

## 2021 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2021 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2021: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2021, 8,195,517 clients received SMHA services from 59 states. This is an increase from 8,013,396 SMHA clients in 2020. There were 5,789,234 adults (or 17.3 per 1,000), 2,175,848 children (or 29.9 per 1,000) served. About 9,311 (0.1 percent) clients were missing age data.
- Among SMHA clients, there were 4,342,545 (53.0 percent) females served while there were 3,806,666 (46.4 percent) males served. In 21 states and U.S. territories, more SMHA males were served than females. While in 38 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 32.9 percent, followed by ages 45-64 with 23.6 percent, children ages 0-12 with 14.8 percent, and children ages 13-17 with 12.1 percent.
- The highest percentage of SMHA clients that were served was among the White population with 58.1 percent, followed by Black or African Americans with 17.9 percent, and only 15.7 percent for Hispanics.

**Note:**

This table uses data from URS Table 14a, Table 14b and from the US Census Bureau. All denominators use US Census data from 2020

US totals are calculated uniquely for each data element based on only those states who reported clients served.

Regional groupings are based on SAMHSA's Block Grant Regions.

Local Funds (excluding local Medicaid)	\$254,568	0.0%	4.5%	-	-	0.8%
Other	\$588,334	0.1%	0.5%	-	-	3.5%
<b>Total</b>	<b>\$988,864,144</b>	<b>100%</b>	<b>100%</b>	<b>\$268,528,451</b>	<b>100%</b>	<b>100%</b>

**Note:**

This table uses data from URS Table 7

Ambulatory/Community includes Primary Prevention, Evidence-Based Practices for Early Serious Mental Illness, and Other 24-Hour Care expenditures

This table does not show expenditures for state central office including Research, Training, and Administration expenses.

**State Notes:**

Ohio is unable to provide breakdown of Medicaid expenditures by the categories provided, so the total amount was provided as Ambulatory/Community Care.

**Structure Domain: Federal Mental Health Block Grant Expenditures for Non-Direct Service Activities, FY 2021****Ohio****Reporting Period: 7/1/2020 To: 6/30/2021**

Service	Non-Direct Block Grant Expenditures	% Total	US % Total
Information Systems	\$510,379	19.1%	4.4%
Infrastructure Support	\$935,334	35.0%	25.0%
Partnerships, community outreach, and needs assessment	\$592,095	22.1%	23.4%
MHA Planning Council Activities	\$615	0.0%	2.4%
Quality assurance and improvement	-	0.0%	10.8%
Research and Evaluation	\$35,000	1.3%	10.9%
Training and Education	\$600,879	22.5%	23.2%
Total	\$2,674,302	100.0%	100.0%

Note: This table use data from URS Table 8.

**State Notes:**

Some expenditures appear on this table and Table 10. Planning Council payments were significantly lower due to no reduced travel and stipends for virtual meetings

**Structure Domain: Mental Health Programs Funded By the Federal Mental Health Block Grant, FY 2021**

## General Notes FY 2021

### Ohio

URS Table Number	General Notes
All	Our client level data collection method changed this past year with the implementation of a new data system (OBHIS-Ohio Behavioral Health Information System). This likely affected our overall count of number served.
4	The number of valid employments collected for Table 4 was a very limited proportion in the data, fluctuation in percentage would be magnified for such a small sample size.
5A	There is a slight increase in the major category in Table 5A, the Medicaid only group, which accounts for the decreases in the Non-Medicaid funds only and both the Medicaid and Non-Medicaid funds group.
6	<p>Decrease in Admission at State Hospital: There was fluctuation in admission and discharge for State Hospital during the covid-19 period. The State Hospitals were closed to new admission for a period of time during the pandemic period.</p> <p>Increase in Community Treatment program: There was fluctuation in admission and discharge for community treatment program during the covid-19 period.</p> <p>New admission during the pandemic period was affected.</p> <p>LOS of children discharged in State Hospital: There was only one case of child admitted at State Hospital during FY2020 and No child admitted during the FY2021.</p> <p>LOS of children at end of year in State Hospital: There was only one case of child admitted at State Hospital during FY2021 and No child admitted during the FY2020.</p> <p>LOS of adult discharged in State Hospital: There was fluctuation in admission and discharge for State Hospital during the covid-19 period.</p> <p>LOS of adult at end of year in State Hospital: There was fluctuation in admission and discharge for State Hospital during the covid-19 period.</p>
7	<p>Other Funds increase was likely due to federal stimulus awards.</p> <p>Local funds and other were slight variance in Local levy dollars and FEP team expenditures reported as other non state or federal, may have been private donation or other gift.</p> <p>Ohio made more investments in suicide prevention in both state and Block Grant spending that accounts for the increase in Primary Prevention expenditures.</p> <p>Data Reporting from FEP Teams improved with more teams reporting non-Block Grant FEP/ESMI expenditures than in the past.</p>
7A	Local and Other funds account for increase among reported expenditures by individual FEP Teams. See Above for explanation
12	Ohio can not provide a hypothesis for the 5% decrease in adults served with a co-occurring MH/SA diagnosis. This could be an artifact of our TEDS data collection, or an naturally occurring decrease in co-occurring clients.
14A	This was a fluctuation within a very small group among the population in Table 14A, less than 0.05%. Fluctuation for such a small group would easily create large yearly differences.
15	The number of valid residency information collected for Table 15 was a very limited proportion in the data, fluctuation in percentage would be magnified for such a small sample size.

## **Errata Sheet to 2021 URS Output Tables**

This page includes clarifications and corrections to 2021 URS Output Tables.

### **APPROPRIATENESS DOMAIN: Living Situation of Consumers Service by State Mental Health Agency Systems, FY2021**

The table counts and percentages have been updated due to a processing error in the “Not Available” category.

### **APPROPRIATENESS DOMAIN: Adults with SMI and Children with SED Receiving Evidence-Based Services for First Episode Psychosis (FEP), 2021**

The table counts and percentages have been updated in “CSC-FEP Fidelity and Training State” and “Clients Served by Programs With and Without CSC-FEP Fidelity” due to a processing error in counting several fidelity programs.
