

## 2022 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of their application package for SAMHSA's Community Mental Health Block Grant. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 21 tables that are developed by SAMHSA in consultation with SMHAs. The 2022 URS Output Tables present findings from 59 states and U.S. territories. Each output table provides summary information on the SMHA clients served in 2022: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, insurance status, living situation, employment status, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2022, 8,180,236 clients received SMHA services from 59 states and U.S. territories. This is a decrease from 8,195,517 SMHA clients in 2021. There were 5,965,872 adults (or 23.1 per 1,000), 2,197,002 children (or 29.9 per 1,000) served. About 17,362 (0.2 percent) clients were missing age data.
- Among SMHA clients, there were 4,394,191 (53.7 percent) females served while there were 3,730,939 (45.6 percent) males served. In 27 states and U.S. territories, more SMHA males were served than females, while in 32 states and U.S. territories, more SMHA females were served.
- The age distribution among SMHA clients was the largest among ages 25-44 with 33.0 percent, followed by ages 45-64 with 22.8 percent, children ages 0-12 with 14.2 percent, and children ages 13-17 with 12.7 percent.
- The highest percentage of SMHA clients that were served was among the White population with 57.9 percent, followed by Black or African Americans with 17.4 percent. SMHA clients served were 15.8 percent Hispanic and 74.5 percent non-Hispanic.

## Virginia 2022 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 population	8,180,236	14.34	24.37	59
Community Utilization per 1,000 population	7,900,059	14.14	23.53	59
State Hospital Utilization per 1,000 population	108,725	0.62	0.33	53
Other Psychiatric Inpatient Utilization per 1,000 population	433,997	2.29	1.53	42

Adult Employment Status	U.S.	State	U.S. Rate	States
Employed (Percent in Labor Force)*	890,626	58.7%	51.2%	58
Employed (percent with Employment Data)**	890,626	26.8%	27.2%	58

Adult Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	66.6%	77.7%	52

Child/Family Consumer Survey Measures	State	U.S. Rate	States
Positive About Outcome	54.9%	70.7%	47

Readmission Rates:(Civil "non-Forensic" clients)	U.S.	State	U.S. Rate	States
State Hospital Readmissions: 30 Days	5,477	8.5%	7.8%	44
State Hospital Readmissions: 180 Days	13,252	19.8%	18.9%	48
State Hospital Readmissions: 30 Days: Adults	5,064	7.9%	8.0%	42
State Hospital Readmissions: 180 Days: Adults	12,250	19.1%	19.3%	46
State Hospital Readmissions: 30 Days: Children	413	12.3%	6.5%	21
State Hospital Readmissions: 180 Days: Children	1,002	24.4%	15.7%	22

Living Situation	U.S.	State	U.S. Rate	States
Private Residence	4,235,783	87.9%	85.8%	58
Homeless/Shelter	199,656	3.2%	4.0%	53
Jail/Correctional Facility	69,379	1.8%	1.4%	52

**Note:****Are Client Counts Unduplicated?**

Unduplicated

**Number of States with Unduplicated Counts**

43

This table uses data from URS Table 2a, Table 2b and from the U.S. Census Bureau. All denominators for penetration rates use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**State Notes:****Table 2a**

Age Age calculated at midpoint of reporting period.  
 Gender "Other" category not included in MH-CLD dataset.  
 Race Race not available includes clients that identified as 'other' race.  
 Overall Populated by BHSIS Project Office with MH-CLD dataset.

**Table 2b**

Age Age calculated at midpoint of reporting period.  
 Gender "Other" category not included in MH-CLD dataset.  
 Race None  
 Overall Populated by the BHSIS Project Office with MH-CLD dataset.

Ethnicity Not Available	2,103	2.4%	537,823	9.9%	-	-	-	43

## Note:

This table uses data from URS Table 14a, Table 14b and from the U.S. Census Bureau. All denominators use the U.S. Census data from 2021.

U.S. totals are calculated uniquely for each data element based on only those states who reported clients served.

The penetration rates for 'Other' gender as well as Age, Gender, Race and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

## State Notes:

### Table 14a

Age Age calculated at midpoint of reporting period.  
Gender "Other" category not included in MH-CLD dataset.  
Race Race not available includes clients that identified as 'other' race.  
Overall Populated by the BHSIS Project Office with MH-CLD dataset.

### Table 14b

Age Age calculated at midpoint of reporting period.  
Gender "Other" category not included in MH-CLD dataset.  
Race None  
Overall Populated by the BHSIS Project Office with MH-CLD dataset.

# ACCESS DOMAIN: Adults with SMI and Children with SED Served in Community Mental Health Programs by Age and Gender, FY 2022

