

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

North Carolina 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	9.15	24.37	59
Community Utilization per 1,000 population	7,900,059	7.62	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.14	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	1.41	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	34.4%	51.2%	58
Employed (percent with Employment Data)**	890,626	29.5%	27.2%	58

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Overall This Data is based on the Universe File. Please see general comments.

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition for SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring MH/SU Disorders, FY 2022

North Carolina

Reporting Period: 7/1/2021 To: 6/30/2022

Adults and Children who meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	75.7%	69.7%	74.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	15.0%	69.0%	74.0%	57

Co-occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring MH and SU disorder	32.0%	26.4%	22.5%	56
Percent of Children served through the SMHA who had a co-occurring MH and SU disorder	6.0%	5.7%	2.5%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	37.0%	29.8%	24.0%	56
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	11.0%	10.5%	3.0%	56

Note:

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

Denominator is the total number of persons served that have an SMI/SED diagnosis as a principle diagnosis. The numerator is the subset of the denominator data set that also has a substance use diagnosis.

General Notes FY 2022

North Carolina

URS Table Number	General Notes
3	Since COVID-19, staff vacancy rates are increasing each year for both HCTs and Nursing staff causing decreased capacity to serve patients.
6	Since COVID-19, staff vacancy rates are increasing each year for both HCTs and Nursing staff causing decreased capacity to serve patients. LOS for both the adult and children populations have increased due to decreased community capacity, delays in discharge placement and limited options for appropriate levels of care. These factors are also caused by risks and effects of COVID-19 on the community-based providers, including staff shortages and infection control management.
7	The Division received an increase in available funds in the block grant budget for SFY 22. In 2021, the Division received additional COVID-19 federal funding for Mental Health Services. According to information provided by the Division of State Operated Healthcare Facilities (DSOHF), the decrease is due to a reduction in the revenue rate that is a direct correlation of census of patients at each facilities, which resulted in a reduction in expenditures. The division was able to allocate more funds to the Local Managing Entities to provide additional services in the community in addition to adding an FEP site. The additional site required an additional FTE to reduce the wait list. Increased cost allocation, got staff.
7A	The Division was able to allocate more funds to the Local Managing Entities to provide additional services in the community in addition to adding an FEP site. The additional site required an additional FTE to reduce the wait list.
8	The increase is due to an increase in funding allowing for increased expenditures in this category. Further, the national staffing shortages required NC to address infrastructure and service gaps, resulting in increased expenditures in this area.
16	The reason for decrease in consumers receiving Therapeutic Foster Care services is due to the small N. This is an artifice of how the state is populating the numbers in the table.
20A	It has been determined that the drop in readmission rate is due to do staffing shortages bottlenecking our ability to admit new patients efficiently. Our waitlist time is longer resulting in more people waiting greater than 30 days to be admitted.
