

2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

Northern Mariana Islands 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	8.37	24.37	59
Community Utilization per 1,000 population	7,900,059	7.16	23.53	59
State Hospital Utilization per 1,000 population	108,725	2.14	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	-	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	54.4%	51.2%	58
Employed (percent with Employment Data)**	890,626	37.3%	27.2%	58

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

	Age NA	-	-	-	37,411	11,454	3,577	-	10.46	17

Note:

Admission Rate= number of admissions divided by total served during the year.

U.S. Admissions During Year uses data from states reporting data only. States are only included in "U.S. Total Served" if they also reported data on admissions.

U.S. Total Served During Year is calculated using data in URS Table 3.

This table uses data from URS Tables 3 and 6.

General Notes FY 2022

Northern Mariana Islands

URS Table Number	General Notes
3	The stats noted in Table 3 are directly sourced from the Psychiatric Ward admissions and discharge registry.
4	The decrease in employed and unemployed categories may have resulted from the uncollected employment data from our psychiatric ward registry.
6	The increase of 251% from 2021 to 2022 was partly due to the COVID pandemic crisis. In 2021, the SMHA provided limited services, and most were conducted virtually.
6	The CGC has seen a great increase in clients seeking services since the pandemic protocols have been lifted.
7, 8	The increases/percentage increase accounts for all supplemental funding, which includes the following: ARPA COVID Supplemental Local State Funding-In-kind support
8	Note that this figure does not include the 5% indirect Cost and 5% Crisis Services.
11	The appropriate programs within the Community Guidance Center served all those with co-occurring disorders. This should indicate 100% for both categories.
16	In 2021, the SMHA provided limited services, and most were conducted virtually. This is a result of the COVID-19 Pandemic Crisis in which certain protocols were still in place to safeguard providers and clients. In 2022, in-person client services resumed and have resulted in a significant increase.
16	The CGC has seen a great increase in clients seeking services, these include SMI patients, since the pandemic protocols have been lifted.
16B	The Community Guidance Center's Crisis Response services has not been fully implemented. Current efforts to fully staff the program are currently in the works along with other activities to support and provide the services.
17	In 2021, the SMHA provided limited services, and most were conducted virtually. This is a result of the COVID-19 Pandemic Crisis in which certain protocols were still in place to safeguard providers and clients. In 2022, in-person client services resumed and have resulted in a significant increase.
17	The CGC has seen a great increase in clients seeking services, these include SMI patients, since the pandemic protocols have been lifted.
