

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Michigan 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	24.32	24.37	59
Community Utilization per 1,000 population	7,900,059	24.32	23.53	59
State Hospital Utilization per 1,000 population	108,725	-	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	2.57	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	28.0%	51.2%	58
Employed (percent with Employment Data)**	890,626	15.6%	27.2%	58

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

General Notes FY 2022

Michigan

URS Table Number	General Notes
5	Decrease in non-Medicaid persons served due to more people on Medicaid during PHE with no redeterminations.
9	This data is not available. We are not currently conducting consumer satisfaction survey for SMI. We plan to implement one in the next few years.
11	This data is not available. We are not currently conducting consumer satisfaction survey for SMI. We plan to implement one in the next few years.
11A	This data is not available. We are not currently conducting consumer satisfaction survey for SMI. We plan to implement one in the next few years.
12	The increase of 1% in FY22 data is due to refinement work on the BH-TEDS file. There is some variation.
15	The increase in the number of consumers in jail/correctional facilities could also be due to refinement work on the BH-TEDS file. Also could be possible due to increased efforts for SUD interventions. 674 consumers served did not have age data available, but were associated with jail/correctional facility.
16A	Due to workforce shortage issues staff trained in EBP's have left positions. This has caused a decrease in children receiving MST.
16B	Data is not yet available for this table.
17	Due to workforce capacity issues across the system, with CMHSP staff leaving and the agency being unable to fill vacancies and since FPE is not a required service for agencies or part of network adequacy standards, it has taken a back seat to other services as staffing attempts are being maintained to meet needs. Some current/recent FPT teams are struggling to recruit staff or even keep them on board long enough to get them trained. In-person versus telehealth has also continued to be a challenge with figuring out and learning how to maintain fidelity core components.
