

2024 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2024 URS Output Tables present findings from 59 states and U.S. territories.

Each output table provides summary information on the SMHA clients served in 2024: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2024, 7,945,185 clients received SMHA services from 59 states and U.S. territories/jurisdictions. This is a reduction from 8,220,399 clients served by the SMHAs in 2023.*
- There were 5,730,557 adults (or 21.9 per 1,000), 2,212,116 children (or 30.4 per 1,000) served. Age data was missing for 2,512 (<0.1 percent) clients served.
- Among SMHA clients, there were 4,165,971 (52.4 percent) females served while there were 3,684,256 (46.4 percent) males served. In most states (38), more females were served than males, and in the remaining states (21), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 21.7 percent, children ages 13-17 with 12.9 percent, and children ages 6-12 with 12.2 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.0 percent; Black or African American clients comprised the next largest group with 17.6 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (67.8 percent), while 15.1 percent were Hispanic.

* In 2024, some States indicated a range of issues leading to decreased reporting.

Arkansas 2024 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 Population	7,945,185	20.53	23.46	59

Notes:**Are Client Counts Unduplicated?**

Duplicated between children and adults

Number of States with Unduplicated Counts

48

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:**Table 2A**

Age None
Sex None
Race None
Overall Please see General Comments for additional information.

Table 2B

Age None
Sex None
Ethnicity None
Overall Arkansas does not capture data unique to pregnant women for the state's mental health services. Also see General Comments for additional information.

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 14C and from U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. penetration rates are calculated uniquely for each data element based on only those states that reported numerator (clients served) data.

The penetration rates for Age Not Available and Sex Not Available are not reported on this table because the U.S. Census data does not include these categories.

State Notes:

Age	None
Sex	None
Overall	AR attributes the increase to the public health unwind and the increased burden on the state's contracts covering acute care bed days from SFY 23 to SFY 24.

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

Age None

Sex None

Overall During the public health unwind, many Arkansans lost health insurance coverage. This increased the burden of costs for acute hospital bed days funded by the state contracts.

Table 6 State Notes:

State Psychiatric Hospital None

Other Psychiatric Inpatient None

Residential Treatment Centers None

Community Mental Health Programs None

Overall None

Ethnicity Not Available	190	17.6%	19,736	9.1%	4.0%	3.5%	40

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states that reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

