

## 2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

**Note:**

Are Client Counts Unduplicated? Unduplicated Number of States with Unduplicated Counts 43

This table uses data from URS Table 2a, Table 2b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:**

**Table 2a**

Age None  
Gender None  
Race None  
Overall The reason for the increase of persons served is mainly because of new clients.

**Table 2b**

Age None  
Gender None  
Race None  
Overall Inputs were made on "Not Hispanic or Latino" because we didn't serve any Hispanic or Latino Orgin this year.

Total	-	-	91,385	100.0%	0.0	0.3	51

**Notes:**

US totals are based on states reporting.

This table uses data from URS Table 15a.

US penetration rates are calculated uniquely for each data element based on only those states who reported numerator (clients served) data.

**State Notes:**

Age                None  
Gender            None  
Overall            None

**Appropriateness Domain: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/AOD Disorders, FY 2021**

**Republic of Marshall Islands**

**Reporting Period:** 12/3/2020 To: 12/2/2021

<b>Adults and Children who meet the Federal Definition of SMI/SED</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who meet the Federal definition for SMI	68.0%	71.4%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	30.0%	71.8%	75.0%	57

<b>Co-occurring MH and Substance Abuse Consumers</b>	<b>State</b>	<b>US Average</b>	<b>US Median</b>	<b>States Reporting</b>
Percent of Adults served through the SMHA who had a co-occurring MH and AOD disorder	10.0%	28.8%	26.0%	57
Percent of Children served through the SMHA who had a co-occurring MH and AOD disorder	-	6.1%	2.0%	57
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance abuse diagnosis	5.0%	29.8%	27.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance abuse diagnosis	-	10.3%	3.0%	56

**Note**

This table uses data from URS Table 12.

**How are the number of clients with co-occurring disorders counted and calculated?**

I analyzed the entire admissions data for patients with dual diagnoses and with that I divided that number with the total number of admissions.

**State Notes**

None

What populations are reported? All Clients Number of States Reporting All Clients: 35 Number of States Reporting Some Clients: 15

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
MH	Yes	-	-	-	-
US	37	23	4	9	20

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

## State Notes:

Age None

Gender None

Overall The reason for this increase is more and more clients with jobs are coming to receive our services.

**Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2021**

## Republic of Marshall Islands

URS Table Number	General Notes
Table 2A	This reporting year 2020-2021 we registered 45 new patients, these numbers increased because now we do weekly exposure via radio station, social media, and or community outreaches. With more and more people getting to know about our program and the services that we offer, we are getting more walk-in patients and family members admitting their loved ones whenever they show signs of stress or abnormal behavior. Combine this number of new registered patients with our continued patients or our usual clients, which is 112, we get 157 total of patients that received services this reporting period.
Table 3	The reason for the increase in this table is due to increase in new patients. We only have one community mental health program, and that is the only mental health program here in our country. Although we are part of our national hospital, we are still operating as a community based. We do not have psychiatric hospitals, inpatient care, or any type of residential treatment centers, that is why you will see that our numbers here under community mental health will match that of table 2A.
Table 5A	Our state is not supported by medicate, hence we reported all of our patients under non medicate sources only. The reason for the increase in this table is similar to table 3, the numbers here reflects the total consumers in table 2A, which includes both continuing clients and new clients.
Table 6	The reason for this increase is also because of new patients
Table 12	The main reason for the changes in this table is migration. Most of our SMI and SED patients move either to other parts of the country or the States. However, with new patients being registered this reporting year, SED patients increased by 5% than last reporting year. For the adults and children with co-occurring diagnoses the reason for the decrease is migration either to the Outer Islands or outside of the country.
Table 15	The reason for this increase is similar to previous tables which is more patients seen.

## **Errata Sheet to 2021 URS Output Tables**

This page includes clarifications and corrections to 2021 URS Output Tables.

### **APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021**

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

### **APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021**

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
