

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Colorado 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	22.63	24.37	59
Community Utilization per 1,000 population	7,900,059	21.83	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.17	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	-	1.53	42

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Overall None

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

Colorado

Reporting Period: 7/1/2021 To: 6/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	71.3%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	57.4%	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	7.0%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	1.0%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	6.6%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	1.0%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Co-occurring is collected by referencing other diagnoses submitted on the Colorado Client Assessment Record. If there is an SUD diagnosis, then the client is assumed co-occurring.

General Notes FY 2022

Colorado

URS Table Number	General Notes
5A	The State has been continually working on getting more clients who are eligible to be covered by Medicaid and on enrolling clients who qualify in Medicaid covered services into those services and to utilize block grant dollars as a safety net for clients/situations when Medicaid is not available.
6	Eight Residential Treatment Centers for Youth lost their designation status in FY22, which led to overall decreases in admission rates. Two Residential Treatment Centers for Youth lost their designation status at the end of FY21, leading to a lower number of consumers served at the beginning of the year.
6	The change specifically for state hospitals can be attributed to a small n.
7	Total Other Funds Expenditures: Department of Health Care Policy and Finance reported \$41,965,965 for FY22. The increase in anti-psych expenditure is driven in equal parts by high caseload growth as a result of the continuous coverage policy mandated by the Families First Coronavirus Response Act during the PHE, and an increase in Per Capita costs. The increase in Per Capita cost is driven by an increase in member utilization as well as annual rate increases for the drugs.
7	Total EBP for ESMI Expenditures: Program added 2 new vendors for ESMI services and increased the program spending by \$150,000 per new vendor.
7	Total Other 24-Hour Care Expenditures: Program did not contract for other 24-hour care in SFY22. Funding was moved to ambulatory/community non-24-hour care expenditures.
7	Total Ambulatory/Community Non-24-Hour Care Expenditures: Program did not contract for other 24-hour care in SFY22. Funding was moved to ambulatory/community non-24-hour care expenditures.
7	Total Administration Expenditures: FY23 is correct. FY 22 expenditures were over reported by \$599,500.
8	Total MHBG Expenditures for Non-Direct Service Activities: Increased infrastructure support expenditures and personnel expenditures due to the formation of the Behavioral Health Administration.
9, 11, 11a, 19a, 19 b	Note that the 2022 experience of care surveys administered received a relatively low response rate. Multiple factors may have contributed to this, including a large proportion of addresses that resulted in undeliverable mail. Response rates may have also been impacted by lingering effects of the COVID-19 pandemic. An increase in survey-based research during the pandemic may have contributed to survey fatigue. Further, studies have also found that during the pandemic, the characteristics of survey respondents shifted, with respondents more likely to be older, non-Hispanic, have a higher education level, and a higher income compared to prior survey years. While we cannot conclusively determine that the demographics of respondents in the 2022 experience of care surveys were statistically different from past years, demographic data collected show this may have occurred to an extent.
9, 11, 11a, 19a, 19 b	Results from the 2022 experience of care surveys are not comparable to past years' results due to changes in survey questionnaires and administration methods. Prior years' survey samples may have included people who received behavioral health care at non-community mental health center providers. Further, the 2022 survey questionnaires were modified with many questions being omitted and thus measures used to comprise the domains (social connectedness, functioning, access, quality, outcomes, participation in treatment planning, general satisfaction, and cultural sensitivity) are different than in past years.
15	Due to a relatively small n, total number of consumers in jail/correctional facilities returned to a level last seen in 2019.
16	Overall, all services were utilized less in 2022 as the total number of children with SED decreased in year 2022. The dataset shows no consumer utilized MST or Family Functional Therapy services in FY2022.
16B	Colorado receives crisis data in aggregate from crisis providers and is unable to de-aggregate the data in order to populate this table.
17	Illness Self Management and Recovery: The number of 18-20 year olds who utilized this service decreased by over half from 2021 to 2022 which could be associated with this decrease. Medication Management: The number of 21-64 year olds who utilized this service decreased significantly from 2021 to 2022 which could be associated with this decrease.
20A, 20B	Changes are due to patients who left for medical treatments and then returned.