General Notes, FY 2024

Arkansas

URS Table Number	General Notes
2A, 2B, 5A, 5B	Please note that the data Arkansas is reporting is only from the state's Community Mental Health Centers, who are required to supply SMHA with the data for URS tables. These figures are not indicative of the state's complete mental health system at this time.
2A	Total number of Asian persons served is higher in 2024 due to an increase within Benton and Washington counties between January and March. Arkansas is working with providers to determine the reason behind this increase, and has no further explanation for the change in these populations.
3, 14C	Arkansas attributes the increase to the public health unwind and the increased burden on the state's contracts covering acute care bed days from SFY 23 to SFY 24.
5A, 5B	Arkansas believes the amounts in the Non-Medicaid and Medicaid Status Unavailable are not in alignment with the state's payor sources. The state will be doing some research to see if this is a collection problem with not having categories that line up clearly with URS table categories. Despite this, Arkansas believes the total served numbers are still in line with the state's expectations. The state also wants to reiterate that the data reported is only from the Community Mental Health Centers, as stated in previous lines.
6	Increase in services is a result of Arkansas working toward increasing turnover, and thus allowing for more clients served for Psychiatric Inpatient.
7A	A comment on increased COVID/ARP funding: Arkansas' contract development process is extremely lengthy and several contracts using this funding were slow to get started in late SFY 2023, but gathered steam in SFY 2024. An additional problem was noted in that FEP set aside amounts for the state's contracts were not properly updated when the MHBG award was increased. This led to underutilization by \$224,169 for SFY 2024. Now that this underutilization has been identified, the state is working on developing a plan to expend the funding on evidence-based services for FEP population. For Other categories Arkansas did have to utilize additional state general revenue and reserve funding to cover needed services. The category of total mental health prevention reflects a new mental health prevention-based project. The 17% decrease in Total Crisis services is due to money allocated from 'Other Funds Expenditures', and accounts for the increase in that regard.
7B	A problem was noted in that FEP set aside amounts for the state's contracts were not properly updated when the MHBG award was increased. This led to underutilization by \$224,169 for SFY 2024. Now that this underutilization has been identified, AR is working on developing a plan to expend the funding on evidence-based services for FEP population.
7C	Due to lack of available state general revenue (SGR) in 2023 during the public health unwind, a significant amount of "other" funding was used by DHS to fund Crisis Stabilization Units. In SFY 2024, with Arkansas undergoing the public health unwind and loss of health insurance coverage for many, DHS continued to need significant amounts of COVID funding as well as ARP funds to support the Crisis Stabilization Units as SGR was being used to supplement other programs which were being utilized at more elevated rates. The increase in Training and Technical Assistance category was due to contracts getting a slow start and needing some revisions in planning and implementation processes to gain momentum. DHS draws down federal money a year behind; Arkansas ensured the state met the requirements of the 5% Crisis set aside and exceeded the minimum. The large increase in the state's block grant funding from 6.29M to 8.53M between FY2023 and FY2024 accounts for the increase. Total State funds: DHS used 'Other funding/reserve' funds to cover crisis stabilization unit costs. Mobile Crisis Teams: Slight decrease due to closure of one mobile crisis team. Crisis Stabilization Programs: Decrease is due to a Crisis stabilization closure late into the FY24 year.
10	For Sub-State Planning Areas 13-16, and specific to the state's four Crisis Stabilization Units, a combination of Crisis Set Aside from FFY 22 and 23 were used in SFY 2024. Because of the way DHS distributes funds, Total Block Grant Funds is the sum of Adults with Serious Mental Illness and Children with Serious Emotional Disturbance and not Adults with Serious Mental Illness, Children with Serious Emotional Disturbance, Set-Aside for FEP Programs, Set-Aside for ESMI Program, and Set-Aside for Crisis Services. Block Grant funds are allocated as follows: From the total award, 5% for Crisis and 10% for FEP are taken off the total block grant award; other administrative costs, funding used for partnerships, and funding for the block grant council is then taken; finally, the remainder amount is divided among SMI adults and SED children.

URS Table Number	General Notes
12	The fluctuation in percent of adults served by the SMHA with co-occurring MH/SA diagnoses may be explained by the high percentage of unknown entries, which accounted for approximately 70% of the total unduplicated individuals reported.
14A	Total number of Asian consumers with SMI/SED is reflected by the increase in in total Asian population between January and March as noted by the comment above. Arkansas observed an overall reduction of 6% in the population when compared to last year; this may contribute to the decrease in white consumers with SMI/SED, as that population constitutes about 60% of total population.
15	Changes in living situation for Crisis Residence, Residential Treatment, Institutional Setting, and Other may be attributed to the following: Arkansas recently has added a service called Therapeutic Community. In addition, the state believes providers are incorrectly attributing treatment individuals to wrong categories.
16A	Total number of consumers receiving ACT services decrease may be attributed to a closed ACT program. Arkansas has no indicators behind the decrease in total number of children with SED at this time.
16B	These numbers are within the expected increase for services, as one provider has increased/doubled their scope of clients served for integrated treatment for co-occurring since 2021.
16C, 16D	Arkansas did not have a Coordinated Specialty Care program functioning in SFY 2024.
17	Call centers include aggregate 988 data and calls reported by the state's Community Mental Health Center contractors requesting crisis screenings. As our Community Mental Health Contractors are not currently reporting by age, the actual numbers are not divided into age brackets. Mobile Crisis service is still limited to 3 counties in our state and related to a pilot program, thus only 4% of the state has access. Crisis Stabilization Units do not currently serve anyone below age 18. The state is working to build a more effective state-wide crisis system in the next 2 years and will incorporate gathering more robust data in that system.
21	Arkansas will not be reporting any data for Table 21 as DHS does not currently collect data from each and every psychiatric hospital in the state regarding voluntary and involuntary status.
