

2024 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2024 URS Output Tables present findings from 59 states and U.S. territories.

Each output table provides summary information on the SMHA clients served in 2024: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2024, 7,945,185 clients received SMHA services from 59 states and U.S. territories/jurisdictions. This is a reduction from 8,220,399 clients served by the SMHAs in 2023.*
- There were 5,730,557 adults (or 21.9 per 1,000), 2,212,116 children (or 30.4 per 1,000) served. Age data was missing for 2,512 (<0.1 percent) clients served.
- Among SMHA clients, there were 4,165,971 (52.4 percent) females served while there were 3,684,256 (46.4 percent) males served. In most states (38), more females were served than males, and in the remaining states (21), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 21.7 percent, children ages 13-17 with 12.9 percent, and children ages 6-12 with 12.2 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.0 percent; Black or African American clients comprised the next largest group with 17.6 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (67.8 percent), while 15.1 percent were Hispanic.

* In 2024, some States indicated a range of issues leading to decreased reporting.

Notes:

Are Client Counts Unduplicated?UnduplicatedNumber of States with Unduplicated Counts48

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

U.S. figures are based on states reporting.

This table uses data from URS tables 5A and 5B.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

Type of Medicaid Data Reported

People served by both includes people with any Medicaid

Ethnicity Not Available	-	-	983,706	17.7%	-	-	-	46

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

General Notes, FY 2024

American Samoa

URS Table Number	General Notes
All Tables	The individuals included in this year's (FY 2024) report are those who have received mental health services and those who completed the MH screening and assessment but were not diagnosed as having a SMI/SED. These individuals were enrolled in other services such as anger management and MET/CBT programs which the majority have successfully completed. AS was unable to obtain data on clients who were served at the Behavioral Health Clinic for FEP services and this accounts for the decrease in the number reported for this fiscal year.
2A, 3, 4	The total data include individuals with a mental health diagnosis and those without but were referred to the SMHA for mental health screening and assessment. The decrease in the numbers of individuals served during this reporting period is due to the number of referrals received and successful discharges.
5A, 6	The number of individuals served this year has dropped due to successful discharges and the decrease in the number of new referrals received.
7A, 7B, 7C, 8	State Funds: AS was not successful in obtaining this data. BSCA: BSCA funding was not utilized as the state ran into challenges implementing the activities planned for last year. The cause of the multi-year changes is unknown.
9	The decrease in the percentage of adults reporting positively about functioning is due to the decrease in the total number of individuals served this year.
10	The mental health services are provided by the SSA and is the only known agency who receives block grant funding for these services. DOH is the territory's SSA and is the only agency that receives block grant funding to provide mental health services.
12, 14A, 14C, 16A & 16B	AS has not been successful in collecting this data in the past years. With the consolidation of all the behavioral health services under the Department of Health, AS is now able to report this data. AS was successful in collecting data on SMI individuals who received services at the Community Health Clinic. One of the services administered by the clinic staff is the partial ACT program.
12	The increase in the number of individuals meeting the SMI definition is due to new referrals received this year.
15	The number of individuals served this year has dropped due to successful discharges and the decrease in the number of new referrals received.
16B	Self-Management and Recovery: Data not available.
16C & 16D	No new referrals received this year by community MH programs. No admissions this year for CSC-FEP services. No admissions or new referrals this year to the community-based outpatient programs for CSC-FEP services. AS has not been able to collect data of individuals who received FEP services at the Community Health Clinic but will make sure data is reported in next year's report.
17	The American Samoa 988 Crisis Center and helpline serves the entire territory and provides 100% coverage. Stabilization Services: To access this service, individuals have to go to ER first which is the standard procedure.
20A, 20B & 21	The state does not have a Psychiatric Hospital.
20A	The psychiatric in-patient services are provided at the Lyndon B. Johnson hospital and the SSA was not able to get the data.
