

2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

Note:

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:
Table 14a

Age None
 Gender None
 Race Multi-racial individuals are fewer because we chose not to the database where those identifications are made as the source is getting less reliable.

	Age NA	-	-	-	13,180	4,537	7,311	-	1.80	17

Note:

Admission Rate= number of admissions divided by total served during the year

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Table 3 and 6.

Table 3 State Notes:

Age None
 Overall State Psychiatric Hospital client counts declined because of the decision not to admit civil commitments due to Covid-19. This also increased residential client counts.
 Gender None

Table 6 State Notes:

Hospital Total admissions are fewer as civil admissions were not allowed due to Covid and LOS are higher because civilly committed individuals with shorter LOS are excluded.
 Other Inpatient None
 Residential Admission and discharge dates are not collected for Residential service recipients.
 Community Numbers served at the beginning of the year are higher compared to the previous year because the total numbers served is higher due to expanded services.
 Overall None

What populations are reported? Only those 16 or older. Number of States Reporting All Clients: 35 Number of States Reporting Some Clients: 15

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
OR	Yes	-	-	-	-
US	37	23	4	9	20

Note:

*In Labor Force is the sum of consumers employed and unemployed.

**With Known Employment Status is the sum of consumer employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

State Notes:

Age None

Gender None

Overall Those not in labor force are higher this year compared to the preceding year mainly due to increases in retirement and homemakers because of the pandemic.

Outcomes Domain: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2021

Oregon

12	3b.1 and 3b.2- (1) SAMHSA left the definition of SMI and SED to the states, and (2) there is no a standardized federal definition with its own instruments that I can use to compare our definition. Oregon's definitions are provided in the General comment sheet as set of ICD 10 diagnosis codes. I cannot assess what percent of Oregon's SMI/SED population meets the federal definition without comparing the two

Errata Sheet to 2021 URS Output Tables

This page includes clarifications and corrections to 2021 URS Output Tables.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
