

2024 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2024 URS Output Tables present findings from 59 states and U.S. territories.

Each output table provides summary information on the SMHA clients served in 2024: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2024, 7,945,185 clients received SMHA services from 59 states and U.S. territories/jurisdictions. This is a reduction from 8,220,399 clients served by the SMHAs in 2023.*
- There were 5,730,557 adults (or 21.9 per 1,000), 2,212,116 children (or 30.4 per 1,000) served. Age data was missing for 2,512 (<0.1 percent) clients served.
- Among SMHA clients, there were 4,165,971 (52.4 percent) females served while there were 3,684,256 (46.4 percent) males served. In most states (38), more females were served than males, and in the remaining states (21), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 21.7 percent, children ages 13-17 with 12.9 percent, and children ages 6-12 with 12.2 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.0 percent; Black or African American clients comprised the next largest group with 17.6 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (67.8 percent), while 15.1 percent were Hispanic.

* In 2024, some States indicated a range of issues leading to decreased reporting.

Minnesota 2024 Mental Health National Outcome Measures (NOMS): SAMHSA Uniform Reporting System

Utilization Rates/Number of Consumers Served	U.S.	State	U.S. Rate	States
Penetration Rate per 1,000 Population	7,945,185	62.55	23.46	59
Community Utilization per 1,000 Population	7,710,249	62.55	22.77	59
State Hospital Utilization per 1,000 Population	116,320	0.03	0.34	54

Notes:**Are Client Counts Unduplicated?**

Based on MN BCI-CLD RY2024 (with CY2023 data).

Number of States with Unduplicated Counts

48

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:**Table 2A**

Age

The range of ages is 0 years to more than 75 years.

Sex

None

Race

None

Overall

During this reporting iteration, BHA improved standardized reporting practices to help increase consistency, clarity, efficiency, and compliance. Variance from this reporting iteration and last for this table is a result of those improvements.

Notes:

U.S. figures are based on states reporting.

This table uses data from URS tables 5A and 5B.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

Type of Medicaid Data Reported

People served by both includes people with any Medicaid

State Notes:

5A Age None

5A Sex None

5A Overall See General Comments. Outcome measures were collected from MHIS and MMIS databases, resulting in variance in the data alignment with URS Table 2A.

5B Overall See General Comments.

Notes:

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.
The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

State Notes:

Table 14A	
Age	Children with SED (less than 18 years and serious emotional disturbance (SED) equals 31.5%. Adults (ages 18- 75+ years) equals 68.5% SMI population.
Sex	None
Race	None
Overall	During this reporting iteration, BHA improved standardized reporting practices to help increase consistency, clarity, efficiency, and compliance. Variance from this reporting iteration and last for this table is a result of those improvements.
Table 14B	
Age	None
Sex	None
Ethnicity	None
Overall	None

Notes:

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

Table 3 State Notes:

Age None

Sex None

Overall During this reporting iteration, BHA improved standardized reporting practices to help increase consistency, clarity, efficiency, and compliance. Variance from this reporting iteration and last for this table is a result of those improvements.

Table 6 State Notes:

State Psychiatric Hospital None

Other Psychiatric Inpatient None

Residential Treatment Centers None

Community Mental Health Programs Data not available for this reporting iteration.

Overall See General Comments. Outcomes measures were collected from MMIS database, resulting in variance in the data alignment with URS Table 3.

Notes:

Resident clients are clients who were receiving services in inpatient settings at the end of the reporting period.

This table uses data from URS Table 6.

State Notes:	
State Psychiatric Hospitals	None
Other Psychiatric Inpatient	None
Residential Treatment Centers	None
Overall	See General Comments. Outcomes measures were collected from MMIS database, resulting in variance in the data alignment with URS Table 3.

APPROPRIATENESS DOMAIN: Percent of Adults and Children Served Who Meet the Federal Definition of SMI/SED and Percent of Adults and Children Served Who Have Co-Occurring Mental and Substance Use Disorders, FY 2024

Minnesota

Reporting Period: 1/1/2023 To: 12/31/2023

Adults and Children Who Meet the Federal Definition of SMI/SED	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who meet the Federal definition for SMI	100.0%	72.0%	73.0%	57
Percent of Children served through the SMHA who meet the Federal definition for SED	100.0%	70.9%	77.5%	58

Co-Occurring MH and Substance Use Consumers	State	US Average	US Median	States Reporting
Percent of Adults served through the SMHA who had a co-occurring M/SUD	37.0%	27.4%	25.5%	56
Percent of Children served through the SMHA who had a co-occurring M/SUD	5.0%	3.7%	3.0%	56
Percent of Adults served through the SMHA who met the Federal definitions of SMI who also have a substance use diagnosis	39.0%	26.0%	25.0%	53
Percent of Children served through the SMHA who met the Federal definitions of SED who also have a substance use diagnosis	7.0%	4.6%	3.0%	54

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 12.

