isolation. This delayed a number of scheduled discharges, often several times for the same youth.</p> <p>Finally, workforce shortages have impacted most hospitals and facilities in Missouri, creating staffing issues at virtually all residential facilities that would be less restrictive placement options for youth in the Inpatient Program who required a residential setting rather than discharge to a community based, home setting. This delayed the discharge of several Inpatient youth by weeks, sometimes months, from the Inpatient Program.</p>
7	<p>Staffing expenditure decrease at state hospitals due to COVID Pandemic Stipend used in FY20 was not used in FY21</p> <p>Decrease in State Facility staff training in FY21</p> <p>Decrease in Federal Discretionary grants with administrative expenditures in FY21</p>
8	Increase trainings held in FY21 for Community Providers compared to FY20. Also, in FY21 MHBG Technical Assistance dollars were spent on trainings.
12	The data have been revised to include tobacco use as a substance use problem to be consistent with the previous years and the updated URS tables are sent along with these edits.
14	In January-June 2021, in anticipation of the new billing system starting July 2021, our providers updated consumers records, race included. The definition of 'More Than One Race Reported' racial group includes multiple races reported over time. The corrections in the system resulted in more consumers showing different race groups at different times, therefore the increase of multi-racial consumer counts.
15	Due to Covid-19 restrictions, fewer consumers were seen while they were in jails or other correctional facilities
16	Business rules for billing in the new claim system require the diagnosis on the encounter to be the same as a diagnosis in the consumer's episode of care. In order to comply with the rule 15 community providers revised their diagnoses on the episodes of care which led to more consumers showing SED diagnoses.

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
