

2024 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2024 URS Output Tables present findings from 59 states and U.S. territories.

Each output table provides summary information on the SMHA clients served in 2024: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2024, 7,945,185 clients received SMHA services from 59 states and U.S. territories/jurisdictions. This is a reduction from 8,220,399 clients served by the SMHAs in 2023.*
- There were 5,730,557 adults (or 21.9 per 1,000), 2,212,116 children (or 30.4 per 1,000) served. Age data was missing for 2,512 (<0.1 percent) clients served.
- Among SMHA clients, there were 4,165,971 (52.4 percent) females served while there were 3,684,256 (46.4 percent) males served. In most states (38), more females were served than males, and in the remaining states (21), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 21.7 percent, children ages 13-17 with 12.9 percent, and children ages 6-12 with 12.2 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.0 percent; Black or African American clients comprised the next largest group with 17.6 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (67.8 percent), while 15.1 percent were Hispanic.

* In 2024, some States indicated a range of issues leading to decreased reporting.

Alaska 2024 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

| Utilization Rates/Number of Consumers Served | U.S. | State | U.S. Rate | States |
|--|-----------|-------|-----------|--------|
| Penetration Rate per 1,000 Population | 7,945,185 | 34.62 | 23.46 | 59 |
| Community Utilization per 1,000 Population | 7,710,249 | 33.55 | 22.77 | 59 |
| State Hospital Utilization per 1,000 Population | 116,320 | 0.67 | 0.34 | 54 |
| Other Psychiatric Inpatient Utilization per 1,000 Population | 366,246 | 0.39 | 1.24 | 43 |

Notes:

Are Client Counts Unduplicated? Duplicated between Hospitals and Community **Number of States with Unduplicated Counts** 48

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:**Table 2A**

| | |
|---------|---|
| Age | Age is assigned as of the middle of the reporting period for SFY24, thus December 31st, 2023. |
| Sex | See General Data Notes; for some data/sources/systems for which there were internal data gaps, simple client counts rather than full demographics are reported. |
| Race | See General Data Notes; for some data/sources/systems for which there were internal data gaps, simple client counts rather than full demographics are reported. |
| Overall | See General Data Notes; for API clients, duplicated counts could occur if the API client was also seen in a community setting during the reporting period. |

Table 2B

| | |
|-----------|---|
| Age | Age is assigned as of the middle of the reporting period for SFY24, thus December 31st, 2023. |
| Sex | See General Data Notes; for some data/sources/systems for which there were internal data gaps, simple client counts rather than full demographics are reported. |
| Ethnicity | See General Data Notes; for some data/sources/systems for which there were internal data gaps, simple client counts rather than full demographics are reported. |
| Overall | See General Data Notes; for API clients, duplicated counts could occur if the API client was also seen in a community setting during the reporting period. |

| Age 65-74 | 820 | 3.3% | 336,238 | 4.4% | 11.8 | 9.7 | 59 |
| Age 75 and Over | 158 | 0.6% | 112,820 | 1.5% | 4.4 | 4.0 | 57 |
| Age Not Available | - | - | 1,903 | 0.0% | - | - | 22 |
| Female | 13,949 | 56.7% | 4,066,502 | 52.7% | 40.1 | 23.8 | 59 |
| Male | 10,502 | 42.7% | 3,525,051 | 45.7% | 27.3 | 21.0 | 59 |
| Sex Not Available | 143 | 0.6% | 118,696 | 1.5% | - | - | 41 |

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 3 and from U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. penetration rates are calculated uniquely for each data element based on only those states that reported numerator (clients served) data.

The penetration rates for Age Not Available and Sex Not Available are not reported on this table because the U.S. Census data does not include these categories.

State Notes:

Age Age is assigned as of the middle of the reporting period for SFY24, thus December 31st, 2023.

