

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Nebraska 2021 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,195,517	15.15	24.59	59
Community Utilization per 1,000 population	7,974,393	13.73	23.93	59
State Hospital Utilization per 1,000 population	114,987	0.45	0.36	53

Note:
This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 14a

Age Age is calculated at midpoint of reporting period.
Gender The most recent gender was used for reporting.
Race The most recent race/ethnicity data was used for reporting.
Overall None

Table 14b

Age Age is calculated at midpoint of reporting period.
Gender The most recent gender was used for reporting.
Race The most recent race/ethnicity data was used for reporting.
Overall Data are consistent with the trends of previous submissions

Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2021

Nebraska

Reporting Period: 7/1/2020 To: 6/30/2021

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	47.1%	71.4%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	45.3%	71.8%	75.0%	57

Co-occurring MH and Substance Abuse Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	12.9%	28.8%	26.0%	57
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	0.6%	6.1%	2.0%	57
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	22.6%	29.8%	27.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	0.7%	10.3%	3.0%	56

Note

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

1) Individuals had both mental health service and reported substance use diagnosis. 2) Individuals received treatment in a dual diagnosis service.

State Notes

None

Note:

This table uses data from URS tables 5a and 5b.

Type of Medicaid Data Reported

Data based on Medicaid Eligibility, not Medicaid Paid Services.

People Served by Both includes people with any Medicaid

State Notes

- 5a Age The most recent race data was used for reporting.
- 5a Gender The most recent gender was used for reporting.
- 5a Overall Based on Insurance Status and Medicaid Status fields. Medicaid status was reported for the most recent admission date within the fiscal year.
- 5b Overall Based on Insurance Status and Medicaid Status fields. Medicaid status was reported for the most recent admission date within the fiscal year. This is the same population as presented in Table 5a distributed by ethnicity.

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Age	Age is calculated at midpoint of reporting period.
Overall	Based upon our understanding of the definition of Institutions under the Justice System, we do not manage or directly pay for any services within this system type. For additional notes see General Notes.
Gender	The most recent gender was used for reporting.

Table 6 State Notes:

Hospital	Includes all individuals admitted to a State Regional Mental Health Center (forensic and non-forensic).
Other Inpatient	Includes clients admitted to one of the psychiatric inpatient hospitals within Nebraska, other than a State Regional Mental Health Centers.
Residential	None
Community	Includes clients receiving outpatient services at a State Regional Mental Health Center or clients receiving services at a community provider.
Overall	For clients without a discharge date, length of stay was calculated using June 30, 2021 as a 'discharge date'. Also see General Notes.

What populations are reported?

Number of States Reporting All Clients:

35

Number of States Reporting Some Clients:

15

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
NE	-	Yes	-	Yes	Annual Re-Registration
US	37	23	4	9	20

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Age Age is calculated at midpoint of reporting period.
 Gender The most recent gender was used for reporting.
 Overall See General Notes

Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2021

Nebraska

Reporting Period: 7/1/2020 To: 6/30/2021

Forensics included in "non forensic" data?

Note:

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

State Notes:

This state collects data for Ethnicity (Hispanic/Latino). Differences greater than 10% between FY2020 and FY2021 are generally a result of small N.

Forensics included in "non forensic" data?

Note:

US totals are based on states reporting.

This table uses data from URS Tables 20a and 20b.

State Notes:

This state collects data for Ethnicity (Hispanic/Latino). Differences greater than 10% between FY2020 and FY2021 are generally a result of small N.

