

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:****Table 2a**

Age None  
 Gender The category "other" is not used in this data set. Data for pregnant women is not available.  
 Race None  
 Overall Total number of clients for MN CY 2021 is 345,102. Populated by BHSIS Project Office using MN's 2022 MH-CLD BCI dataset.

**Table 2b**

Age None  
 Gender The category "other" is not used in this data set. Data for pregnant women is not available.  
 Race None  
 Overall Populated by BHSIS Project Office using MN's 2022 MH-CLD BCI dataset.

**Note:**

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## General Notes FY 2022

### Minnesota

URS Table Number	General Notes
4	Increase in total number of consumers unemployed may reflect our efforts at identifying unemployed consumers in our MACIS database and MHIS database.
5A	Total number of consumers with non-Medicaid funding only—may be a result of other funding streams activated during COVID and continued (i.e. grants, specific grants for behavioral health service types etc.).
6	Table 6 Average LOS of adults (in facility < year) who were state hospital residents at end of the year: increased during the year period.
7	Year 2021 did not have the expenditures tallied.
7A	Total CSC-Evidence-Based Practices for First Episode Psychosis expenditures were not tallied.
12	It appears the method of evaluation was changed; it may be a change in how diagnosis was counted and attributed.
15	The decrease in Private residence counts may be due to more housing solutions. The increase in Total number of consumers in Jail/Correctional facility is in the anticipated direction.
16	Data privacy limits reporting.
20A	The increase from 8% to 10% may reflect individuals' circumstances and need for behavioral health care.
20B	The increase in readmissions is consistent; however, the percent is high.