Sex None

Overall See General Notes.

| Some Other Race | 271 | 1.4% | 464,451 | 8.0% | - | - | - | 40 |
| More Than One Race | 2,497 | 12.6% | 207,746 | 3.6% | 42.0 | 15.3 | 20.1 | 47 |
| Race Not Available | 1,459 | 7.4% | 667,342 | 11.5% | - | - | - | 51 |
| Hispanic or Latino Ethnicity | 1,072 | 5.4% | 925,319 | 16.7% | 19.6 | 17.7 | 14.2 | 52 |
| Not Hispanic or Latino Ethnicity | 17,376 | 88.0% | 3,645,069 | 65.6% | 25.6 | 14.6 | 13.5 | 57 |
| Ethnicity Not Available | 1,295 | 6.6% | 983,706 | 17.7% | - | - | - | 46 |

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

| | |
|-----------|--|
| Table 14A | |
| Age | Age is assigned as of the middle of the reporting period for SFY24, thus December 31st, 2023. |
| Sex | None |
| Race | None |
| Overall | See General Notes. |
| Table 14B | |
| Age | Age is assigned as of the middle of the reporting period for SFY24, thus December 31st, 2023. |
| Sex | None |
| Ethnicity | None |
| Overall | See General Notes; for n=29 clients there was a discrepancy between Table 14a and 14b; the aggregate was resolved for alignment with the N/A category. |

| Age Not Available | 4,813 | 2,132,434 | 46 | - | 60,150 | 37 | - | 32,709 | 36 |
| Total | 32,498 | 2,867,484 | - | - | 455,860 | - | - | 288,934 | - |

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 17.

States are at different stages of crisis services implementation. In some states, mobile crisis teams are not available 24/7 or statewide and states may staff and operate crisis stabilization programs in different ways.

State Notes:

See General Notes. Call center is not an unduplicated count as individuals are not tracked. Access to call centers, especially for small children is an estimate, and presumes child can access call center alone or with assistance of appropriate adult. Mobile and Stabilization services have evolving data collection systems; DBH plans additional outreach/alignment with staff/providers to ensure more accurate/complete data in the future.

ACCESS DOMAIN: Estimated Percentage of Population with Access to Crisis Response Services, FY 2024

Alaska

Reporting Period: 7/1/2023 To: 6/30/2024

| Age | Estimated Percentage of Population with Access to Call Centers | | | Estimated Percentage of Population with Access to 24/7 Mobile Crisis Team | | | Estimated Percentage of Population with Access to Crisis Stabilization Programs | | |

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

Age Age is assigned as of the middle of the reporting period for SFY24, thus December 31st, 2023.
 Sex See General Notes.
 Overall See General Notes.

Table 6 State Notes:

State Psychiatric Hospital Data from the State Psychiatric Hospital are received from API (Alaska Psychiatric Institute).
 Other Psychiatric Inpatient Duplicate counts potential across community programs, residential treatment centers, and other psychiatric inpatient.
 Residential Treatment Centers Duplicate counts potential across community programs, residential treatment centers, and other psychiatric inpatient.
 Community Mental Health Programs Duplicate counts potential across community programs, residential treatment centers, and other psychiatric inpatient.
 Overall Alaska still cannot calculate the overall LOS for state hospitals, residential treatment centers, and other psychiatric inpatient, but will endeavor to in the URS tables for 12/1/2025.

| Setting | Demographic | State | | | | | | US | | | | | | States Reporting |
|-------------------------------|-----------------|-----------------------|--------|---|--------|---|--------|-----------------------|--------|---|--------|---|--------|------------------|

| Age NA | - | - | - | - | - | - | 202 | 193 | 166 | 158 | 464 | 430 | 3 | |

Notes:

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

| | |
|-------------------------------|--|
| State Psychiatric Hospitals | Data from the State Psychiatric Hospital are received from API (Alaska Psychiatric Institute). |
| Other Psychiatric Inpatient | Duplicate counts potential across community programs, residential treatment centers, and other psychiatric inpatient. |
| Residential Treatment Centers | Duplicate counts potential across community programs, residential treatment centers, and other psychiatric inpatient. |
| Overall | Alaska still cannot calculate the overall LOS for state hospitals, residential treatment centers, and other psychiatric inpatient, but will endeavor to in the URS tables for 12/1/2025. |

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition of SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring Mental and Substance Use Disorders, FY 2024

Alaska

Reporting Period: 7/1/2023 To: 6/30/2024

| Adults and Children Who Meet the Federal Definition of SMI/SED | State | US Average | US Median | States Reporting |
|---|--------------|-------------------|------------------|-------------------------|
| Percent of Adults served through the SMHA who meet the Federal definition for SMI | 53.9% | 72.0% | 73.0% | 57 |
| Percent of Children served through the SMHA who meet the Federal definition for SED | 70.9% | 70.9% | 77.5% | 58 |

| Co-Occurring MH and Substance Use Consumers | State | US Average | US Median | States Reporting |
|--|--------------|-------------------|------------------|-------------------------|
| Percent of Adults served through the SMHA who had a co-occurring M/SUD | 51.0% | 27.4% | 25.5% | 56 |
| Percent of Children served through the SMHA who had a co-occurring M/SUD | 12.0% | 3.7% | 3.0% | 56 |
| Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis | 45.0% | 26.0% | 25.0% | 53 |
| Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis | 11.0% | 4.6% | 3.0% | 54 |

