

## 2024 Uniform Reporting Summary Output Tables Executive Summary

State Mental Health Agencies (SMHAs) compile and report annual data as part of SAMHSA's Community Mental Health Services Block Grant Report requirements. These compiled data constitute the Uniform Reporting System (URS).

The URS is comprised of 25 tables that are developed by SAMHSA in consultation with SMHAs. The 2024 URS Output Tables present findings from 59 states and U.S. territories.

Each output table provides summary information on the SMHA clients served in 2024: sociodemographic characteristics of clients served, outcomes of care, use of selected evidence-based practices, client assessment of care, Medicaid funding status, living situation, employment status, crisis response services, and readmission to state psychiatric hospitals within 30 and 180 days. Key data highlights are listed below:

- In 2024, 7,945,185 clients received SMHA services from 59 states and U.S. territories/jurisdictions. This is a reduction from 8,220,399 clients served by the SMHAs in 2023.\*
- There were 5,730,557 adults (or 21.9 per 1,000), 2,212,116 children (or 30.4 per 1,000) served. Age data was missing for 2,512 (<0.1 percent) clients served.
- Among SMHA clients, there were 4,165,971 (52.4 percent) females served while there were 3,684,256 (46.4 percent) males served. In most states (38), more females were served than males, and in the remaining states (21), more males were served than females.
- The age distribution of SMHA clients served was the largest among ages 25-44 with 33.2 percent, followed by ages 45-64 with 21.7 percent, children ages 13-17 with 12.9 percent, and children ages 6-12 with 12.2 percent.
- Over half of SMHA clients served were White, comprising the largest racial category at 56.0 percent; Black or African American clients comprised the next largest group with 17.6 percent. Race data was missing for 12.5 percent of clients served. When looking at ethnicity, the majority of SMHA clients served were non-Hispanic (67.8 percent), while 15.1 percent were Hispanic.

\* In 2024, some States indicated a range of issues leading to decreased reporting.

**Notes:**

Are Client Counts Unduplicated?

Unduplicated

Number of States with Unduplicated Counts

48

This table uses data from URS Table 2A, Table 2B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

Ethnicity Not Available	-	-	983,706	17.7%	-	-	-	46

**Notes:**

This table uses data from URS Table 14A, Table 14B and from the U.S. Census Bureau. All denominators for penetration rates use the SC-EST2023-ALLDATA6: Annual State Resident Population Estimates for 6 Race Groups by Age, Sex, and Hispanic Origin data from the U.S. Census Bureau.

U.S. totals are calculated uniquely for each data element based on only those states that reported clients served.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

The penetration rates for Some Other Race, as well as Age, Sex, Race, and Ethnicity Not Available are not reported on this table because the U.S. Census data does not include these categories.

Regional groupings are based on SAMHSA's Block Grant Regions.

**Notes:**

This table uses data from URS Table 3 and 6.

Admission Rate = number of admissions divided by total served during the year.

US Admissions During Year uses data from states reporting data only. States are only included in "US Total Served" if they also reported data on admissions.

US Total Served During Year is calculated using data in URS Table 3.

**Notes:**

U.S. figures are based on states reporting.

This table uses data from URS Table 15.

U.S. totals are calculated uniquely for each data element based on only those states that reported numerator (clients served) data.

The ethnicity categories may not sum to the total number of clients served because some states do not collect and report ethnicity separately from race.

**State Notes:**

None

## General Notes, FY 2024

### Northern Mariana Islands

URS Table Number	General Notes
2A, 3	The increase in clients served is largely attributed to the transition to the Foothold AWARDS EHR/Case Management System. The successful transition to a scalable and configurable Electronic Health Record (EHR) system has enabled the State Mental Health Agency to capture and consolidate client service data across all programs, ensuring a more comprehensive and accurate representation of services provided.
4	The increase in clients served is largely attributed to the transition to the Foothold AWARDS EHR/Case Management System. The successful transition to a scalable and configurable Electronic Health Record (EHR) system has enabled the State Mental Health Agency to capture and consolidate client service data across all programs, ensuring a more comprehensive and accurate representation of services provided. This includes all relevant indicators pertaining to Employment Status.
6	With the transition to a new EHR system, total served at the beginning of the year is not as accurate as there is a certain cut-off period for client record transfer to the new system.
7A	State funds are based on the level of effort contributed to the State Mental Health System through the delivery of essential behavioral health services. This amount is generally calculated by estimating time, resources, and staffing dedicated to core activities aligned with state mental health priorities such as direct client care, case management, community outreach, and coordination with other providers. Total MHBG, EBP for ESMI, Administration Expenditures, and BSCA Fund's amounts are based on the specific set-aside rates.
7C	The decrease in Call Center expenditures is due to a slight shift of funds to accommodate the improved workforce capacity of the Mobile Crisis Teams.
14A, 15	With the implementation of the new EHR system, all programs across the CGC are now consistently reporting data, resulting in a more accurate and comprehensive picture of our SMI and SED population. This enhanced data integration and reporting has likely contributed to the observed increases, reflecting improved diagnostic capture and more complete demographic representation.
14C	With the implementation of the new EHR system, all programs across the CGC are now consistently reporting data, resulting in a more accurate and comprehensive picture of our SMI and SED population. This enhanced data integration and reporting has likely contributed to the observed increases, reflecting improved diagnostic capture and more complete demographic representation. Please note the counts are queries sourced from the Psychiatric Department.
16C, 16D	The State Mental Health Agency/Community Guidance Center will report for this indicator for the subsequent fiscal year. While FEP services are provided, they are not currently tracked in MP's EHR/Case Management System. This requires a revisit with the program providers and superusers to collaborate and determine the best possible approaches to include FEP and CSC.
20A	Based on the queried data sourced from the Psychiatric Department, all admissions and discharges were usually just days apart.