How are the number of clients with co-occurring disorders counted and calculated?

MN used the MH-CLD data C-21, C-05(age), C-08 (SMI, SED).

State Notes:

Children ages 0-3 are included based on program eligibility.

APPROPRIATENESS DOMAIN: Living Situation of Consumers Served by State Mental Health Agency Systems, FY 2024

Hispanic or Latino Ethnicity	1	50.0%	41,708	19.3%	0.0%	4.2%	51
Not Hispanic or Latino Ethnicity	1	50.0%	155,004	71.6%	0.0%	4.9%	53
Ethnicity Not Available	-	-	19,736	9.1%	-	3.5%	40

Notes:

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states that reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

State Notes:

During this reporting iteration, BHA improved standardized reporting practices to help increase consistency, clarity, efficiency, and compliance. Variance from this reporting iteration and last for this table is a result of those improvements.

Minnesota

Reporting Period: 7/1/2023 To: 6/30/2024

What populations are reported? Populations included are from the Mental Health Information System (MHIS) and the Medicaid Management Information System (MMIS)

Number of States Reporting All Clients: 39 Number of States Reporting Some Clients: 21

When Is Employment Status Measured?	At Admission	At Discharge	Monthly	Quarterly	Other
MN	Yes	-	-	-	-
US	41	18	5	6	24

Notes:

This table uses data from URS Table 4.

Consumers employed as a % of those in labor force uses the sum of adults employed and unemployed as the denominator.

Consumers employed as % of known employment status uses the sum of adults employed, unemployed and not in labor force as the denominator.

State Notes:

Age Age is based on MN MHIS and MMISS databases.

Sex None

Overall During this reporting iteration, BHA improved standardized reporting practices to help increase consistency, clarity, efficiency, and compliance. Variance from this reporting iteration and last for this table is a result of those improvements.

OUTCOMES DOMAIN: Employment Status of Adult Mental Health Consumers Served in the Community by Diagnosis, FY 2024
Minnesota
Reporting Period: 1/1/2023 To: 12/31/2023

Forensics included in "non forensic" data?

No

Notes:

U.S. figures are based on states reporting. This table uses data from URS Tables 20A and 20B.

The ethnicity categories may not sum to the total number of readmissions and discharges because some states do not collect and report ethnicity separately from race.

State Notes:

During this reporting iteration, BHA improved standardized reporting practices to help increase consistency, clarity, efficiency, and compliance. Variance from this reporting iteration and last for this table is a result of those improvements.

General Notes, FY 2024

Minnesota

URS Table Number	General Notes
5A, 5B, 6	During this reporting iteration, BHA improved standardized reporting practices to help increase consistency, clarity, efficiency, and compliance. Variance from this reporting iteration and last for this table is a result of those improvements.
7A, 7B, 7C, 8, 14C, 15	Late in this reporting iteration, MN-DHS became aware that historic reporting practices were no longer producing meaningful and valid outcomes regarding program utilization. Further, MN-DHS identified numerous gap areas. MN-DHS determined that the URS required more oversight to help inform decision making in the methodology and analysis of program utilization response rates reported in the URS. This oversight focused on improved reporting practices to enhance consistency, clarity, efficiency, and compliance. Although this process improvement resulted in outcome variance between this reporting iteration and last, variance in future reporting rates will stabilize.
16A	MN-DHS program managers for these areas were unable to be determined. Reporting rates for these program areas were done by a query from MMIS. During this reporting iteration, MN-DHS is unable to validate if and/or how long fidelity measures are being monitored for these program areas. Therefore, MN is unable to respond currently. MN-DHS has classified this as a gap area and will work toward responding for the next reporting iteration.
16B	Data is unavailable for the current iteration.
17	<p>Call centers: 988 Lifeline centers in MN collect data based on the age categories 0-9, 10-15, 16-24, 25-44, 45-64, 65+, which differs from URS age ranges. As a result, all numbers are aggregated under "Age not available" section. Please keep in mind that this data does not reflect the age breakdown of all Minnesotans who contact the 988 Lifeline.</p> <p>The Minnesota 988 Lifeline centers do not answer the specialty lines (Veterans Crisis, Spanish language services, and videophone services for deaf or hard of hearing folks, etc.) that are part of the national 988 Lifeline service. Additionally, if a Minnesota 988 Lifeline center is at capacity, some help-seekers may be routed to a national backup center. The data provided only includes help-seekers who chose to connect with their local center (i.e., they did not connect with a specialty line) and were not redirected to a National Backup center.</p> <p>During SQ23, call and text routing for the 988 Lifeline was based on the help-seeker's phone number. As a result, Minnesota 988 Lifeline centers only received calls and texts from Minnesota-based area codes. Chat services, however, were routed based on the zip code entered in the pre-chat survey. Some clients use a false zip code to maintain their anonymity.</p>
19A, 19B	Data is unavailable for the current iteration.