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

% of priority population and co-occurring are based on community program data only. See general Notes. Important Caveat: Due to staff departures and systems issues (and legacy pandemic/cyberattack issues), DBH is unable to report Table 12 percentages with SFY24, and thus is reporting our figures from SFY20 here (last year for which actuals were available) as estimates to inform our understanding of SFY24. DBH will strive to modify/adapt systems for next year's Table 12 to again capture these percentages for SFY25 and plans some program alignment discussions with providers and staff.

State Notes:

None

APPROPRIATENESS DOMAIN: Living Situation of Consumers Served by State Mental Health Agency Systems, FY 2024

Alaska

Reporting Period: 7/1/2023 To: 6/30/2024

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states that reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

| When Is Employment Status Measured? | At Admission | At Discharge | Monthly | Quarterly | Other |
|-------------------------------------|--------------|--------------|---------|-----------|------------------------------|
| AK | Yes | Yes | - | - | Please see General Comments. |
| US | 41 | 18 | 5 | 6 | 24 |

Notes:

This table uses data from URS Table 4.

Consumers employed as a % of those in labor force uses the sum of adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of adults employed, unemployed and not in labor force as the denominator.

State Notes:

Age Age is assigned as of the middle of the reporting period for SFY24, thus December 31st, 2023.
Sex See General Data Notes.
Overall See General Data Notes.

Notes:

This table uses data from URS Table 4A.

Consumers employed as a % of those in labor force uses the sum of adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of adults employed, unemployed and not in labor force as the denominator.

State Notes:

None

OUTCOMES DOMAIN: Consumer Survey Results, FY 2024

Alaska

Reporting Period: 1/1/2023 To: 12/31/2023

| Indicators | Children: State | Children: U.S. Average | States Reporting | Adults: State | Adults: U.S. Average | States Reporting |
|---|-----------------|------------------------|------------------|---------------|----------------------|------------------|
| Reporting Positively About Access | 67.9% | 85.9% | 47 | 78.5% | 87.5% | 49 |
| Reporting Positively About Quality and Appropriateness | | | | 80.6% | 89.4% | 49 |
| Reporting Positively About Outcomes | 54.3% | 71.3% | 47 | 70.4% | 76.7% | 49 |
| Reporting on Participation in Treatment Planning | 74.4% | 87.8% | 47 | 75.1% | 85.2% | 49 |
| Family Members Reporting High Cultural Sensitivity of Staff | 88.2% | 93.3% | 47 | | | |
| Reporting positively about General Satisfaction with Services | 62.5% | 86.2% | 47 | 82.9% | 88.5% | 49 |

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 11.

U.S. average rates for children only include states that used the YSS-F, and the U.S. average rates for adults only include states that used a version of the MHSIP Consumer Survey.

| Children/Family | State | U.S. |
|---------------------|-------|----------|
| Type of Survey Used | YSS-F | YSS-F=38 |

| Type of Adult Consumer Survey Used | 28-Item MHSIP | Other MHSIP | Other Survey |
|------------------------------------|---------------|-------------|--------------|
| State | - | Yes | - |
| U.S. | 28 | 20 | 3 |

| Sample Size & Response Rate | Children: State | Children: U.S. | States Reporting | Adults: State | Adults: U.S. Average | States Reporting |
|--|-----------------|----------------|------------------|---------------|----------------------|------------------|
| Response Rate | 4.2% | 35.2% | 37 | 9.6% | 38.5% | 36 |
| Number of Surveys Attempted (sent out) | 3,000 | 273,484 | 37 | 8,000 | 452,450 | 36 |
| Number of Surveys Contacts Made | 2,100 | 276,375 | 37 | 6,000 | 427,799 | 36 |
| Complete Surveys | 88 | 57,183 | 40 | 578 | 117,130 | 40 |

| Populations covered in survey | Children: State | Children: U.S. | Adults: State | Adults: U.S. |
|-------------------------------|-----------------|----------------|---------------|--------------|
| All Consumers | - | 5 | - | 1 |
| Sample | Yes | 43 | Yes | 49 |