Nebraska

URS Table Number	General Notes
All	Individuals included in this report are those who were served in a mental health or dual service during fiscal year (FY) 2021 through the Nebraska DHHS Division of Behavioral Health (DBH). This report does not include individuals served through Medicaid (N=45,353) funding or those who received services through one of four federally-recognized tribes (N=452) in Nebraska in the DBH mental health and dual service unduplicated counts reported within the URS tables. In FY16, DBH and the Nebraska Behavioral Health System (NBHS) changed data systems for collection of service and treatment data, converting from a vendor-operated system to a new Centralized Data System (CDS) hosted by DHHS-DBH. Data clean-up during data migration, new data entry specifications for collection of key fields (including, but not limited to SSN, DOB) and quarterly alerts to prompt providers to review and update other client fields (for example, employment, living status, criminal justice involvement, pregnancy status) have resulted in improved reporting and the accuracy of unduplication over the past several years. In addition, consistency improved due to quarterly trainings for providers on system updates and due to the creation of a library of recorded video trainings for users.
All	DBH uses unique Consumer ID's to identify clients and determine unduplicated client encounters/records.
2A	<p>Demographics and "Not Available" in the data</p> <ul style="list-style-type: none"> • The observed decrease in Native Hawaiian and Other Pacific Islander persons served is likely a factor of small N representation in the state demographics. • The decrease in number of males under age 18 and females 18-20 is possibly a factor of the social restrictions related to the Covid 19 Pandemic. • There was an increase in the total number of persons served age 65 and over that might be related to the Covid 19 Pandemic or might also be attributable to the related efforts made in the state to increase access to services. • The rate of "Not Available" that was indicated for age reduced from FY20 to FY21. • The decrease in "Not Available" responses for age could be attributed to efforts aimed at improving data collection. • There were increases in "Not Available" responses for both race and sex. More focused unduplicated data investigation revealed a marked increase in the access/use of the 24 Hour Crisis Line in FY21 (6.48%) as compared to FY 20 (5.55%). Given the nature of the 24 Hour Crisis Line data collection on ethnicity, race, and sex are not as stringent. Not Available for Sex across services was 0.20% without 24 Hour Crisis Line and 39.93% for the 24 Hour Crisis Line. For Race, across services Not Available was 12.53% whilst 24 Hour Crisis Line was 83.90%. For Ethnicity, across services Not Available was 26.85% whilst 24 Hour Crisis Line was 85.85%.
2B	<p>There has been focused effort/attention on data collection for nationally tracked demographics.</p> <ul style="list-style-type: none"> • There was a decrease in the number of Not Hispanic males below the age of 21 served from FY20 to FY21, as well as a decrease in Hispanic males aged 13-17. This decrease is consistent with the trend in the overall decrease in males under the age of 18 served in FY21. • There was an increase in Hispanic males between the ages of 18 and 20 that might be attributable to the related efforts made in the state to increase access to services. • The decrease in Not Hispanic females between 18-20 years of age is consistent with the overall drop in females between 18-20 years of age from FY20 to FY21. • The rate of "Not Available" responses for ethnicity increased, which is most likely a function of the increase in "Not Available" responses associated with the 24 Hour Crisis Line
3	The number of persons served in state psychiatric hospitals increased from FY 20 to FY 21, particularly among persons served between the ages of 21 and 64. The upward trend is consistent a trend beginning in FY18, particularly among those aged 21-64.
4	There was a decrease in the total number of adult clients reporting being unemployed, particularly among female clients between the ages of 21 and 64. In the state, there has been a continued emphasis placed on the importance of employment as a social determinant of health. This measure is tracked and discussed frequently with the partners. It is likely that this decrease in unemployment among adult clients is due to factors related to reopening after prior closures related to Covid-19.
4A	Changes in the employment status of adult clients relative to diagnosis are consistent with changes in the overall pattern of diagnoses. There were notable changes in the diagnosis clusters of "Schizophrenia & Related Disorders", "Other Psychoses", and "All Other Diagnoses" from FY 20 to FY 21. The changes from FY 20 to FY 21 are consistent with the number of diagnoses within these clusters returning to a similar level that observed in FY 19. Additionally, there was a notable increase in the cluster "No Dx and Deferred DX."

