

## 2024 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2024 URS Output Tables present findings from 59 states and U.S. territories.

Each output table provides summary information on the SMHA clients served in 2024: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2024, 7,945,185 clients received SMHA services from 59 states and U.S. territories/jurisdictions. This is a reduction from 8,220,399 clients served by the SMHAs in 2023.\*
- There were 5,730,557 adults (or 21.9 per 1,000), 2,212,116 children (or 30.4 per 1,000) served. Age data was missing for 2,512 (<0.1 percent) clients served.
- Among SMHA clients, there were 4,165,971 (52.4 percent) females served while there were 3,684,256 (46.4 percent) males served. In most states (38), more females were served than males, and in the remaining states (21), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 21.7 percent, children ages 13-17 with 12.9 percent, and children ages 6-12 with 12.2 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.0 percent; Black or African American clients comprised the next largest group with 17.6 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (67.8 percent), while 15.1 percent were Hispanic.

\* In 2024, some States indicated a range of issues leading to decreased reporting.

**Notes:****Are Client Counts Unduplicated?**

Unduplicated

**Number of States with Unduplicated Counts**

48

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**Notes:**

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**Notes:**

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

**Table 3 State Notes:**

**Notes:**

This table uses data from URS Table 7A.

Ambulatory/Community includes Mental Health Prevention, Evidence-Based Practices for Early Serious Mental Illness including First Episode Psychosis, Other 24-Hour Care, and Crisis Services expenditures.

This table does not include administration (excluding program/provider level) expenditures.

**State Notes:**

Variance from SFY23 to SFY24 reflects increased use of ARP funds and the availability of federal grants to support CCBHC implementation and crisis service expansion. See General Comments.

## General Notes, FY 2024

### Iowa

URS Table Number	General Notes
2A, 2B, 3, 4, 4, 5A, 5B, 6, 14A, 14B, 14C, 15, 20A, 21	Variance from SFY23 to SFY24 is the result of applying standardized methods more conducive for replication and feasibility as Iowa implements significant steps towards aligning behavioral health services in Iowa. As data reporting systems adjust accordingly during this time of transition, data reported should be used with caution.
3, 6, 7A	Variance from SFY23 to SFY24, particularly for services in "Residential Treatment Centers" is the result of applying standardized methods more conducive for replication and feasibility as Iowa implements significant steps towards aligning behavioral health services in Iowa. Variance in services provided in "Institutions under the Justice System" reflects an adjustment for services incorrectly categorized in other settings for prior reporting periods. As data reporting systems adjust accordingly during this time of transition, data reported should be used with caution.
3	RTC data: Iowa will continue to review the data and methodology resulting in the variance from the previous year. This will take time and consideration for future reporting methods. Until issues are resolved, data should be viewed with caution.
4, 4A	Data within Tables 4 and 4A includes unknown age in the calculation. Availability of employment data in Iowa continues to fluctuate. Iowa will continue to reference all reliable data sources available for the recipient to determine the employment status.
5A, 5B	Variance in "People Served by Both Medicaid and Non-Medicaid Sources" reflects an increase in recipients of services funded by region (i.e., local) funds.
7A	Increase in "Medicaid" funds reflects continued efforts in enhancing mental health services in Iowa. Increase in "Other Federal Funds" is due to increased availability and use of SAMHSA grant funding to build capacity for community-based and crisis mental health services. Increase in all MHBG, COVID-19 and ARP funds reflect both an expansion of services and administrative changes to invoice reporting periods from FFY to SFY, resulting in under-reporting SFY23 MHBG funds in SFY23 URS Table 7A - 10 data. Variance between MHBG COVID-19 Relief and ARP funds is due to using available ARP funds once COVID-19 funds were expended. Spending by fund source data are reliable; however, spending by activity type data should be used with caution.
7B	Increase in all MHBG, COVID-19 and ARP funds is due to an expansion of services as providers increased capacity to serve more clients and administrative changes to invoice periods from FFY to SFY, resulting in under-reporting SFY23 MHBG funds for one provider. Variance between MHBG COVID-19 Relief and ARP funds is due to using available ARP funds once COVID-19 funds were expended.
7C	Increase in "MHBG" and "Other Federal Funds" is due to increased investments using newly awarded SAMHSA grants to support the expansion of crisis services, including widespread marketing efforts to increase awareness of available services in Iowa. Variance in service type reflects the movement of crisis programs from the implementation stage to providing direct services (Call Centers). Variance between MHBG COVID-19 Relief and ARP funds is due to using available ARP funds once COVID-19 funds were expended. The variance is attributed to a change in accounting codes used for reporting local funds. Previous accounting codes did not differentiate system-building, non-direct costs for crisis services from direct service expenditures. SFY2024 identified the proportion of funds used for strategic planning purposes and reported accordingly under "Strategic Planning and Coordination".
8	Variance in MHBG for infrastructure Support reflects the movement of crisis services from infrastructure building to implementation (direct services). Variance in MHBG COVID-19 and ARP funds for Quality Assurance and Improvement and Partnerships, Comm Outreach and Needs Assessment activities reflect the state's technical assistance needs as new grant programs continue to build infrastructure in preparation for implementation. Increase in Partnerships, Comm Outreach and Needs Assessment also reflect additional funding for marketing activities to increase awareness of available crisis services in Iowa. Variance between MHBG COVID-19 Relief and ARP funds is due to using available ARP funds once COVID-19 funds were expended.
9, 11, 11A, 16A, 16B, 16C, 16D, 19A, 19B	The capacity to determine the methodology for additional tables require more resources than what is currently available. However, Iowa continues to build on and prioritize the ability to capture and report reliable statewide data.

URS Table Number	General Notes
10	Variance from SFY23 to SFY24 in amount spent on Adults is primarily due to a decrease in using MHBG supplemental funds for Iowa's Covid Recovery Project.
12	Small sample sizes will depict larger variances.
15	Availability of residential setting data in Iowa fluctuates and comes from multiple sources if available for the recipient. Iowa is in the process of reviewing and developing a more reliable method to determine a recipient's residential setting.
20A	Iowa has not revised the methodology for counting client admissions and days in state hospitals.