No

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

None

STRUCTURE DOMAIN: State Mental Health Agency Controlled Expenditures for Mental Health, FY 2024**Alaska****Reporting Period: 7/1/2023 To: 6/30/2024**

| Activity | Expenditures: State | Percent of Total Expenditures: State | Expenditures: US | Percent of Total Expenditures: US | States Reporting |

General Notes, FY 2024

Alaska

| URS Table Number | General Notes |
|------------------|---|
| All | The reporting year is State Fiscal Year (SFY) 2024, except for the consumer surveys; for those consumer survey tables (9, 11A, 19A, 19B), the survey period is CY 2023. |
| All | Data Sources, Limitations, and Notes: Community Programs: The Division uses an electronic health records system (the Alaska Automated Information Management System (AKAIMS)) to collect and report Community Program data. However, AKAIMS does not include information on youth or adults who receive illness self-management (ISM) services. Starting in SFY12, the number of individuals who received ISM services (based on grantee quarterly reports) was added to the AKAIMS counts for the total number of individuals who received services. Due to this change in methodology, caution should be exercised when making comparisons with prior years' data. The Division has improved data collection and reporting of demographic information for clients receiving ISM services; however, many of these clients are still included in the "Not Available" category for age, sex, race, ethnicity, employment status, and living situation. Starting in SFY16, all ISM client counts generally reflect unduplicated client counts for each agency (note: there may be duplication across agencies). Due to the changes in AKAIMS and ISM reporting methodology, caution is advised when making comparisons over time. |
| All | The AKAIMS client counts are unduplicated counts of "clients served" and reflect the number of clients who received services through program enrollment. These counts do not include clients who received a mental health service but were not enrolled in a program. Starting in SFY15, the AKAIMS counts of persons served reflect unduplicated client counts within and across agencies; prior year counts were unduplicated at the agency level, but duplicated across agencies if a client received services from more than one agency. |
| All | As of SFY 19, for Community setting, counts are now based on a "client type" logic that allows reporting agencies to indicate if the individual receiving care meets specific criteria. Previously, "treated here for" criteria required the system to perform estimations to determine if the individual met priority population based on diagnosis and other criteria. Additionally, the "client type" logic accurately identifies SED/SMI clients in the 18-20 age group. DBH acknowledges the scope of reporting noted in the 2024 URS Table instructions, including the basic tenet that the scope will represent the mental health system that comes under the auspices of the SMHA. Per guidance from the BHSIS Project Office, DBH is including API, the State Psychiatric Hospital in its URS tables where appropriate. API is organizationally now separate from Alaska's Division of Behavioral Health, though both API (Alaska Psychiatric Institute) and DBH remain organizationally within the State of Alaska system. |
| All | Several of the state's larger sub-grantees are in the process of implementing a new electronic health record system. Given this situation, the client counts for those grantees may not be accurate, and may likely reflect only a subset of the total clients served in those agencies. At this point it is impossible to tell how many clients may be missing, but the division is progressing to include the full population of people served due to the implementation of the reporting database through the state's health information exchange. A handful of agencies report outside AKAIMS such as API (Alaska Psychiatric Institute) State Hospital clients, and some discretionary grant clients. In addition, State of Alaska DBH utilizes Medicaid data/clients through both its Cognos and historically its connection to Optum Tableau sources. |
| All | State Psych Hospital: Data source is the Alaska Psychiatric Institute (API) electronic health records system: Meditech: ACUTE PSYCH: Data are from the MMIS-Cognos Decision Support System (Medicaid claims data). Includes in- and out- of state clients. The unduplicated client count is based on paid Medicaid claims. |
| All | Age: For community program client counts, age is assigned as of the middle of the reporting period (e.g., SFY23 = Age as of December 31st, 2022). For API, Other Psych Inpatient, and RPTC client counts (except those in Table 6), age is assigned as of the middle of the reporting period; the Table 6 clients counts have age (child vs. adult) assigned as of the date of admission. For all admission and discharge counts, age is assigned on the date of admission. |