URS Table Number	General Notes
5A	<p>Medicaid Coverage</p> <ul style="list-style-type: none"> • There was a notable increase in clients funded by Medicaid, which is attributable to Medicaid expansions in the state and access to some DBH community based services that are not currently funded by Medicare. • The observed increases were mostly among clients identifying as Black or African American and White. • There was also a decrease in "Medicaid Status Not Available" for Black or African American females. • Other notable percent differences in Medicaid status across racial categories are attributable to small N issues.
6	<p>Differences greater than 10 % from FY20 to FY21 with regard to State Hospitals are primarily a function of small N and higher level of long term care. This table also represents the turnover of the clients shown in Table 2a.</p> <ul style="list-style-type: none"> • Total Served at Beginning of Year (unduplicated): This population includes clients with admission dates before July 1, 2020 and who were discharged after July 1, 2020, or were not discharged as of June 30, 2021. • Admissions During the Year (duplicated), the population was limited to records with admission date which occurred between July 1, 2020 and June 30, 2021. All unique admission dates were counted for each service type. • Discharges during the year (duplicated), the population was limited to records with discharge date which occurred between July 1, 2020 and June 30, 2021. All unique discharge dates were counted for each service type. • Length of Stay (in Days): Discharged Patients, the population was limited to those persons included in the previous column. Mean and Median number of days were calculated by subtracting the Admission date from the Discharge date of each record. • For Clients in Facility for Less than 1 Year: Average Length of Stay (in Days): Residents at end of year: the population was limited to persons who were admitted between July 1, 2020 and June 30, 2021, and did not have a discharge date. Length of stay was calculated as follows: (June 30, 2021-Admission Date). • For Clients in Facility More than 1 Year: Average Length of Stay (in Days): Residents at end of year: the population was limited to persons who were admitted prior to July 1, 2020, and did not have a discharge date as of June 30, 2021.
7	<p>Medicaid expenditures significantly increased due Medicaid expansion in Nebraska (starting October 2020) as well as a new MLTC data system resulting in enhanced ability to fully report paid claims.</p> <p>All of the difference in table 7 is due to Medicaid expansion with the exception for the Evidence Based Practices (EBP) for ESMI (or FEP).</p> <p>The differences for the Coordinated Specialty Care (CSC) (for First Episode Psychosis - FEP) in tables 7 and 7a is due to increased utilization after additional training to teams and outreach in the community</p>
9	<ul style="list-style-type: none"> • 2020 response rate on the Consumer Survey was much higher than previous years. The increased response rate was likely a function of COVID 19 Pandemic circumstances. • The level of positivity reported for 2021 regressed to a level consistent with the trend that predates 2020. • It is possible that the fluctuations observed for this measure are artifacts of change in participation rate over recent years.
11	<p>Decrease (20%) in reporting positively about outcomes for children, whereas the previous year that was an increase (22%) might be a function of social issues associated related to the COVID 19 Pandemic.</p>
12	<p>There was a decrease of adults with a dual diagnosis, which is likely a function of issues related to the Covid 19 Pandemic.</p>
14A	<ul style="list-style-type: none"> • The decrease in total males and females below the age of 25 reflects the overall trend of a decrease in persons served at the lower end of the age scale. • The increase in persons served between 65-74 years of age is also consistent with the overall related trends. • Total number of Native Hawaiian/Other Pacific Islander consumers with SMI/SED: The decrease observed among the count of Native Hawaiian and Other Pacific Islander consumers with SMI/SED served is also a reflection of a small N, which commensurate with census demographic profiles within Nebraska.

