

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

## Texas 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	15.03	24.37	59
Community Utilization per 1,000 population	7,900,059	14.95	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.56	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	0.29	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	61.8%	51.2%	58
Employed (percent with Employment Data)**	890,626	30.5%	27.2%	58

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	62.2%	77.7%	52

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	64.4%	70.7%	47

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	5,477	7.0%	7.8%	44
State Hospital Readmissions: 180 Days	13,252	17.4%	18.9%	48
State Hospital Readmissions: 30 Days: Adults	5,064	7.1%	8.0%	42
State Hospital Readmissions: 180 Days: Adults	12,250	17.6%	19.3%	46
State Hospital Readmissions: 30 Days: Children	413	5.0%	6.5%	21
State Hospital Readmissions: 180 Days: Children	1,002	14.2%	15.7%	22

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,235,783	90.3%	85.8%	58
Homeless/Shelter	199,656	3.7%	4.0%	53
Jail/Correctional Facility	69,379	0.7%	1.4%	52

**Note:**

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## State Notes:

What populations are reported?

Number of States Reporting All Clients:

34

Number of States Reporting Some Clients:

12

When is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
TX	-	-	-	-	-
US	35	19	3	8	19

## Note:

\*In Labor Force is the sum of consumers employed and unemployed.

\*\*With Known Employment Status is the sum of consumers employed, unemployed and not in labor force.

Consumers employed as a % of those in labor force uses adults employed and unemployed as the denominator.

Consumers employed as a % of known employment status uses the sum of persons employed, unemployed and not in labor force as the denominator.

This table uses data from URS Table 4.

## State Notes:

Age None

Gender None

Overall Populated by the BHSIS Project Office using TX's 2022 MH-CLD BCI dataset.

## General Notes FY 2022

### Texas

URS Table Number	General Notes
6	<p>The reason for the increase in the consumers served in Other Psychiatric Inpatient Settings has to do with COVID. During the height of COVID in calendar year 2020 (which covers part of FY2020 and FY2021), there were less overall arrests and cases being tried in the courts due to COVID positive cases, social distancing requirements, etc. As the state and nation has been moving towards more normalized pre-pandemic processes, the numbers of individuals in jails and correctional facilities has increased.</p> <p>We don't know that the increase in jails and correctional facilities has directly led to an increase in admission in other settings, but we would think that as COVID restrictions relaxed, admissions in other settings have increased due to less need for quarantine, reduced facility closures, increased capacity, and a reduction in outbreaks.</p> <p>The reasons for fluctuations in our admissions to Residential Treatment Center (RTC) Project treatment are due to the following:</p> <p>Increased diversions due to community-based services meeting the child's needs that no longer require an RTC Project admission.</p> <p>Competing with other referring entities that can offer a higher rate of reimbursement.</p> <p>Bed capacity due to significant staff shortages across all mental health services due to COVID-19.</p> <p>Reduced capacity in inpatient settings due to COVID-19.</p> <p>Denying children for admission due to not being able to meet their needs.</p> <p>HHSC is working to identify solutions which include updating contracts to increase RTC's rate of reimbursement, increasing outreach efforts to RTCs to expand on bed capacity for RTC Project referrals, increase technical assistance efforts and training initiatives to contracted RTC providers.</p> <p>Since this is a point-in-time measure, it is highly susceptible to variance due to the population on hand on the measurement day. If we look at the mean LOS for all children discharged in FY22, then the LOS has remained stable and only increased by only 1 day since FY21.</p>
7	<p>Expenditures related to Home and Community Based Services (HCBS) for Adult Mental Health have continued to increase across the past two years and are expected to continue into 2023.</p> <p>The HCBS program has continued to expand to serve more individuals and as an entitlement program the state has an obligation to support any and all expansion.</p> <p>Primary source of change from 2021 is from the increase in other 24-hour care costs.</p> <p>Texas began investing additional funds in Coordinated Specialty Care services starting in 2019, and expenditures began to catch up starting in 2020 and 2021. The addition of HR133 funding in FY21 is also a source of the increased spending on ESMI 10% set-aside.</p> <p>Total Ambulatory/Community on-24-Hour Care Expenditures 2021: 634,377,516 vs 2022: 540,516,313.</p> <p>A large portion of expenditures previously reported here in 'Ambulatory/Community Non-24-Hour Care' has moved to the new 'Crisis Services' category.</p>
7A	<p>Total CSC-Evidence-Based Practices for First Episode Psychosis Expenditures. 8,229,102 vs 2022: 10,125,308.</p> <p>Texas began investing additional funds in Coordinated Specialty Care services starting in 2019, and expenditures began to catch up starting in 2020 and 2021. The addition of HR133 funding in FY21 is also a source of the increased spending on ESMI 10% set-aside.</p> <p>Most of the \$2,685,498 increase noted is from the addition of HR133 expenditures on CSC (\$2,299,105). The HR133 expenditures supported the addition of eight new CSC teams along with allowances for all existing teams to best address the new needs and challenges brought on by the COVID-19 pandemic.</p>

URS Table Number	General Notes
14A	<p>Total number of Multi-racial consumers with SMI/SED. 2021: 26,619 vs 2022: 31,591.</p> <p>The onset of the COVID-19 pandemic has resulted in the increased utilization of telehealth services allowing for increased outreach and service utilization by multi-racial clients.</p>
15	<p>Total Number of Consumers in Jail/Correctional Facility. 2021: 1,687 vs 2022: 2,132.</p> <p>The reason for the increase in the consumers in Jail/Correctional facilities has to do with COVID. During the height of COVID in calendar year 2020 (which covers part of FY2020 and FY2021), there were less overall arrests and cases being tried in the courts due to COVID positive cases, social distancing requirements, etc. As the state and nation has been moving towards more normalized pre-pandemic processes, the numbers of individuals in jails and correctional facilities has increased.</p>
16	<p>Total Number of Consumers Receiving Supported Employment Services. 2021: 8,887 vs 2022: 7,161.</p> <p>Throughout the COVID-19 pandemic (which covers part of FY2020 and FY2021), there were less opportunities for supported employment specialists to provide supported employment services to consumers due to several factors including but not limited to COVID positive cases, social distancing requirements, etc. These factors made supported employment services difficult to provide due to the in-person and community focused nature of supported employment services.</p>
16B	<p>Use of the MCOT service flag in the early implementation phase. Currently only five Local Mental Health or Behavioral Health Authorities utilize the MCOT service identifier flag.</p>