Virginia

Reporting Period: 7/1/2021 To: 6/30/2022

## General Notes FY 2022

### Virginia

URS Table Number	General Notes
3	State BH Hospitals experienced critical staffing shortages and significant COVID outbreaks across our system in FY2021. Six BH Hospitals were closed to admissions at the beginning of FY22 in an effort to expedite safe discharges to improve staffing ratios and mitigate safety risks due to critical staffing shortages. All hospitals reopened to admissions in FY22, however remained at limited bed capacities due to ongoing staffing shortages.
6	State BH Hospitals experienced critical staffing shortages and significant COVID outbreaks across our system in FY2021. Six BH Hospitals were closed to admissions at the beginning of FY22 in an effort to expedite safe discharges to improve staffing ratios and mitigate safety risks due to critical staffing shortages. All hospitals reopened to admissions in FY22, however remained at limited bed capacities due to ongoing staffing shortages.
6	Due to decreased admissions across our system for acute short term patient stays in FY2022, the patients remaining in the state BH hospitals were those requiring long term psychiatric treatment or those ready for discharge but remaining without an appropriate placement.
7	Other funds expenditures: This decrease year over year in "Other Federal Funds" is due to the ending of several of our other MH related grants that were accounted for in the Ambulatory/Community Non-24-Hour Care category. This includes the end of the Systems of Care grant (\$1.2M in SFY21) and the spend down of the Emergency COVID Grant (\$2.9M in SFY21).
7	Other expenditures: This decrease year over year in "Other Expenditures" is due to large IT project expenditures that were present in SFY21 but not in SFY22. These are counted under the Administration category. In SFY21 DBHDS contracted with Cerner Health Technologies to roll out new EHR software.
7	Administration expenditures: This decrease year over year in Administration is due to large expenditures that were present in SFY21 but not in SFY22. This includes the IT project mentioned in Item 2 (accounted for under Other – Administration) and several capital expenditures including renovations and improvements to MH facilities (accounted for under Medicaid – Administration).
12	Co-occurring diagnoses: The data is calculated and reported as a percentage and not a number. Therefore, the change year-over-year is truly only 1% and does not need a narrative explanation.
14A	Serious mental illness means a severe and persistent mental or emotional disorders that seriously impair the functioning of adults, 18 years of age or older, in such primary aspects of daily living as personal relations, self-care skills, living arrangements, or employment. Individuals with serious mental illness who have also been diagnosed as having a substance abuse disorder or developmental disability are included in this definition. Serious mental illness is defined along three dimensions: diagnosis, level of disability, and duration of illness. All three dimensions must be met to meet the criteria for serious mental illness. (a) Diagnosis: the person must have a major mental disorder diagnosis using the Diagnostic and Statistical Manual of Mental Disorders (DSM). These disorders are: schizophrenia, major affective disorders, paranoia, organic or other psychotic disorders, personality disorders, or other disorders that may lead to chronic disability. A diagnosis of adjustment disorder or a V code diagnosis cannot be used to satisfy these criteria. (b) Level of Disability: there must be evidence of severe and recurrent disability resulting from mental illness. The disability must result in functional limitations in major left activities. Individuals should meet at least two of the following criteria on a continuing or intermittent basis. The person (1) is unemployed, is employed in a sheltered setting or supportive work situation; has markedly limited or reduced employment skills; or has a poor employment history; (2) requires public financial assistance to remain in the community and may be unable to procure such assistance without help; (3) has difficulty establishing or maintaining a personal social support system; (4) requires assistance in basic living skills such as personal hygiene, food preparation, or money management; or (5) exhibits inappropriate behavior that often results in intervention by the mental health or judicial system. (c) Duration of Illness: the individual is expected to require services of an extended duration, or the individual's treatment history meets at least one of the following criteria: (1) the individual has undergone psychiatric treatment more intensive than outpatient care more than once in his or her lifetime (e.g., crisis response services, alternative home care, partial hospitalization, and inpatient hospitalization), or (2) the individual has experienced an episode of continuous, supportive residential care, other than hospitalization, for a period long enough to have significantly disrupted the normal living situation.
14A	Serious emotional disturbance means a serious mental health problem that can be diagnosed under the DSM-IV in children ages birth through 17 (until the 18th birthday), or the child must exhibit all of the following: (a) problems in personality development and social functioning that have been exhibited over at least one year's time and (b) problems that are significantly disabling based upon the social functioning of most children that age, and (c) problems that have become more disabling over time, and (d) service needs that require significant intervention by more than once agency.

URS Table Number	General Notes
16	Supported housing: Over the past year we have seen a positive increase in our programs utility and use with assisting individuals to become stably housed. With this positive increase we have also achieved a new level for our program by sustaining and increasing our length of stay by 22% meaning more people are secure with a stable home. Additionally, our positive increase was also maximized by adding our primary PSH results with persons who are designated with a consumer designation code of "PSH". These individuals are not present in our PSH database but receive supported housing through other funding sources.
16	Family functional therapy: Through the Center for Evidence Based Partnerships and Family First Prevention Services Act, Virginia is training public and private providers in Evidence Based Practices (EBP). Training in Functional Family Therapy is one of the EBPs that is offered. Community Services Boards have participated in this training.
16B	Call Center information is captured through reporting from 988 Lifeline/Vibrant. Caller's age data is not available and a total of 68,430 calls were captured during FY22. DBHDS is currently building out a crisis data platform that will capture age breakdown in the future. SMI/SED diagnosis status is not collected at time of crisis response and therefore these data contain all individuals served throughout year regardless of diagnosis status.
17	Due to long term impacts from the pandemic more individuals are struggling with self-management of illnesses and sustained recovery. The tools implemented to support these individuals are not always included in other services for reporting and as the population has increased while resources in local communities such as individual therapy, access to a psychiatrist for medication management, and even regular transportation have become more impacted by the behavioral health workforce issues in Virginia providers are offering these supports to continue consumer engagement, wellness, and support.
20B	Six BH Hospitals were closed to admissions at the beginning of FY22 in an effort to expedite safe discharges to improve staffing ratios and mitigate safety risks due to critical staffing shortages. All hospitals reopened admissions in FY22; however, remained at limited bed capacity due to ongoing staffing shortages.

## **Errata Sheet to the 2022 URS Output Tables**

This page includes clarifications and corrections to the 2022 URS Output Tables.

### **ACCESS DOMAIN: Adults with SMI and Children with SED Receiving Crisis Response Services, FY 2022**

The table counts and percentages have been updated due to a processing error.

### **OUTCOMES DOMAIN: Consumer Survey Results, FY 2022**

The percentages have been updated in Response Rate for “Children: U.S.” and “Adults: U.S. Average” due to a processing error.
