

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

## Rhode Island 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	31.40	24.37	59
Community Utilization per 1,000 population	7,900,059	31.31	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.18	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	-	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	45.0%	51.2%	58
Employed (percent with Employment Data)**	890,626	23.7%	27.2%	58

**Note:**

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## General Notes FY 2022

### Rhode Island

URS Table Number	General Notes
6	Total Admissions to State Hospital During the Year: State hospital is in a period of a lot of change, so there has been a great deal of variety in the admissions. There is no distinct reason for this moderate increase.
	Average LOS of adults discharged from State Hospitals: Discharges from longest LOS patients are the reason for the large decrease in average LOS but relatively small change in median LOS for discharged.
7	<p>Total MHBG Expenditures: More expenses posted in FY22 than FY21. Also some of the expenses posted in FY22 were from FY21 and they were late.</p> <p>Total Other Funds Expenditures: Some discretionary grants ended in FY22 and/or were in their final year.</p> <p>Total Primary Prevention Expenditures: We added this to our Regional Prevention Task Force contracts in FY22.</p> <p>Total EBP for ESMI Expenditures: Reprocured contracts, which caused a delay in spending.</p> <p>Total State Hospital Expenditures: Significant reduction in state hospital Medicaid billing due to the hospital being in IMD as well as the decision being made that we would also not bill any patient that was dual eligible (medical and psych).</p>
7A	Total CSC-Evidence-Based Practices for First Episode Psychosis Expenditures: Reprocured contracts, which caused a delay in spending.
8	Total MHBG Expenditures for Non-Direct Service Activities: Reallocation of funds due to new procurements.
14A	<p>Total number of Native Hawaiian/Other Pacific Islander consumers with SMI/SED: Relatively a very small proportion of the 30k+ served. Could be related to reporting issues or just fewer individuals of this racial group seeking treatment.</p> <p>Total number of Multi-racial consumers with SMI/SED: We have noted generally that multi-racial is under reported. We have also noted that some providers do not have the option in their current system to select multiple races. We will continue auditing this to ensure that data quality is not slipping, but confirming that this accurately reflects what is in our dataset. There is no definitive reason for the decrease.</p>
16	Total number of consumers receiving Supported Housing services: These are separately reported through templates by our providers and the reporting is not audited. Providers sometimes do not submit all of their data.
16B	Not currently able to split by age and not able to calculate access to service.