URS Table Number	General Notes
14A	<p>This table represents the distribution of the adult SMI and children/adolescent SED population, a subset of the population presented in Table 2A (see table 2 notes for more information). NE State SMI Definition: Client is age 18 or older AND has at least one of the following ICD-10 diagnoses: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89 AND meets at least one of the following criteria: GAF score less than 60; indicated functional deficit; is SSI/SSDI eligible or potentially eligible; was admitted to Community Support, Assertive Community Treatment, Psychiatric Residential Rehabilitation, Day Treatment, Day Rehabilitation, Day Support, Vocational Support, or related psychiatric rehabilitation services OR Client is age 18 or older AND Provider selected YES for Meets SMI Criteria. NE State SED Definition: Client is age 3-17 years AND has at least one of the following ICD-10 diagnoses: F20.0, F20.1, F20.2, F20.3, F20.5, F20.81, F20.89, F20.9, F22, F23, F24, F25.0, F25.1, F25.8, F25.9, F28, F29, F30.10, F30.11, F30.12, F30.13, F30.2, F30.3, F30.4, F30.8, F30.9, F31.0, F31.10, F31.11, F31.12, F31.13, F31.2, F31.30, F31.31, F31.32, F31.4, F31.5, F31.60, F31.61, F31.62, F31.63, F31.64, F31.70, F31.71, F31.72, F31.73, F31.74, F31.75, F31.76, F31.77, F31.78, F31.81, F31.89, F31.9, F32.0, F32.1, F32.2, F32.3, F32.4, F32.5, F32.8, F32.9, F33.0, F33.1, F33.2, F33.3, F33.40, F33.41, F33.42, F33.8, F33.9, F34.8, F34.9, F39, F44.89, 300.01, 300.21, 300.3, 301.13, 307.1, 307.23, 307.51, 309.81, 312.34, 314, 314.01, 314.1, 314.2, 314.8, 314.9, F40.01, F41.0, F42, F43.10, F43.11, F43.12, F44.89, F50.00, F50.01, F50.02, F50.2, F63.81, F90.0, F90.1, F90.2, F90.8, F90.9, F95.2 AND meets at least one of the following criteria: is SSI/SSDI eligible or potentially eligible; was admitted to Professional Partner Services, Special Education Services, Day Treatment, Intensive Outpatient, Therapeutic Consultation/School Wrap, or Respite Care OR Client is age 3-17 years AND Provider selected YES for Consumer Meets NE SED Criteria.</p>
15A	<p>Differences are likely explained by attention drawn toward demographic data-entry that are complete and accurate (i.e. data integrity). The differences in other demographic areas indicate that there is need for continuing efforts to draw providers' attention to data accuracy and completeness.</p>
15	<p>Differences are likely explained by attention to demographic data-entry to ensure complete and accurate (i.e. data integrity). The differences in other demographic areas indicate that there is need for continuing efforts to draw providers' attention to data accuracy and completeness.</p> <ul style="list-style-type: none"> • Total number of consumers in Jail/Correctional Facility: The observed decrease in consumers served for whom their living situation is reported as jail or a correctional facility appears to regress to a level previously observed in 2019 (pre-pandemic). A comparative review of previously submitted URS further revealed that this particular measure exhibited a high degree of fluctuation over time.
16	<ul style="list-style-type: none"> • Total number of consumers receiving Supported Housing services: It is believed that pandemic related issues, such as self-isolating behaviors, eviction moratoriums, federal renter housing assistance, and agency service provider safety protocols, were contributory factors in the decreased observed among consumers receiving supported housing services. • Total number of consumers receiving MST services: The seemingly large difference is not significant, but rather a function of small (N) in which the decrease was by two persons.
20A	<p>With limited capacity and waitlists for high-level care, "Non-Forensic Patients Readmission to Any State Psychiatric Inpatient Hospital" are not likely. Consumers are more likely to receive care in community-based services whenever this option is appropriate/available. Additionally, increased efforts to improve discharge planning and overall system flow from the state hospitals to community based services have resulted in increased discharges without readmissions for non-forensic patients. High percentages of change in readmissions from year to year are also the result of extremely small readmission sample sizes.</p>
20B	<p>With limited capacity and waitlists for high-level care, "Forensic Patients Readmission to Any State Psychiatric Inpatient Hospital" are not likely. Consumers are more likely to receive care in community-based services whenever this option is appropriate/available. Additionally, increased efforts to improve discharge planning and overall system flow from the state hospitals to community based services have resulted in increased discharges without readmissions for forensic patients. High percentages of change in readmissions from year to year are also the result of extremely small readmission sample sizes.</p>

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