| URS Table Number | General Notes |
|------------------|---|
| All | <p>Race/Ethnicity: For community programs, Acute Psych, and RPTCs. 'Hispanic' data are collected separately from 'Race' data (i.e., two separate questions).</p> <p>For consistency in reporting on the URS tables, if there was a discrepancy between race vs. ethnicity total, the higher number was utilized and the balance was assigned to "Not Available" for alignment.</p> <p>For a few smaller data sets outside of the major DBH data sources (AKAIMS/Medicaid), for reported data that were difficult to disaggregate by one or more demographic variables, lump sum client counts were reported, and data gaps/deficiencies were identified, so that DBH may work with providers to improve reporting in future cycles. DBH provides instruction and technical assistance to partner providers on URS data instructions/definitions/requirements to help ensure improvement, during staff transitions or when new guidance documents for URS tables are received.</p> |
| 2A | <p>Analysis indicates the increases in Table 2A are most likely due to better, more complete data reporting, rather than large State population influxes. For some other race, an additional factor may be more individuals are identifying with this category, as well as the more complete data collection and reporting.</p> |
| 3 | <p>The increase appears to reflect better, more complete data collection and reporting. Also, it is noted the overall n is relatively low (between 200 and 300, so while the percent increase appears large, it should be interpreted in light of the relatively small actual n).</p> |
| 4 | <p>Employment Status: Starting in SFY14, the methods utilized for reporting the most recent employment status changed from using the AKAIMS Admissions/Discharge data to the Client Status Review (CSR) data. The CSR is administered at admission, periodically during treatment (every 90 to 135 days), and at discharge.</p> <p>The increase appears to reflect better, more complete data collection and reporting. Given staff changes at the provider and State level in the past, there has been better completeness on this item in this cycle.</p> |
| 5A, 5B | <p>Funding Support - Medicaid Status: For consistency in reporting across service settings, the rows reflect 'Primary' Expected Payment Source = Medicaid or Non-Medicaid. The state is not always fully able to identify clients with Medicaid only, non-Medicaid only, or both Medicaid and Non-Medicaid. For many clients, DBH is able to determine if the "primary" funding source is Medicaid or non-Medicaid. Thus in the row labeled "Medicaid only," DBH reports the number of clients with "Primary" expected payment source = Medicaid, and in the row labeled "non-Medicaid only" DBH reports the number of clients with "Primary" expected payment source is not Medicaid. DBH used the following methods for each setting.</p> <p>For community programs: In AKAIMS, the 'primary' expected payment source is collected. If the client's primary expected payment source is Medicaid, then the client is counted under Medicaid only. If the client's primary expected payment source is not Medicaid, then the client is counted under non-Medicaid only. For some smaller specialty data sources, Medicaid status was not available for FY24, for reasons including: incomplete/confounded aggregate reporting, staff changes, and/or that the organization does not presently collect data in the needed format and fields. DBH reviews data completeness and integrity and continues to work with partner organizations to provide TA to improve future reporting. Given staff and system changes, it is evident that DBH should engage in periodic review and quality control to ensure all parties understand the requirements and have the capacity to fulfill the data obligations.</p> <p>The increase appears to reflect better, more complete data collection and reporting. Given staff changes and provider and State level in the past, there has been better completeness on this item in this cycle.</p> |
| 6 | <p>The decreases appear to reflect some success in shifting care to community-based supports rather than hospital and inpatient care, as well as likely shifts post peak COVID-19 pandemic in prevalence or need for inpatient care that had resulted during the peak pandemic and its more immediate aftermath.</p> |
| 7A | <p>Total ARP Funds Expenditures: This is increased because DBH is spending down the funds before they lapse. Total Crisis Services: Reason for increase is spend down of COVID-19 funds and reduction in other federal funds.</p> |
| 7B | <p>The decline in FEP expenditures from 2023 to 2024 relates to the use of specialized COVID-19 related funding that has been expended or has expired/is expiring.</p> <p>In 2024 total for FEP is 309,483; this amount is estimate. AK added ARPA funds to increase amount. In 2023, AK added unspent MHBG funds to FEP awards and it was spent by grantees.</p> |

