

## 2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

**Note:**

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
NM	-	Yes	-	-	-
US	37	23	4	9	20

### Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

## General Notes FY 2021

### New Mexico

URS Table Number	General Notes
7	During FY21, there was a drastic decrease in Medicaid encounters which reduced the PMPM paid to managed care organizations. This is reflected in the Medicaid total from FY20 to FY21.
7	Totals are based on Medicaid capitation and fee-for-service claims during the review period. Capitation is based on the per-member-per-month (PMPM) cost for the month where a behavioral health service was rendered.
7	Medicaid totals were provided by the NM Human Services Department, Medical Assistance Division (MAD) based on methodology of looking at encounters utilizing mental health diagnostic codes and services, provider and claim types to capture the capitation total.
7	The State Hospital totals were provided by the NM Department of Health, Behavioral Health Institute (NM BHI) for the reporting period (FY20).
4	NM gathers this information from our eligibility system to identify employment status on persons receiving services through NM Medicaid which is the largest cohort of our CLDF reporting. As the eligibility system is updated, we do pull forward the information into the CLDF for reporting, however, this is not fully complete for all persons within the system and can cause variances in our reporting totals for this item. As to our non-Medicaid population, we do collect this information through our client registration system for a greater percentage of complete data, however, the number of persons in this cohort are far less than our Medicaid population.
5	Expanded behavioral health services within the NM Medicaid program along with the Public Health Emergency has added more people to the Medicaid program. As the program numbers increased for Medicaid, the utilization of services within the non-Medicaid only funded services did see a decrease. This did impact those receiving service through both funding programs.
6	The COVID-19 pandemic has decreased the number of persons seeking treatment which has seen decreases service totals in multiple areas include inpatient facilities such as the State Hospital. The added services to NM Medicaid program which went into effect in 2019 does include expansions to services available for inpatient psychiatric care. As more services are offered clients are able to access necessary treatment. During the 2021 report period, inpatient facilities saw a reduction in persons served due to the COVID-19 pandemic due to social distancing requirements. As the result of the pandemic, the number of admissions within residential treatment centers did decline. There were more clients in the inpatient category this year compared to last. At the time of the prior year's reporting period end, the COVID-19 pandemic was announced and mitigation efforts were set in place, however as the reporting period for 2021 ended, the mitigation efforts were reduced and inpatient services began returning to pre-COVID-19 levels.
7	During the 2021 report period, there were less encounters which resulted in lower capitation rates that reduced the total amount of Medicaid expenditures during the report period. The reduced expenditures were a result of the COVID-19 pandemic which resulted in drops in consumers obtaining services. State Hospital reported in 2021 as Other Funds whereas last year they came in as local funds which show the increase in the current report period. Reported by the State Hospital in 2020 as local funds, however are other expenditures. During the 2021 report period, there were less encounters which resulted in lower capitation rates that reduced the total amount of Medicaid expenditures during the report period. The reduced expenditures were a result of the COVID-19 pandemic which resulted in drops in consumers obtaining services. During the 2021 report period, there were less encounters which resulted in lower capitation rates that reduced the total amount of Medicaid expenditures during the report period. The reduced expenditures were a result of the COVID-19 pandemic which resulted in drops in consumers obtaining services. The greatest funding stream, Medicaid, is cause for the 30% decrease from the prior year.
12	NM did experience a surge in persons served as being diagnosed with SMI/SED during the 2021 report period. The increases from prior years was substantial but reviews through claims/encounters did identify the increase trends and this is noted as part of the COVID-19 pandemic as is seen as a nationwide trend towards behavioral health. The NM Medicaid program expanded substance abuse services in 2019 through an 1115 waiver. The services associated with this waiver have been growing since their onset and as such the number of persons diagnosed with cooccurring MH and SA has increased.

URS Table Number	General Notes
14A	<p>NM did experience a surge in persons served as being diagnosed with SMI/SED during the 2021 report period. The increases from prior years was substantial but reviews through claims/encounters did identify the increase trends and this is noted as part of the COVID-19 pandemic as is seen as a nationwide trend towards behavioral health, Female and male consumers.</p> <p>NM did experience a surge in persons served as being diagnosed with SMI/SED during the 2021 report period. The increases from prior years was substantial but reviews through claims/encounters did identify the increase trends and this is noted as part of the COVID-19 pandemic as is seen as a nationwide trend towards behavioral health. This increase impacted the increase was seen in all cohorts including those consumers which are American Indian/Alaska Native.</p>
15	<p>The residence/living status for this increase is likely caused to emergency Medicaid when a person is released from a prison/jail/correctional facility. In NM, the consumer released from a correctional setting is immediately granted Medicaid coverage and in many cases a care coordinator. This Medicaid service allows those released to obtain services in behavioral health, physical health or integrated care.</p> <p>NM amongst many states across the nation has seen increases in the homeless population. From 2019 through 2020 increased 28% based on the United States Interagency Council on Homelessness. As the increases have been seen through government statistics, it is likely the growth in homelessness population is the cause for this increase.</p>
16	<p>NM has added additional monies into the supported housing program to include services that allow for treatment through Medicaid funding. As additional funds and expanded services are made available, more consumers are now able to access these services as seen in this data point.</p> <p>The COVID-19 pandemic has decreased the number of persons seeking treatment which has seen decreases in services in multiple areas including outpatient treatment.</p> <p>NM did experience a surge in persons served as being diagnosed with SMI/SED during the 2021 report period. The increases from prior years was substantial but reviews through claims/encounters did identify the increase trends and this is noted as part of the COVID-19 pandemic as is seen as a nationwide trend towards behavioral health.</p>
20A	<p>During the report period, NM reported 2 discharges of which neither person was readmitted within 30-days and 180-days.</p>
20B	<p>During the report period, NM did report few people in the State Hospital setting which impacted the rate of readmissions at 30-days and 180-days.</p>

## **Errata Sheet to 2021 URS Output Tables**

This page includes clarifications and corrections to 2021 URS Output Tables.

### **APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021**

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

### **APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021**

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
