NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Only facilities responding to the relevant instrument questions are counted in this table.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

NOTE: Percentages may not sum to 100 percent because of rounding.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Utilization rates may be more than 100 percent, because the substance use treatment clients may also occupy non-designated beds.

³ Commonwealth of the Northern Mariana Islands, Guam, Republic of Palau, and U.S. Virgin Islands.

NOTE: Only facilities reporting beds are counted in the above table. Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

MAT = medication assisted treatment.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Any MAT type for all facilities providing medication-assisted opioid therapy includes all facilities (OTP and non-OTP) providing methadone, buprenorphine, or naltrexone.

³ Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.

⁴ Any MAT type for non-OTP facilities includes facilities providing buprenorphine or naltrexone.

MAT = medication assisted treatment.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.
² Any MAT type for all facilities providing medication-assisted opioid therapy includes all facilities (OTP and non-OTP) providing methadone, buprenorphine, or naltrexone.
³ Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.
⁴ Any MAT type for non-OTP facilities includes facilities providing buprenorphine or naltrexone.

CARF = Commission on Accreditation of Rehabilitation Facilities; COA = Council on Accreditation; HFAP = Healthcare Facilities Accreditation Program; NCQA = National Committee for Quality Assurance.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Facilities that have opioid treatment programs certified by the Substance Abuse and Mental Health Services Administration.

³ Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

² Client count reported is an estimation of the total number of adult clients having the listed substance use problems. The estimation is based on the overall clients reported to have the listed substance use problems and is derived from the reported proportion of all adult clients to overall clients. Because these numbers are estimations subject to rounding, the sum of the specific columns may not equal to the total column.

NOTE: Only facilities reporting beds are counted in the above table of facility, client, and bed counts. In addition, as client and bed count data were reportable by one facility for facilities other than itself (e.g., a network of facilities), the above table uses data that were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² A facility was ineligible if it had closed or was not providing mental health treatment services.

³ Response rate calculated as *Total respondents* divided by *Total eligible*.

⁴ Excludes facilities deemed out of scope for this report.

⁵ Mode of response for facilities included in the report.

⁶ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

³ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

NOTE: Only facilities reporting beds are counted in the above table of facility, client, and bed counts. In addition, as client and bed count data were reportable by one facility for facilities other than itself (e.g., a network of facilities), the above table uses data that were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Created variable; includes facilities that accept all of the following: children (12 years or younger), adolescents (13-17 years), young adults (18-25 years), adults (26-64 years), and seniors (65 years and older).

⁴ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁵ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

-- Value is zero.

LGBTQ = lesbian, gay, bisexual, transgender, queer/questioning.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ Forensic clients are clients referred from the court/judicial system.

⁵ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ These funds are Indian Health Service (IHS) funds administered by Indian tribes under P.L. 93-638 contracts.

⁵ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

NOTE: Mental health treatment admissions data are the sum of all admissions, readmissions, and incoming transfers to all service settings (inpatient, residential, and outpatient) combined. The numbers may be a duplicated count of persons since a person may have been admitted, readmitted, or transferred to one or more service setting within a single facility or to a service setting in another facility during the year.

RTC = residential treatment center.

¹ Number of clients represents the sum of the number of clients reported to have received treatment services in 24-hour hospital inpatient or residential settings on March 31, 2022, and in less-than-24-hour outpatient or partial hospitalization/day treatment settings in March 2022 and who were still active (on the rolls) on March 31, 2022.

² General hospitals consists only of non-federal general hospitals with separate psychiatric units.

³ Includes non-hospital residential, plus either outpatient and/or partial hospitalization/day treatment.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

²Commonwealth of the Northern Mariana Islands, Guam, Republic of Palau, and U.S. Virgin Islands.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations, such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

NOTE: Percentages may not sum to 100 percent because of rounding.

CARF = Commission on Accreditation of Rehabilitation Facilities; COA = Council on Accreditation; HFAP = Healthcare Facilities Accreditation Program; NCQA = National Committee for Quality Assurance.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Commonwealth of the Northern Mariana Islands, Guam, Republic of Palau, and U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Client count reported is an estimation of the total number of adult clients having the listed substance use problems. The estimation is based on the overall clients reported to have the listed substance use problems and is derived from the reported proportion of all adult clients to overall clients. Because these numbers are estimations subject to rounding, the sum of the specific columns may not equal to the total column.

NOTE: Only facilities reporting beds are counted in the above table of facility, client, and bed counts. In addition, as client and bed count data were reportable by one facility for facilities other than itself (e.g., a network of facilities), the above table uses data that were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

¹ General hospitals consists only of non-federal general hospitals with separate psychiatric units.

² Includes non-hospital residential, plus either outpatient and/or partial hospitalization/day treatment.

NOTE: Client count data were reportable by one facility for facilities other than itself -- e.g., a network of facilities. For accuracy in certain calculations (summary statistics, as well as "per facility" calculations), such data reported by one facility for a number of facilities greater than itself were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

³ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

NOTE: Only facilities reporting beds are counted in the above table of facility, client, and bed counts. In addition, as client and bed count data were reportable by one facility for facilities other than itself (e.g., a network of facilities), the above table uses data that were transformed to distribute those counts within the network of facilities. The process for distributing such data is outlined in the N-SUMHSS report appendices. This distribution of data was done irrespective of the inclusion status of each individual facility. As a result, given the variability in report-inclusion status between the reporting facility and other facilities in a network, data may differ from other tables in this report that used count data as originally reported by the reporting facility.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

-- Value is zero.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Created variable; includes facilities that accept all of the following: children (12 years or younger), adolescents (13-17 years), young adults (18-25 years), adults (26-64 years), and seniors (65 years and older).

⁴ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁵ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

³ Languages provided by staff may sum to less than the number of facilities that offer treatment in any language other than English, since some facilities use on-call interpreters exclusively.

⁴ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

-- Value is zero.

¹ Facilities operated by federal agencies are included in the states in which the facilities are located.

² Number of facilities can sum to more than the total column because a facility may respond to multiple categories.

³ Puerto Rico and the other U.S. territories are included in the total number of facilities, but not in the totals for any Census region.

⁴ These funds are Indian Health Service (IHS) funds administered by Indian tribes under P.L. 93-638 contracts.

⁵ Other jurisdictions include American Samoa, Commonwealth of the Northern Mariana Islands, Guam, and the U.S. Virgin Islands.

NOTE: Mental health treatment admissions data are the sum of all admissions, readmissions, and incoming transfers to all service settings (inpatient, residential, and outpatient) combined. The numbers may be a duplicated count of persons since a person may have been admitted, readmitted, or transferred to one or more service setting within a single facility or to a service setting in another facility during the year.

CCBHC = Certified Community Behavioral Health Center; CMHC = community mental health center; RTC = residential treatment center; VAMC = Veterans Affairs medical center;

¹ General hospitals consists only of non-federal general hospitals with separate psychiatric units.

² Includes non-hospital residential, plus either outpatient and/or partial hospitalization/day treatment.

³ "Total number of clients" row reflects row percents of total clients included in report. All other rows reflect column percents per client characteristic.

NOTE: The sum of the client counts in separate demographic characteristics may not add up to the total number of clients: (1) some facilities may provide total client counts but not report the specific demographic category breakdown; (2) some facilities may provide demographic client counts that do not sum to the facilities total client count. *Unknown or not collected* means the information was unknown to, or not collected by, the facility.