| URS Table Number | General Notes |
|------------------|--|
| 7C | <p>Table 7C provides a more nuanced categorical breakout of some crisis funds that are aggregated at a higher more general crisis category level within non-Block Grant funding sources in Table 7A</p> <p>Total MHBG Funds: 2024 is estimate based on set a side amount; 2023 is actual.</p> <p>Total other federal funds: One of DBH's federal grants is now managed by another division being used for other purposes.</p> <p>Total COVID-19 Relief Funds (MHBG): This increased because DBH is spending down the funds before they lapse.</p> <p>Total ARP Funds (MHBG): This is increased because DBH is spending down the funds before they lapse.</p> <p>Call Centers: The State call center has added locations and expanded services to include texting and chat.</p> <p>24/7 Mobile Crisis Teams: 2024 are estimated and 2023 are actuals.</p> <p>Crisis Stabilization Programs: 2024 is estimated and 2023 is actual. Increase in spend down of COVID-19 and ARPA funds along with state funds and federal grants.</p> |
| 12 | <p>Percentage of Persons Served who have a Dual Diagnosis (Co-Occurring Mental Health and Substance Abuse): For community settings, counts are now based on a 'client type' logic that allows reporting agencies to indicate if the individual receiving care meets specific criteria. Previously "treated here for" criteria required the system to perform estimations to determine if the individual met priority population based on diagnosis and other criteria. Additionally, the "client type" logic accurately identifies SMI/SED clients in the 18-20 age group.</p> |
| 14A | <p>Analysis indicates the increases in Table 14A are most likely due to better, more complete data reporting, rather than large State population influxes. For some other race, an additional factor may be more individuals are identifying with this category, as well as the more complete data collection and reporting.</p> |
| 14C, 15 | <p>For Table 15, Starting in FY14, for Community Programs, the methodology for reporting the most recent living situation changed from using the AKAIMS Admission/Discharge data to Client Status Review (CSR) data. The increases in two of the counts appears to reflect better, more complete data collection and reporting. Given staff changes and provider and State level in the past, there has been better completeness on this item in this cycle. The decrease in RTC appears likely to reflect a) better shifting to community based-care when possible and b) decreases in residential care since the peak of the COVID-19 pandemic and its more immediate aftermath due to shifts post peak COVID-19 pandemic in prevalence or need for residential care that had resulted during the peak pandemic and its more immediate aftermath.</p> |
| 16A | <p>EBP data are reported for Community Setting Only. In order to split the data between types of services (Supported Housing, Supported Employment, Assertive Community Treatment), the division has utilized a different data source (quarterly reports) that does not collect demographic information such as race, ethnicity, age, etc. For this reason, the total count of unduplicated persons served will not match those on table 14A and 14B. The Electronic Health Records System (AKAIMS) is able to pull total unduplicated clients by demographic; however, it does not track non-medical services with demographics at such a nuanced level. DBH suspects data in Table 16A underestimate actual counts, due to incomplete subprovider data submission, and will continue to work internally and with DBH partners towards a goal of improved data collection/submission/integrity/accuracy on this table.</p> |
| 16B | <p>EBP data are reported for Community Setting Only.</p> |
| 17 | <p>For this URS Table, Estimated Percentage of Population with Access to Service was based on available data from Alaska Department of Labor and Workforce Development (AKDOL). Estimates utilized available AKDOL population estimates provided for date 7/1/2021, indicating Alaska's total population was 734,323 (181,861 children [24.77%], and 552,462 adults [75.23%] aged 18 and over), combined with Alaska community population estimates that are served by relevant crisis services. Counts for 24/7 crisis services are not available for this reporting period; DBH will work towards more complete data client counts of these services in future reporting periods.</p> <p>NOTE: AK's reported current 24/7 mobile crisis services (Anchorage/Fairbanks) are not yet fully 24/7 and AK continues to work towards more comprehensive mobile crisis coverage in terms of geography and 24/7 access. For crisis stabilization, communities included Ketchikan (youth only), Fairbanks, and Bethel/YK Census Area. DBH is working to improve data collection and reporting abilities relating to clients receiving EBP services. Also, until DBH is fully able to report demographics for all clients receiving specific EBP services, such client counts in Table 17 are included in the "Not Available" category. DBH continues to communicate with DBH research and program managers/clinical staff, as well as with providers to better ensure that relevant persons and organizations understand their obligations and the required elements needed. Such TA may include email/phone calls to share and interpret URS guidance documents such as data definitions/instructions.</p> |
| 19A | <p>Sample size and survey contacts are estimates.</p> |
| 21 | <p>Per the 2024 URS instructions, this Table 21 is optional, and DBH is not reporting on it this year.</p> |
