

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

State Psychiatric Hospitals None

Other Psychiatric Inpatient None

Residential Treatment Centers None

Overall None

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

Alabama

Reporting Period: 10/1/2021 To: 9/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	89.4%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	96.8%	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	18.8%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	1.4%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	19.8%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	1.3%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Primary ICD 10 Diagnosis and Primary ICD 10 Substance Use Diagnosis are captured in the DMH Central Data Repository for each client served. If the client has a diagnosis in both of these fields, the client is counted as having a co-occurring disorder.

State Notes:

None

General Notes FY 2022

Alabama

URS Table Number	General Notes
2A/B, 3, 4, 4A, 5A/B, 14A/B, 15, 15A, 20A/B	This is Alabama's 10th year of reporting Client Level Data.
6	<p>Total admissions to the state hospital decreased due to workforce issues and pausing admissions to Bryce State Hospital.</p> <p>LOS at DMH Unit at EAMC serving adolescents had an increased LOS due to having some complex adolescents that were under an involuntary commitment that could not be discharged.</p>
7	<p>Total Medicaid Expenditures were linked to an expansion of community-based services and an expansion of Crisis Services and School-Based Mental Health Collaboration services.</p> <p>Total State Funds Expenditures were linked to the expansion of community-based services, especially Crisis Services and School-Based Mental Health Collaboration services.</p> <p>Total EBP for ESMI Expenditures are linked to the expansion of these resources.</p> <p>Total Ambulatory/Community Care Expenditures were linked to the expansion of community-based services, especially Crisis Services and School-Based Mental Health Collaboration services.</p>
7A	Total CSC for FEP increased due to expansion of these services, training, fidelity monitoring, etc.
14A/B	<p>SMI Definition: a Person who meets the diagnosis and disability criteria or who meets the criteria for high risk. Disability Criteria (must meet at least two criteria plus diagnosis criteria): (1) Is unemployed, is employed in a sheltered setting or has markedly limited skills and a poor work history. (2) Shows severe inability to establish or maintain personal social support systems. (3) Shows deficits in basic living skills. (4) Exhibits inappropriate social behavior. High Risk (must meet one of the criteria), (1) History of DMH/MR supported inpatient or public residential treatment as a result of an Axis I Mental Illness diagnosis. (2) Person would become at imminent risk of needing inpatient hospitalization without outpatient intervention.</p>
14A/B	SED Definition: Person must meet the diagnosis criteria and Separation from Family or meet diagnosis criteria and Functional Impairments/Symptoms/Risk of Separation Criteria.
